

- 
- **Complete Product Manufacture**
 - **Rapid Prototyping & Build**
 - **Cable Looms & Harness Manufacture**
 - **Advanced Test & Inspection Capabilities**
 - **Effective NPI Techniques**
 - **Product Procurement & Full Trace**
 - **Absolute Quality**

Barric 

Barric

a world leader in the manufacture of electronics.

With over 30 years of experience, investment and success, Barric has enabled innovative companies across the world take successful products to market. Whether your technology is surface mount, Micro BGA or through hole, Barric has the technology and expertise to deliver an outstanding service.

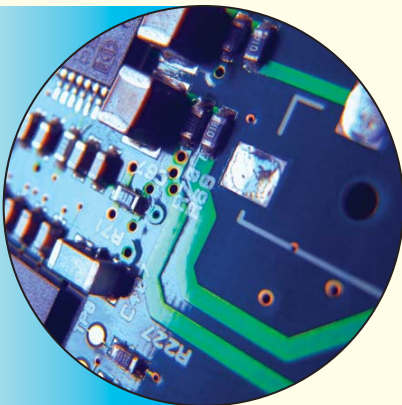

At Barric we provide a broad range of services to the technology sector. From early stage design assistance, pcb assembly, complete product manufacture and even warranty repair and rework.

We've made the assembly of electronics our expertise - giving technology companies across the world the freedom to innovate. When it comes to the manufacturing of electronics, Barric has all you need.

If you have a new project, please do not hesitate to get in touch!

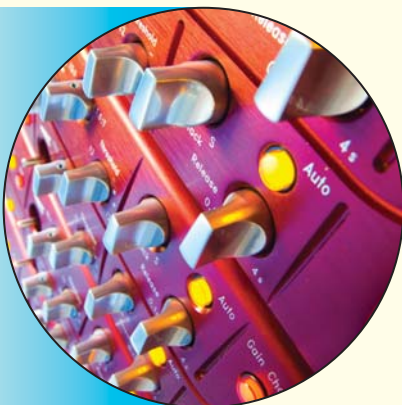

At Barric we believe in 'excellence through experience'. With every new project, we learn a little more about the business of manufacturing electronics. After 30 years in business, you can imagine that we've accumulated a lot of knowledge and expertise in this field.

Whether it's the recent challenges of the thermodynamic behaviour of lead-free components or the reliable placement of BGA devices, you can be sure that we understand the real issues and have been working with the most advanced technologies.

We work very closely with our customers, from the design stage right through to production. It's not unusual for us to liaise with our customers on a daily basis, working with them to address such issues as design revisions, components sourcing, production numbers and shipping details.

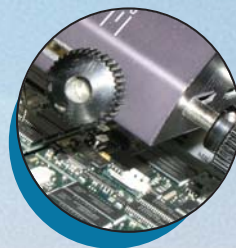

You'll find that Barric is especially structured to ensure that you'll have access to the engineers managing your project and to ensure that you'll be kept fully informed at all stages. Once we take on a project, we see ourselves as a part of your organisation.

If you wish to put us to the test, feel free to contact us and speak with one of our engineers. We'll be pleased to discuss your requirements and the facilities and services that we can offer.

Whether it's high density, small footprint 8, 16, or 32 bit microprocessor technology, or large scale analogue power electronics, you can be sure that Barric has the expertise to manufacture your product to the highest standard.

- Reference Design Boards for a Leading Silicon Developer
- Telematic systems for vehicle tracking (complete manufacture)
- Broadcast Audio Equipment
- Television Editing Systems
- Hard Disk Storage Technology
- Print Machine Calibration Technology (complete manufacture)
- Automotive Steering Control Systems

Barric

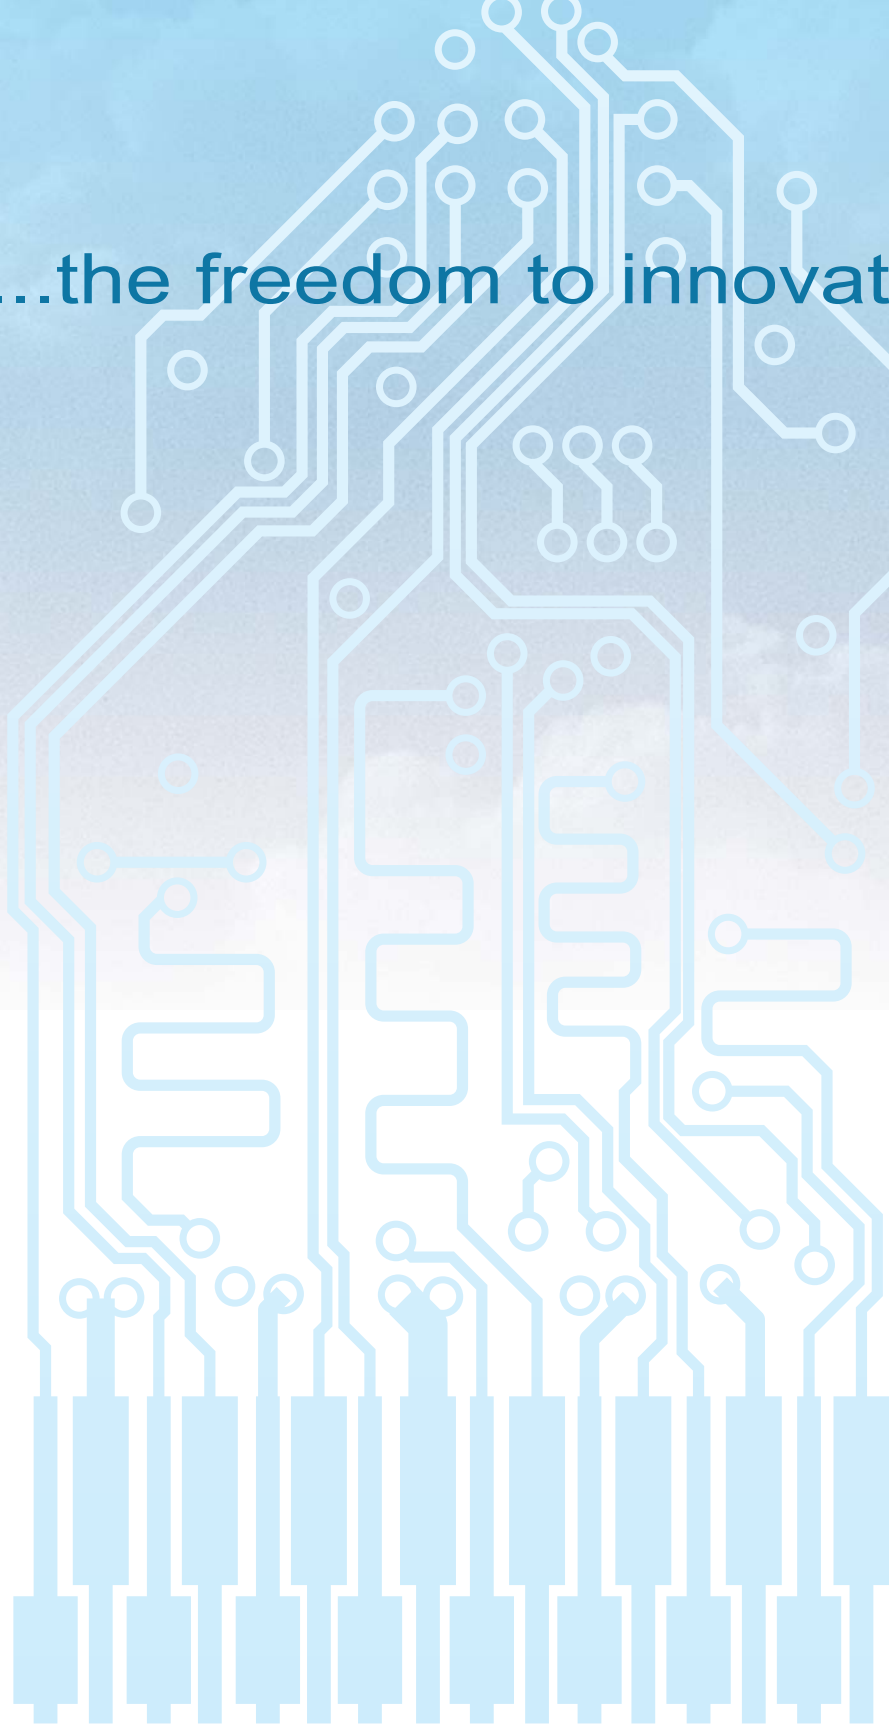

Vinces Road, Diss
Norfolk IP22 4WY England
