

# EcoDist Pro®

## The perfect entry level model

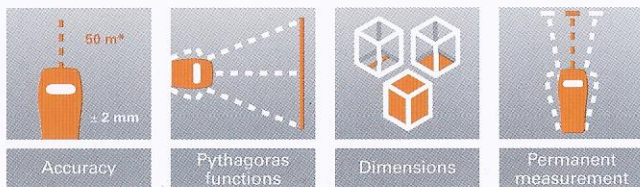

With professional features. Compact and ergonomically designed. Shortcut keys for area and volume calculation, continuous function for stake-out and indirect height measurement (Pythagoras function).

The new EcoDist Pro® is the successor to the highly-acclaimed EcoDist Plus®.

This new and improved version provides quick, reliable and precise measurements with an extended range up to 50 meters\*.

It's small, light and easy to use, the perfect measuring device for the entry-level user with professional expectations.

\* with target plate, without target plate range typ. 40 m

Tools not Toys.

### THE MEASURING FUNCTIONS

#### Minimum / maximum

Measure at right angles to a wall / measure room diagonals

#### Permanent measurement

Continuous measurement of distance (tracking function)

#### Plus / minus

Add or subtract measured values

#### Area / volumes

Menu driven measurement of area and volumes

#### Pythagoras functions

Indirect measurement of horizontal and vertical distances

#### Measurement reference front / rear

Change the measurement reference point

TECHNICAL DATA		SUPPLIED WITH
Accuracy	± 2,0 mm	· Holster · Batteries
Distance	typ. 40 m	
with target plate	50 m	
Laser class	2	
Protection	IP 40	
Dimensions	118 x 50 x 26 mm	
Weight	110 g	

The EcoDist Pro® complies with DIN ISO 16331-1, the new global standard used to compare the performance of laser distance meters. It guarantees the accuracy and distance under normal working conditions.
