Wall or bench mounted

Hand Operated

Easy to use action

Hand Sack Sealer

With this new addition to our range we expect our customers to find a quick and simple solution to sealing problems that previously have caused difficulty or required significantly more expensive machines. The machines are manufactured with reliability and flexibility in mind, always ensuring Hulme Martins' renowned quality is maintained.

These sealers have been designed and introduced to the Hulme Martin range due to an increasing demand of simple flexible sealers needed to seal bags in the vertical position. The machines can be wall mounted with simple key hole slots, which allow easy storage when not in use, or bench mounted if required.

This sealer is used in:

- ❖ Garden Centres
- ❖ Aquarium and Pond suppliers
- ❖ DIY Stores
- ❖ Supermarkets
- ❖ Bakeries
- ❖ Pet Shops

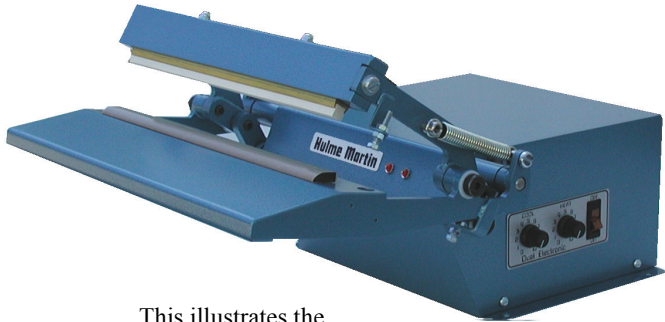

This sealer is used for:

- ❖ Pond plants
- ❖ Bird nuts and seeds
- ❖ Fish
- ❖ Loose fill items
- ❖ Fasteners and fixings
- ❖ Liquids

***When dependability
is paramount***

-it's Hulme Martin

The special sealing action on these machines allows the operator to have complete control handling the product. Once the bag is ready to be sealed the operator simply places the top of the bag between the jaws and pushes on the back plate. This action closes the jaws and initiates the seal.

This illustrates the horizontal operation

The seal is produced in seconds and provides a watertight high integrity closure to the bag, which provides a professional finish to the packaged product and a safe way to transport it home. It enhances the security of the contents, as it becomes evident if the bag has been opened and the product tampered with.

These machines are designed to pack items that previously have proved difficult on conventional machines. Due to the sealing action, design and low voltage elements this enables this machine to seal bags of liquids safely.

This machine can be used either wall or bench mounted by simply switching the linkage giving the machine 2 modes of operation. The unique linkage has been designed to give the operator the easiest sealing action with both hands free to hold the bag. This makes the packing of loose fill or liquid items quick and easy.

The size of the machine is detailed below.

Model		HM3550
Seal length		300mm
Footprint		376x196
Weight		10.5Kg
Power		320W
Price		£475.00

An aquarium plant is safely packed with water around the roots to prolong its life, enhance its appearance, and allow your customer to transport it home safely. This machine is in the vertical seal position.

Hulme Martin also supplies

- ◆ Hand Operated Sealers
- ◆ Bench Sealers
- ◆ Semi-automatic sealers
- ◆ Vacuum sealers
- ◆ Shrink Chambers
- ◆ Sack Sealers
- ◆ Stainless steel options
- ◆ Bespoke Solutions
