Electric Bike Cable Assemblies

The first batch of custom made, custom designed composite cables for the all new Italian designed Electric Bicycle are now rolling off the production line. With anticipated sales in Europe of 5000 Bikes per month . This project has taken only 3 months to go from concept to production Utilising hard wearing UV resistant material for the outer jacket , but still ensuring as small and flexible a cable as possible.

LED Lighting Solutions

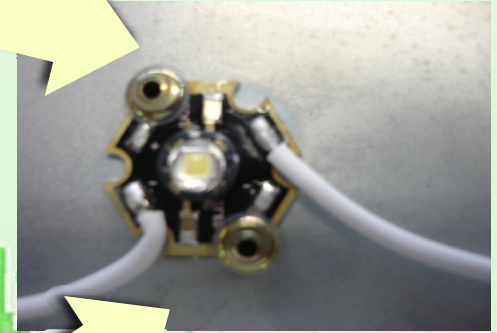

In conjunction with some of the biggest companies involved in the Advertising market place, Swan EMS have designed and produced a fluorescent tube replacement specifically for Billboard Signs.

With a huge interest in reducing carbon footprint and electricity Consumption, we have several Prime sites who are currently trialing These newly developed LED strips. This product is in billboard signs in Heathrow Airport, Southampton Shopping centre and several motorway locations

A minimum of 4 years Maintenance free Life span !

Just as bright as Fluorescent Tubes !

"Innovation and the ability to adapt To the ever changing economic Climate has brought Swan EMS

Very low Power consumption Third of the cost In Electricity !

To the forefront of the Cable Harness Manufacturing Industry"

*Simon Williams
(Sales Director)*
