High chair Småtroll grows with the child's development and can be adjusted without tools. The chair's construction means that depth adjustment of the seat and footrest automatically adapts when adjusting height. The distance between the cross bar and seat is constant and follows the seat up and down.

Småtroll complies with international safety and stability standards.

Carpenter - mobile studio table

The table has, as standard, a varnished solid oak table top, as an option is available a high pressure laminated table top. Under this are 6 wood drawers and 6 open bays on each long side, for storage of work, tools and materials. Shell and drawers are of clear varnished birch veneer. Height 900 mm. Table top overhang makes it possible to sit on high chairs around the table. A flexible work space suitable for many environments.

Softline - Slimline

is a flexible shelf system with many design and function options. The system is available in six heights, two width modules and five end piece depths. The shelves are subdivided into start and expansion sections. The standard version has veneered end pieces in natural beech, with metal shelves and metal frames in off-white. Softline has a rounded edge and Slimline a straight front edge.

Birch and other colours available as option.

Frame colours

Tranås Skolmöbler surface treats all steel tubing furniture frames with epoxy powder. The powder is electrostatically applied and is hardened in an oven at a temperature of 200°. The method gives an extremely wear resistant surface.
