Elixa 30^L Next Generation:

- **Safety first:** functionality and design excellence to operate safely
- **Next generation electronics:** advanced technology for maximum durability and reliability
- **Reduced power consumption:** more efficiency, less costs, more green!

Elixa 30^L automatic stretch packager with Elixa® technology of the last generation, particularly suitable for medium to large-sized products packaging, differs from previous series by achieving higher targets in terms of **safety, technology and economy**. The additional photocells added at the feed entrance, the next-generation microswitches designed to prevent tampering, the innovative design of the discharge which prevents any access to the moving parts, the gas springs for the opening of the upper casing ensures users to operate in **complete safety**.

The **next generation electronics** featured in *Elixa 30^L* ensures maximum durability and reliability of the machine even in problematic environments.

Thanks to the sealing belt on the outlet tray equipped with smart stand-by mode and to the new outfeed, *Elixa 30^L* can reduce energy consumption and heat dissipation **saving up to 50%** compared to previous series (*Elixa Max*).

Main characteristics

Safety first

Each part of *Elixa 30^L* was designed in compliance with the strictest **safety regulations**: the machine has no sharp edges and the elegant rounded aluminium sides minimise the consequences of accidental impact.

Large sizes packaging

Elixa 30^L can also **pack family format trays** (max size 400 x 260 x 200 mm).

Speed

Elixa 30^L reaches a speed of **30 ppm**.

Automatic reading

Elixa 30^L does not require any operator intervention in cases of **format change**, which makes it particularly fast and suitable to meet production deadlines of **packaging centres and retail points of medium and large size**.

Super-stretch technology

Thanks to the Elixa® technology, *Elixa 30^L* uses **one width films (330 mm)** regardless of the size of the product, allowing a **saving of film up to 30%** compared to traditional packaging machines.

Plug 'n' Pack mode

Elixa 30^L is powered by **230 V** without any need for compressed air.

Compactness

With a footprint lower than **2 m²**, *Elixa 30^L* manages to fit into any work environment, optimizing the available space.

Maximum integration

Elixa 30^L can be integrated optimally with the major **automatic weigh-price labelling systems** available on the market, keeping volume and footprint virtually unchanged.

Versatility

With a wide choice of **options**, *Elixa 30^L* can be easily customized according to customer **requirements**.

Simplicity

Characterized by an extremely intuitive and easy to remember operation, *Elixa 30^L* simplifies the turnover of employees. It only takes **30"** to change the reel: an error-proof, simple operation!

Proper professional packaging

The synergy between the new Elixa® series machines and food-grade films produced by *Gruppo Fabbri* allows the realities operating in food packaging achieving maximum results with minimum investment. *Elixa 30^L* can use **neutral super-stretch film** or **continuously printed film** which seals on the lower part of the tray thanks to the efficiency of the sealing belt.

Energy saving

With a new advanced software *Elixa 30^L* is able to manage its own ignition timing in on/off mode, thus optimising consumption and offering energy savings of up to **50%** compared to the previous model (*Elixa Max*).

30 Maximum speed:
up to 30 packages a
minute.

120 Minimum tray
format: 120 x 100 x
10* (L x W x H mm).

400 Maximum tray
format: 400 x 260 x
200* (L x W x H mm).

330 Reel width:
330 mm (one width).

11 Optional features from
the list.

30 Reel change time 30".

250 Machine weight:
250 kg.

230 Supply voltage:
230 V mono-phase

*It is not possible to achieve the three maximum dimensions of the tray at the same time
