

The Best Dress
for Mushrooms

FILM FUNGUSTAR

EN

Fungustar is a double-layer stretch film specifically designed for the packaging of mushrooms. Its exclusive formulation enhances quality and preserves the natural freshness and colour of the product. It is a film that can be printed in 10 colours, permitting the customisation and enhancement of your product on the shelves of large-scale distribution channels. **Fungustar** adds to the range of double-layer stretch film produced and marketed globally by Gruppo Fabbri.

Main characteristics

Anti-fog breathability	Thanks to the reduced thickness and innovative formulation of the material, the breath-ability of Fungustar allows for better preservation of the packaged product.
Transparency and shine	The absence of condensation gives immediate visibility to the product, enhancing its quality and presentation.
Superior elasticity	Allows for the film to be maintained taut around the product and ensures tear resistance even with products of irregular shape and sharp corners. Thanks to the memory effect, the packages produced retain their optimal presentation for a long time, even after various handling.
Consistent thickness and qualitative characteristics	The characteristics of the production process of the double-layer film, guaranteed by production using fully automated lines, allow for the achievement of a regular thickness and constant production, ensuring extremely high performance to high-speed packaging lines.
The ideal combination is with automatic stretch machines produced by Gruppo Fabbri	Ideal use is with Gruppo Fabbri machines present in the store room of supermarkets and in all industrial lines of food industry processors. Possible use also with a wide range of packaging machines available on the market.
Wide range of solutions	The Fungustar film of Gruppo Fabbri has different formulations and thickness depending on the product it is to be used for.

Fungustar is approved for food contact according to existing European regulations.
