

TELLERMATE SECURITY RANGE

Maximise your profit

... keep it safe

Tellermate

Freeing manager time whilst reducing the risk of robbery and internal theft, Tellermate's range of high security PoS safes allow cash to be secured at the point-of-sale. High value notes can be deposited immediately in the counter safe throughout the day. Skims are faster and more convenient, or can even be eliminated altogether.

Mounted at the point-of-sale, counter safes provide an effective theft deterrent and a strong, secure place to store payment media. Tellermate's Security range is an essential part of any retail loss prevention strategy, generating revenue opportunity by allowing staff to focus on customer sales rather than internal process.

TSR PoS Safes

- Protect cash revenues and minimises the amount stored in till drawers.
- Allow frequent cash lifts and storage of cash and other payment media during peak trading times until store managers are able to safely remove cash from the point-of-sale at the end of day or during quiet times.
- Can be mounted securely out of sight under the cash desk.
- Prevent internal and external cash theft.
- Reduce snatch and grab robbery risk, lessening danger to employees.
- Due to the design of the PoS safe, it is fish proof, preventing individuals from pulling out deposited banknotes.
- Optimises safe cash handling, enabling store managers to transport cash securely from the point-of-sale through to the cash office at a safe and convenient time.
- All safes have a high capacity, typically supporting a full days trading.

TSR 100 PoS Safe

Tellermate's PoS Safe is a straightforward drop safe containing a metal cassette to store payment media.

- Constructed from steel, Tellermate's PoS Safe is fully mechanical and robust, with no plastic working parts.
- Providing enhanced security, Tellermate's PoS safe comes with two separate keys – one to remove the safe from the point-of-sale, and one to open the note storage cassette.
- Fast, simple, jam free operation

TSR 110 Advanced PoS Safe

Tellermate's Advanced PoS safe is a robust drop safe containing a lightweight cassette to store payment media.

- The advanced PoS Safe is fully welded from heavy steel.
- The inner reinforced fabric pouch is convenient and lightweight, with a carry handle, allowing easy portability to the back office for counting. Spare pouches make shift changes faster and more convenient.
- Inner pouch also has a labelling facility so that contents may be easily reconciled against z/x read.
- Advanced PoS Safe is opened with conventional Assa Abloy security keys. Simple to use whilst being strong and secure.
- Advanced PoS Safe also comes complete with a heavy duty mounting kit.
- Tellermate's advanced PoS Safe can be top or bottom fixed, depending on store point-of-sale set up.

TSR 150 Electronic PoS Safe

Tellermate's Electronic PoS Safe is a robust drop safe containing a lightweight cassette to store payment media. With the added benefit of pin number entry and configurable time delay, Tellermate's Electronic PoS Safe gives optimum security for storing cash revenues during opening hours.

- Time delayed entry minimises vulnerability to theft and optimises staff security. Time delay gives you the same security & deterrent effect that high street banks now enjoy.
- The Electronic PoS Safe is fully welded from heavy steel.
- The inner reinforced fabric pouch is convenient and lightweight, with a carry handle, allowing easy portability to the back office for counting. Spare pouches make shift changes faster and more convenient.
- Inner pouch also has a labelling facility so that contents may be easily reconciled against z/x read.
- Electronic key pad with PIN number entry provides highest security.
- Time delay can be adjusted from 0 to 300 seconds.
- Electronic PoS Safe comes with time delay warning sticker. This provides an effective deterrent against opportunist thieves.
- Operator and supervisor codes can be changed quickly and efficiently, as often as necessary. Operators simply enter their own PIN for simplicity, accountability and security. This optimises management control and cash safety.
- Electronic PoS Safe also comes complete with a heavy duty mounting kit.
- Tellermate's Electronic PoS Safe can be top or bottom fixed, depending on store point-of-sale set up.

TSR Change Safes

Tellermate's High Security Change Safes allow you to securely store change for coin buy at the point-of-sale, eliminating the necessity to go to the back office safe for change during busy trading hours. This time saving alone, especially at peak trading times, more than repays the small investment. Change is "bought" at the point-of-sale when and where it is needed, rather than wasting time in the back office.

- Free up store manager time by eliminating time consuming and unsafe visits to the back office for change buy.
- High Security Change Safe is fully welded from heavy steel.
- High Security Change Safe can be mounted securely out of sight, under the cash desk.
- Tellermate's High Security Change Safe can be top or bottom fixed, depending on store point-of-sale set up.
- Contain fully fitted lightweight change cassettes with door for storing coins and notes, complete with carry handle maximising portability.
- Fully fitted change cassette also has a labelling facility so that contents may be easily reconciled.

TSR 210 Change Safe

- High Security Change safe is opened with conventional Assa Abloy security keys. Simple to use whilst being strong and secure.

TSR 250 Electronic Change Safe

- Electronic key pad with PIN number entry provides highest security.
- Optional time delayed entry minimises vulnerability to theft and optimises staff security.
- Time delay can be adjusted from 0 to 300 seconds.
- Electronic Change Safe comes with time delay warning sticker. This provides an effective deterrent against opportunist thieves.
- Operator code can be changed quickly and efficiently, as often as necessary. This optimises management control. Shift manager chooses his own PIN for accountability, convenience and security.

Improve cash handling further using Tellermate's cash management solutions. Automated cash counting improves accuracy and security while freeing valuable management time.
