COMPONENTES DE CILINDRO

CARATTERISTICHE TECNICHE

Materiale

I cilindri telescopici sono costruiti con tubo laminato senza saldatura grosso spessore:
 E470 EN10297-1 Rm=650 N/mm² Rs=470 N/mm²
 C45 EN10083 Rm=630 N/mm² Rs=370 N/mm²
 fondello e sedi sferiche in acciaio stampato:
 S355J2G3 UNI 10025 Rm=510 N/mm².
 S355JR UNI 10025 Rm=510 N/mm².

Sfilamenti

Il trattamento di nitrurazione salina propriamente denominato "processo TENIFER TF1 Degussa" adottato dalla **Di Natale - Bertelli S.p.A.** consente agli sfilamenti di lavorare acciaio su acciaio, quindi sono privi di bronzine o anelli di guida, potendo contare su superfici di scorrimento fortemente resistenti all'usura ed al grippaggio, ottenendo una durezza superficiale elevata pari a HV-5/12 = 430-570. Gli sfilamenti, grazie a quanto sopra esposto, risultano privi delle relative sedi per bronzine ed anelli e questo consente loro una resistenza meccanica nelle estremità notevolmente più elevata dello standard in commercio e di essere esenti da problemi di slabramento.

Inoltre, consente una guida maggiore in lunghezza e la possibilità di far lavorare il cilindro a fine corsa alla massima pressione.

Superfici

Le superfici esterne delle sfilate subiscono una prima fase di rettifica e successivamente una lappatura, ottenendo un grado di rugosità pari a 0,07÷0,25 µm, controllato ad ogni ciclo mediante rugosimetro.

Guarnizioni

Le guarnizioni e i raschiatori sono prodotte esclusivamente a disegno Di Natale - Bertelli S.p.A.:
 Materiale: Poliuretano puro (Du Pont)
 Pressione max. 400 Kg/cm² (395 Bar)
 Temperatura: da -40 a 110 C°.
 Velocità: 0,5 m/s
 Olio: olii idraulici e lubrificanti a base minerale.

Collaudo

Tutti i cilindri subiscono un collaudo funzionale finale con pressione oleodinamica pari a 240 Kg/cm² (235 bar). I cilindri con diametro 240 mm. e oltre sono collaudati a 205 Kg/cm² (200 bar).

Norme

Tutti i prodotti sono studiati e progettati secondo le disposizioni internazionali UNI considerando un fattore di sicurezza Ks = 1,5.

TECHNICAL SPECIFICATIONS

Material

The telescopic cylinders are made with seamless rolled tube big thickness:
 E470 EN10297-1 Rm=650 N/mm² Rs=470 N/mm²
 C45 EN10083 Rm=630 N/mm² Rs=370 N/mm²
 base and ball socket joints in pressed steel:
 S355J2G3 UNI 10025 Rm=510 N/mm².
 S355JR UNI 10025 Rm=510 N/mm².

Stages

The saline nitriding treatment, correctly known as the "TENIFER TF1 Degussa process", used by **Di Natale - Bertelli S.p.A** means that the stages can be free from bushings or guide rings as they have sliding surfaces which are highly resistant to wear and seizing, principally as a result of high surface hardness of HV-5/12=430-570. The prime advantage of these stages is that due to the characteristics described above, they are free from the related ring and bushing seats, giving them mechanical strength at the extremities which far exceeds the standard available on the market and leaving them free from problems with burring.

This also allows a longer guide and enables the cylinder to be operated at maximum pressure at the end of its stroke.

Surfaces

The outer surfaces of the stages are subjected to an initial grinding phase followed by honing, giving them a degree of roughness of 0,07÷0,25 µm, tested by a surface roughness.

Seals

The specially shaped seals and scrapers are project by **Di Natale - Bertelli S.p.A.:**
 Material : polyurethane: (Du Pont)
 Maximum pressure 400 Kg/cm² (395 Bar)
 Temperature from -40 to +110 C.
 Maximum piston speed 0.5 m/s
 Oil : Hydraulic oils and lubricants mineral based.

Testing

All cylinders are subjected to final operational testing at hydraulic pressures of 240 Kg/cm² (235 bar). Cylinders from diameter 240 are tested at 205 Kg/cm² (200 bar).

Regulations

All the products are projected by international regulations UNI considered a safety factor Ks = 1,5.

PRECAUZIONI DA ADOTTARE PER UN CORRETTO MONTAGGIO

- Durante il montaggio del cilindro, proteggere gli sfilamenti da gocce di saldatura, da verniciatura e da altri corpi estranei.
- Prestare la massima attenzione durante la fase di verniciatura proteggendo con nastro adesivo od altro la parte superiore delle sfilate evitando che la pittura penetri all'interno delle sfilate stesse danneggiando le guarnizioni.
- Sul circuito oleodinamico applicare una valvola di massima pressione, tarata a 200 Bar.
- Eseguire la pulizia nel serbatoio e nelle tubazioni, applicare dei filtri adeguati, e sfiatare l'impianto prima dell'uso.
- In posizione di riposo il cassone non deve mai appoggiare sul cilindro. Lasciare sempre 20 mm. circa di gioco.
- Controllare che durante il funzionamento il cilindro non sia ostacolato da altri componenti del cassone, e verificare l'angolazione della sede sferica.
- Evitare il lavaggio del cilindro con idropulitrici ad alta pressione.
- Usare olii idraulici e lubrificanti a **base minerale** con viscosità da 10 a 46 cSt a 50°. Per unica viscosità consigliamo un base minerale alto indice ISO32, Mobil-Shell-Valvoline-Bechem.
- Densità olio consigliata:
 - ISO 22 per ambienti con basse temperature
 - ISO 32 per ambienti con medie temperature
 - ISO 46 per ambienti con calde temperature
- Si consiglia l'impiego di supporti con ingassatore e culle, tutti accessori originali marcati Di Natale – Bertelli.
- Richiedere alla Di Natale – Bertelli il manuale per gli installatori ed il manuale utente.

NORME DI SICUREZZA DA RISPETTARE

- Non superare la pressione max. di esercizio
- Caricare entro i limiti massimi di portata
- Distribuire il carico in maniera uniforme
- Ribaltare solo su terreni piani
- Ribaltare sempre a veicolo fermo
- Ribaltare sempre in zone libere da persone ed ostacoli
- In caso di salita irregolare del cassone farlo scendere immediatamente e verificare eventuali cause
- Non muovere il veicolo per aiutare lo scarico dei materiali
- Ripartire solamente con il cassone a riposo
- Controllare sempre la pressione dei pneumatici
- Mai operare sotto un cassone ribaltabile se non in luoghi attrezzati e rispettando le norme di sicurezza
- Non manomettere la valvola di massima pressione o la regolazione dei dispositivi di fine corsa
- Consigliamo di utilizzare il raccordo con la valvola paracadute che permette il bloccaggio del cassone ribaltabile in caso di danneggiamento o rottura della tubazione dell'olio, tali nipples sono riportati nelle tabelle TAV. N. 05T-06T-07T-08T-12T
- La Di Natale – Bertelli stabilisce che i propri prodotti non vengano impiegati fino a quando il macchinario di cui devono far parte non sia stato dichiarato conforme alla Direttiva Macchine CE 2006/42 e successive modifiche e conseguentemente contraddistinto dal marchio CE

PRECAUTIONS TO BE TAKEN FOR CORRECT MOUNTING

- Protect the stages from welding spatter, splashes of paint and other foreign bodies during mounting.
- Always protect the upper part of the stages by means of a masking tape or others when painting to avoid that paint gets into the stages and damages the seals.
- Fit a relief valve to the hydraulic system, set to 200 Bars.
- Clean inside the reservoirs and pipelines and fit suitable filters, and leak of air the circuit before use.
- When at rest the body must not be supported by the closed cylinder, should be at least 20 mm.
- Check that during the tipping the cylinder doesn't hinder to the body components, and check the angle of cup ball.
- Do not wash the cylinders with high pressure jet cleaner.
- Use **mineral hydraulic oils** and lubricants with a viscosity of 10 to 46 cSt at 50°C. For only one viscosity we suggest a mineral hydraulic oil high index ISO32, Mobil-Shell-Valvoline-Bechem.
- Recommended density oil:
 - ISO 22 for cold climate temperatures
 - ISO 32 for average climate temperatures
 - ISO 46 for warm climate temperatures
- We recommended the use of brackets with grease nipple and cradles, all Di Natale – Bertelli originals accessories.
- Request to Di Natale – Bertelli manual for installers and user manual.

IMPORTANT SAFETY INSTRUCTIONS

- Never exceed the maximum working pressure
- Always ensure the load is within the maximum payload
- Always ensure that the load is evenly distributed
- Tip on firm level ground
- The vehicle should be stationary when tipping
- Before tipping ensure working area is clear of people and obstructions
- If the body does not tip smoothly immediately lower and check cause
- Do not shunt the vehicle to loosen sticking loads
- If the load sticks lower the body before resuming tipping operation
- Always verify that tyre pressure is correct
- Never work under a body unless it is correctly propped and in a safe environment
- Never tamper with pressure relief valve or end of stroke valve for cylinder
- We recommend to use the nipple with the pressure check valve stopping the dump body stroke in case of damage or breakage of the oil piping. These nipples are specified in our tables TAV. N. 05T-06T-07T-09T-12T
- Di Natale – Bertelli company informs that our products cannot be used until the machine they shall be fitted in is declared to be in compliance with the Machine Guideline CEE 2006/42 and further amendments and is provided with CE mark approval.

ATTENZIONE

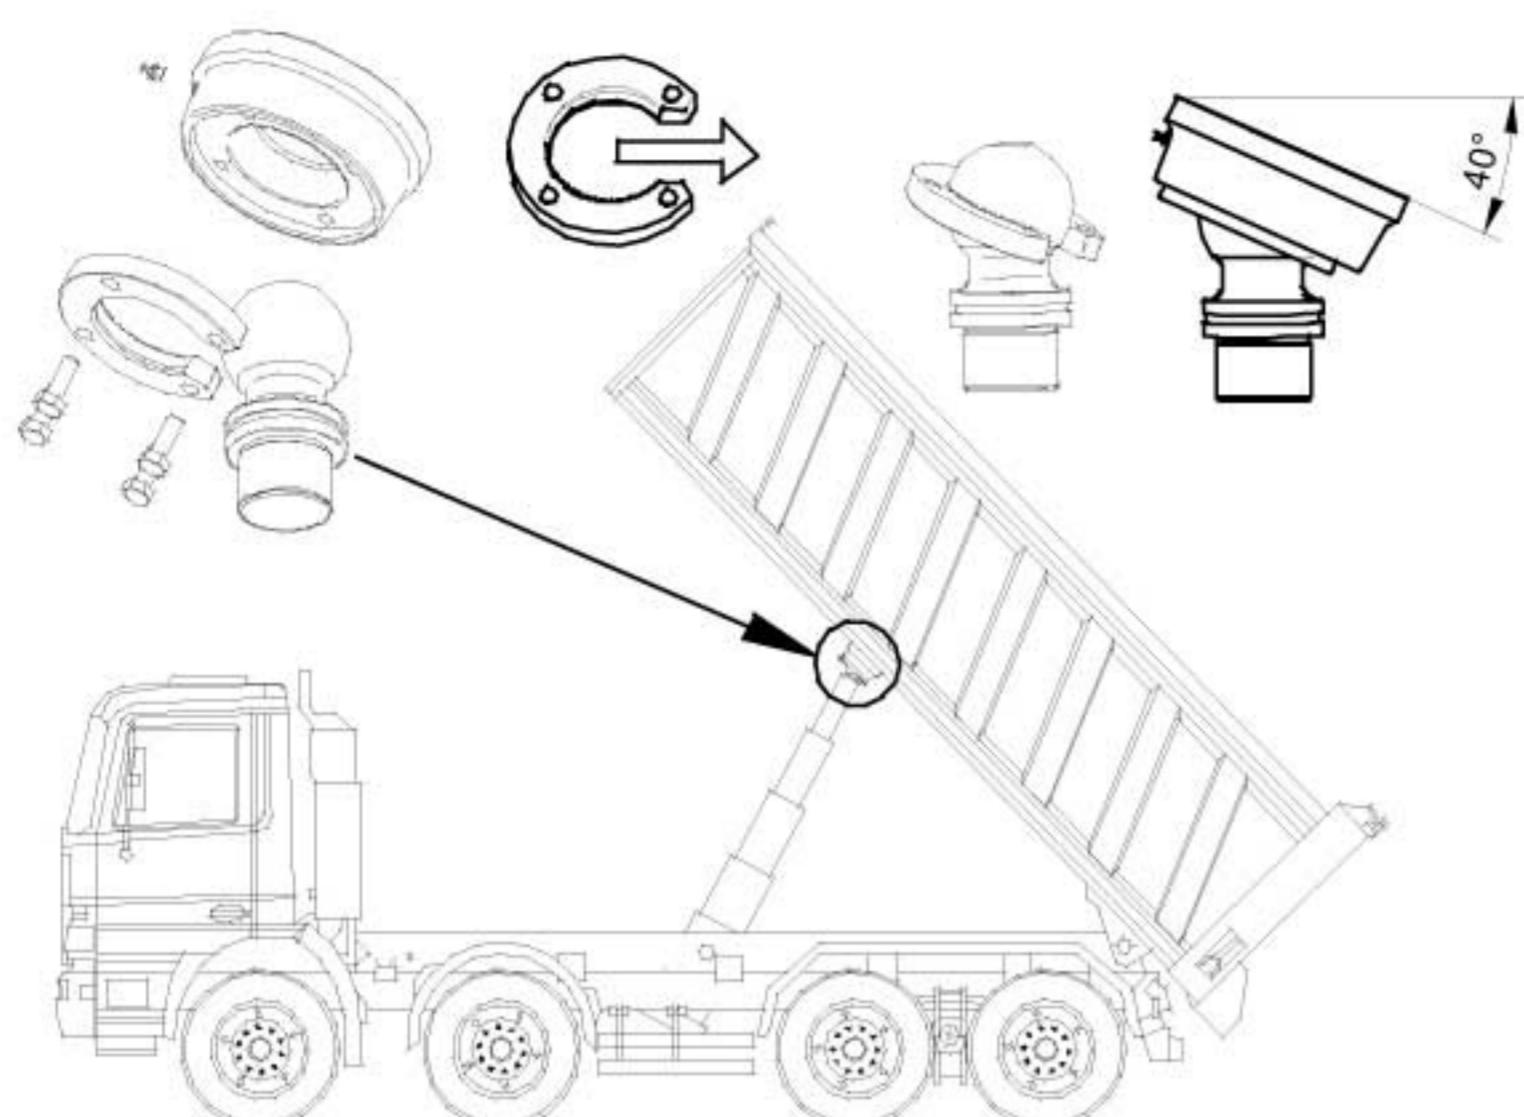

Il mancato rispetto di queste norme fa automaticamente decadere ogni garanzia sul cilindro.

ATTENTION

Not observance of the above instructions will automatically void any warranty on the cylinder.

STEERFORTH

HYDRAULIC TIPPING CYLINDERS

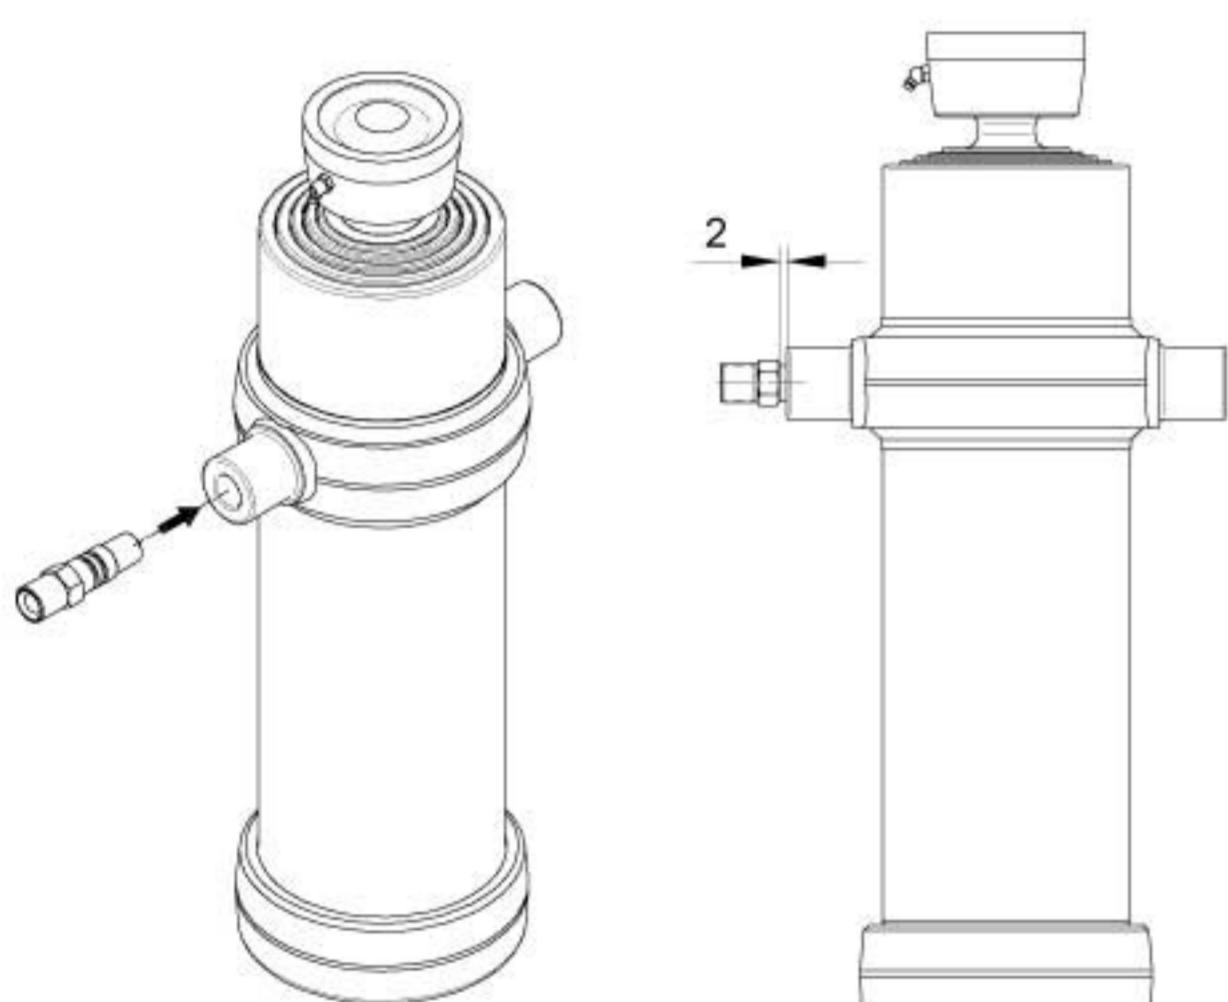

Per consentire una inclinazione fino a 40° le sfere Ø73 e Ø92 devono essere saldate con il taglio dell'anello verso la parte posteriore. Per un sicuro assemblaggio è consigliabile l'impiego di **Loctite 243** sulle viti fissaggio.

In order to enable a tilting up to 40° the ring slot of the balls Ø73 and Ø92 to be welded must be on the back side. For safe assemblage we recommended the use of **Loctite 243** on the fixing screws.

Pour obtenir un angle de bennage de 40°, les rotules Ø73 et Ø92 doivent être soudées avec l'ouverture de l'anneau orienté vers l'arrière de la benne. Pour le montage en sécurité, nous recommandons l'utilisation de **Loctite 243** sur les vis de serrage.

Um eine Neigung bis 40° zu ermöglichen, soll der Ringschnitt beim Schweißen der Kugel Ø73 und Ø92 nach hinten gerichtet werden. Für einen montage, empfehlen wir den einsatz von **Loctite 243** auf den feststellschrauben.

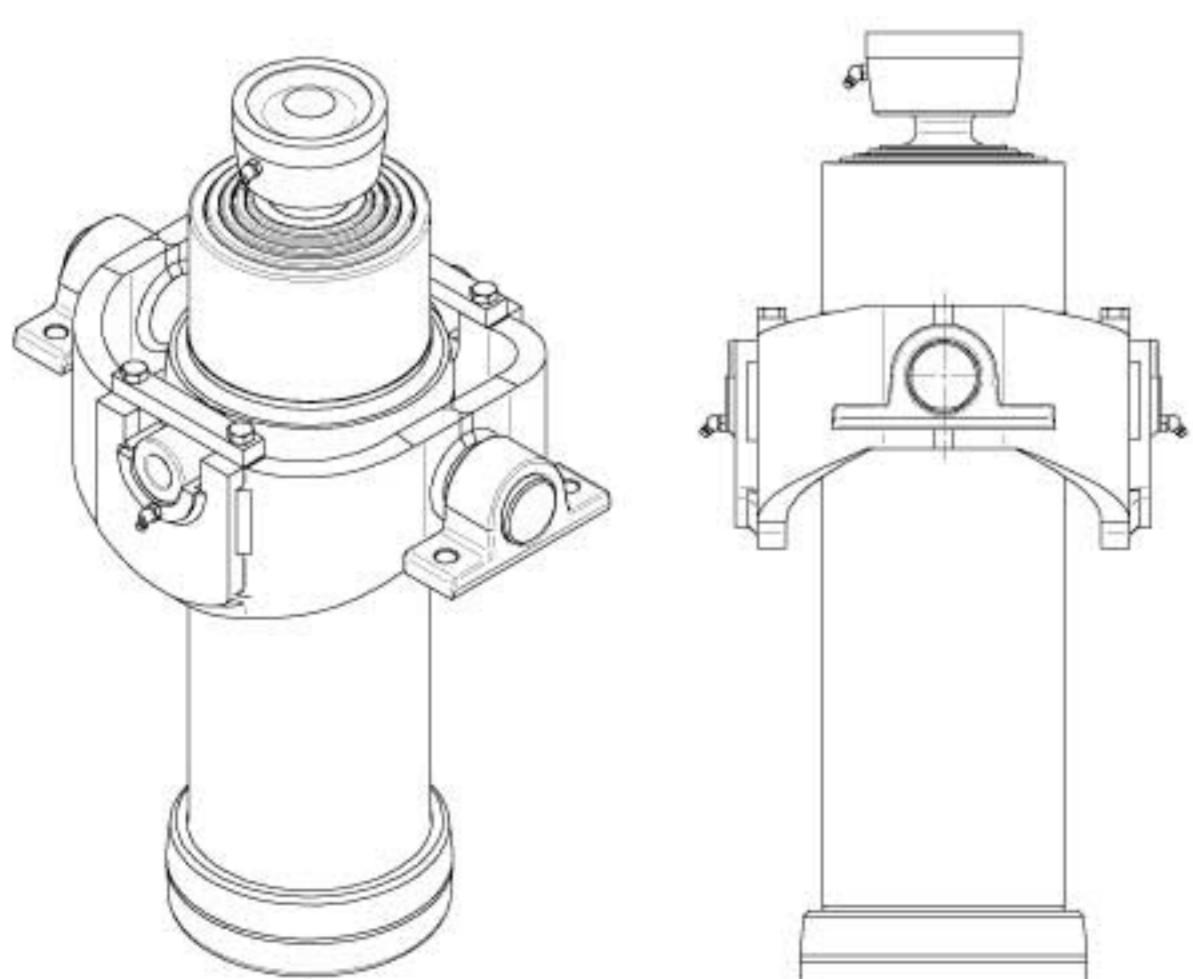

Inserire il perno nel mozzo, avvitare lasciando 2 mm. in modo tale da consentire la regolare rotazione del perno durante il ribaltamento.

Arrange the pin into the hub, then screw leaving 2 mm so the pin can easily rotate during tilting operations.

Introduire le raccord tournant dans le moyeu, visser en laissant 2 mm de sorte que le raccord puisse tourner régulièrement pendant le renversement.

Den Öleinlaufzapfen in die Nabe einführen, dann bis zu 2 mm einschrauben, um beim Kippvorgang eine störungsfreie Drehung vom Zapfen zu ermöglichen.

Si consiglia l'impiego di supporti con ingassatore e culle, tutti accessori originali marcati DNB.

We recommended the use of brackets with grease nipple and cradles, all DNB originals accessories.

Nous recommandons l'utilisation de paliers avec graisseur et les berceaux, tous originales accessoires DNB.

Wir empfehlen die Verwendung von Halterungen mit Schmiernippel und Kardanringe, nur DNB originale Zuböhre.

SCELTA DEL MARTINETTO

In base al carico da sollevare determinare la portata del martinetto R espressa in ton.: SCHEDA N° 1

In base all'angolo (ALFA) di inclinazione del cassone determinare la corsa C (mm): SCHEDA N° 2

Con R e C noti entrare nelle tabelle da n°..... a n°..... determinando il tipo di martinetto da ordinare.

Controllare il valore L1 (lunghezza martinetto chiuso)

- a: L1 < valore richiesto - scelta terminata
- b: L1 > valore richiesto - cambiare tabella con n° sfilate superiori finchè L1 < valore richiesto

SELECTING THE CYLINDER

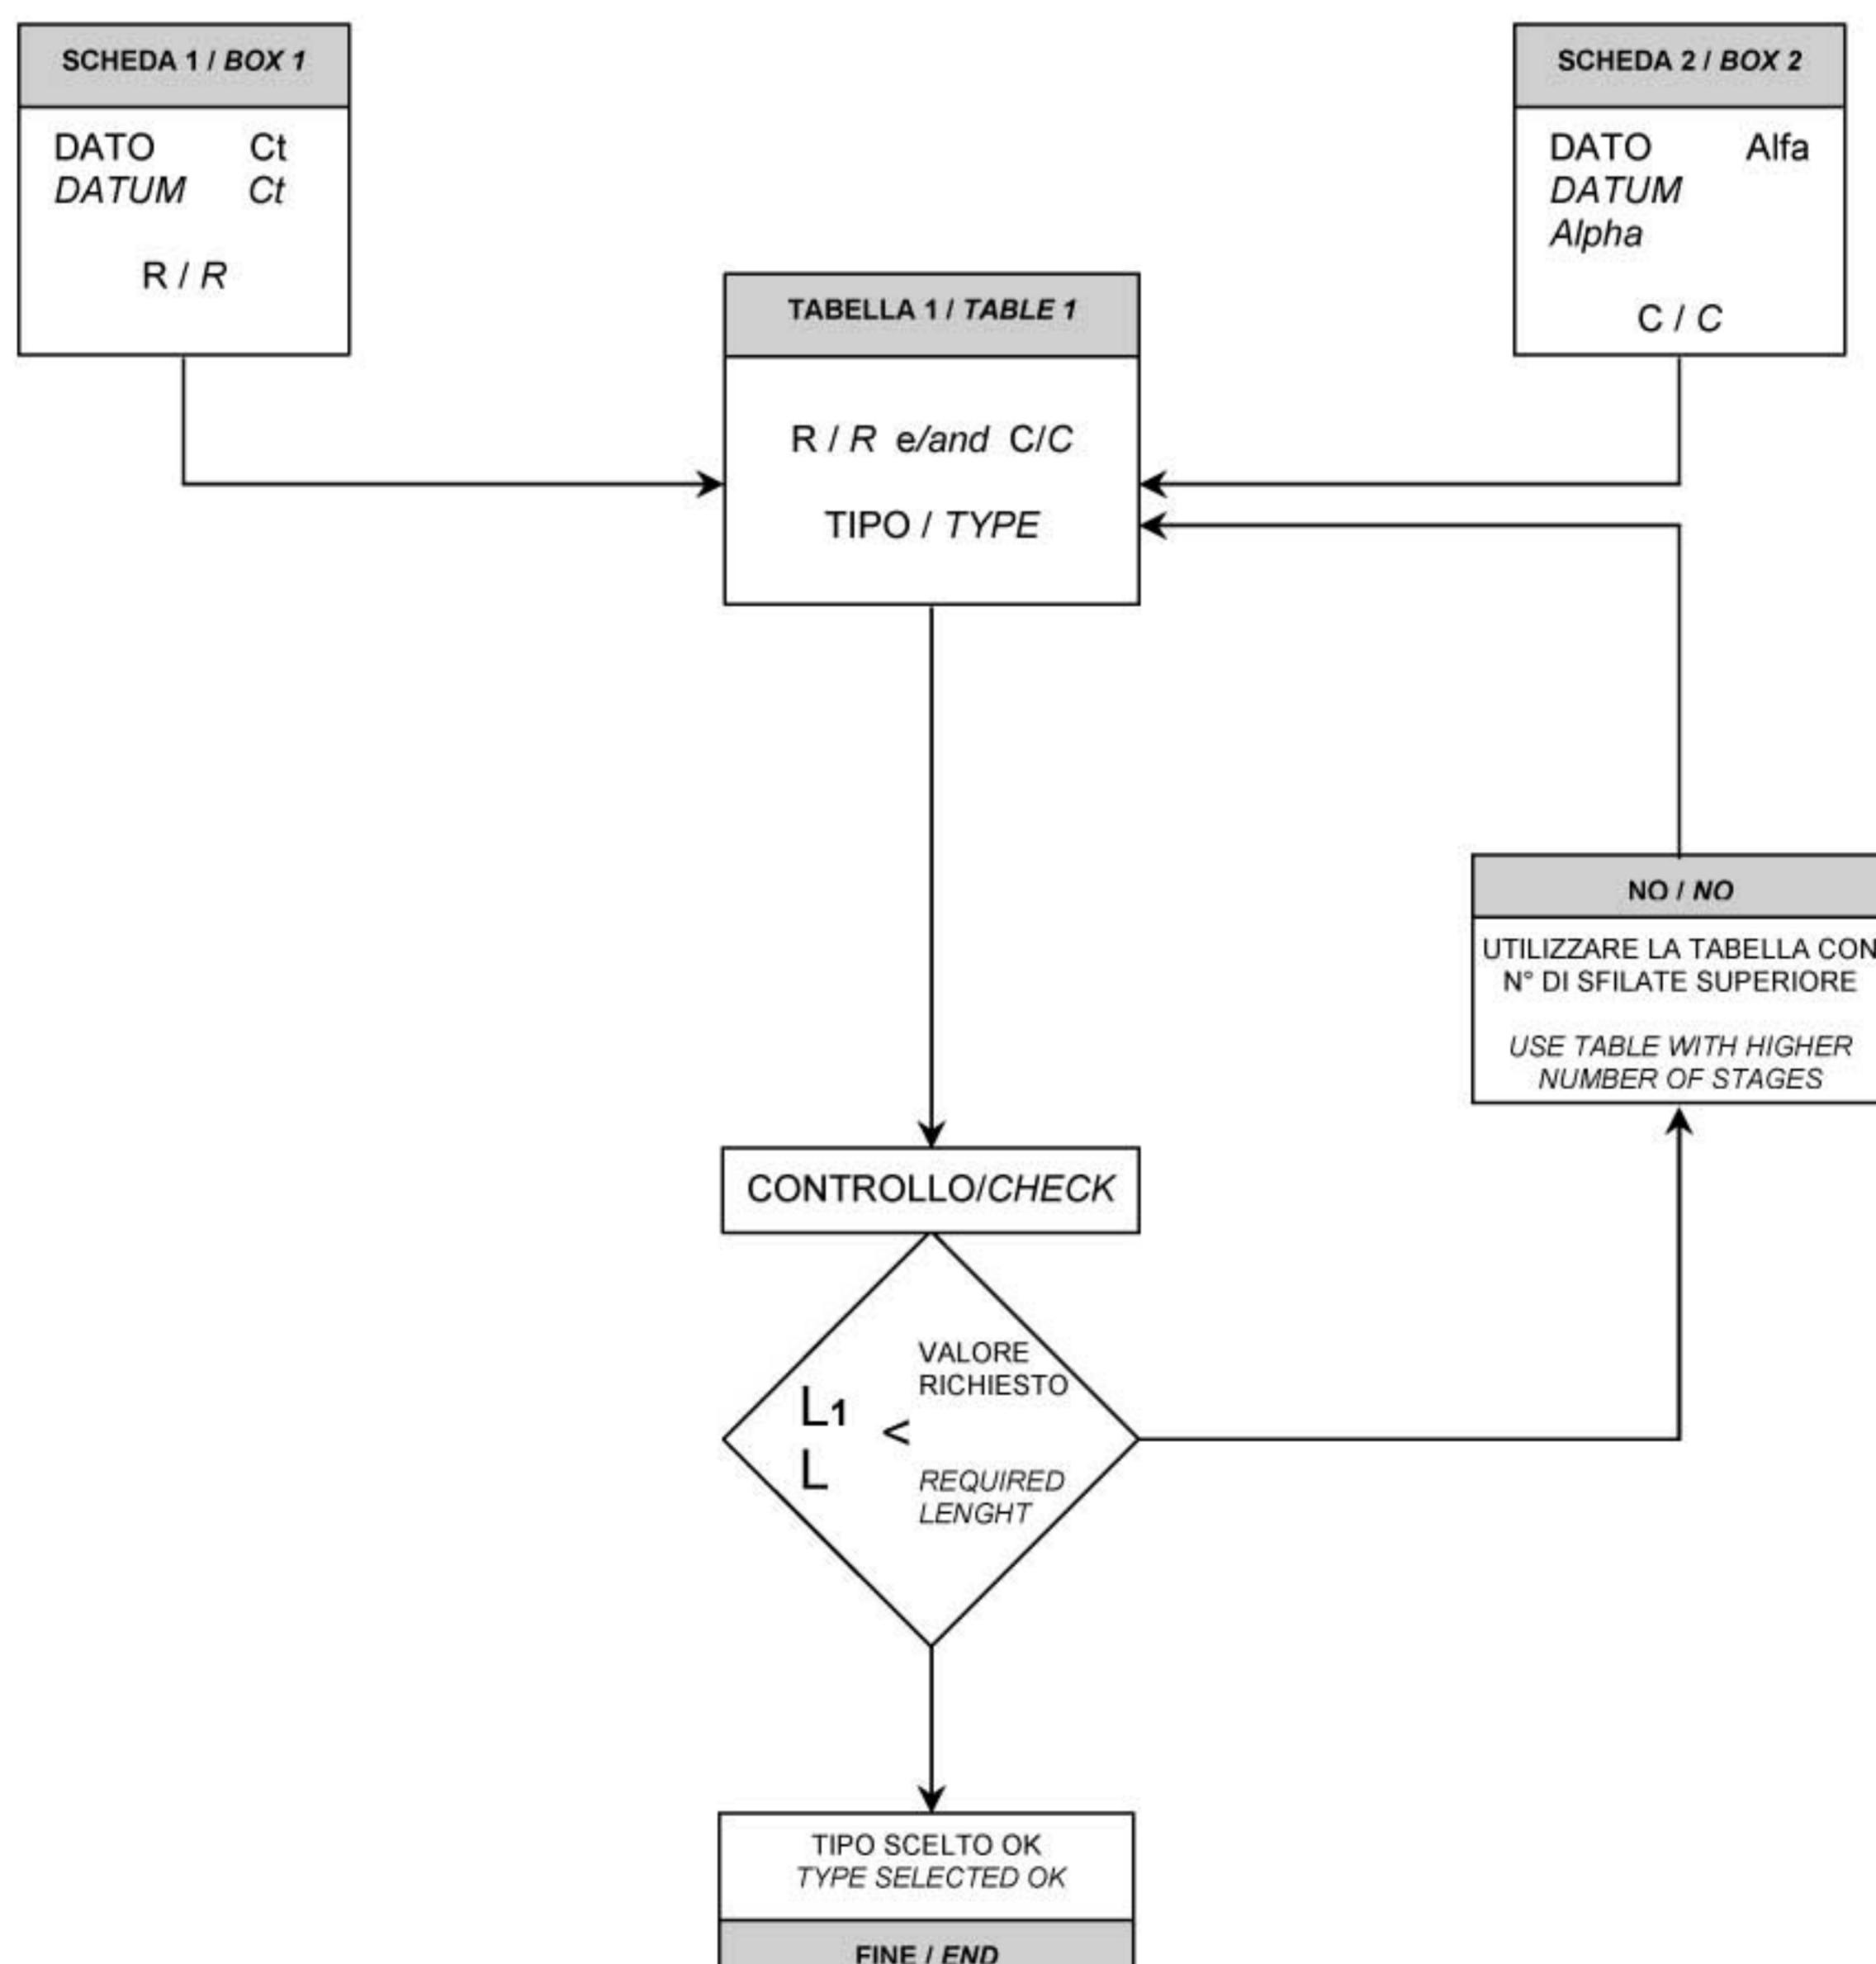

According to the load to be lifted determine the cylinder capacity R expressed in tons: BOX 1

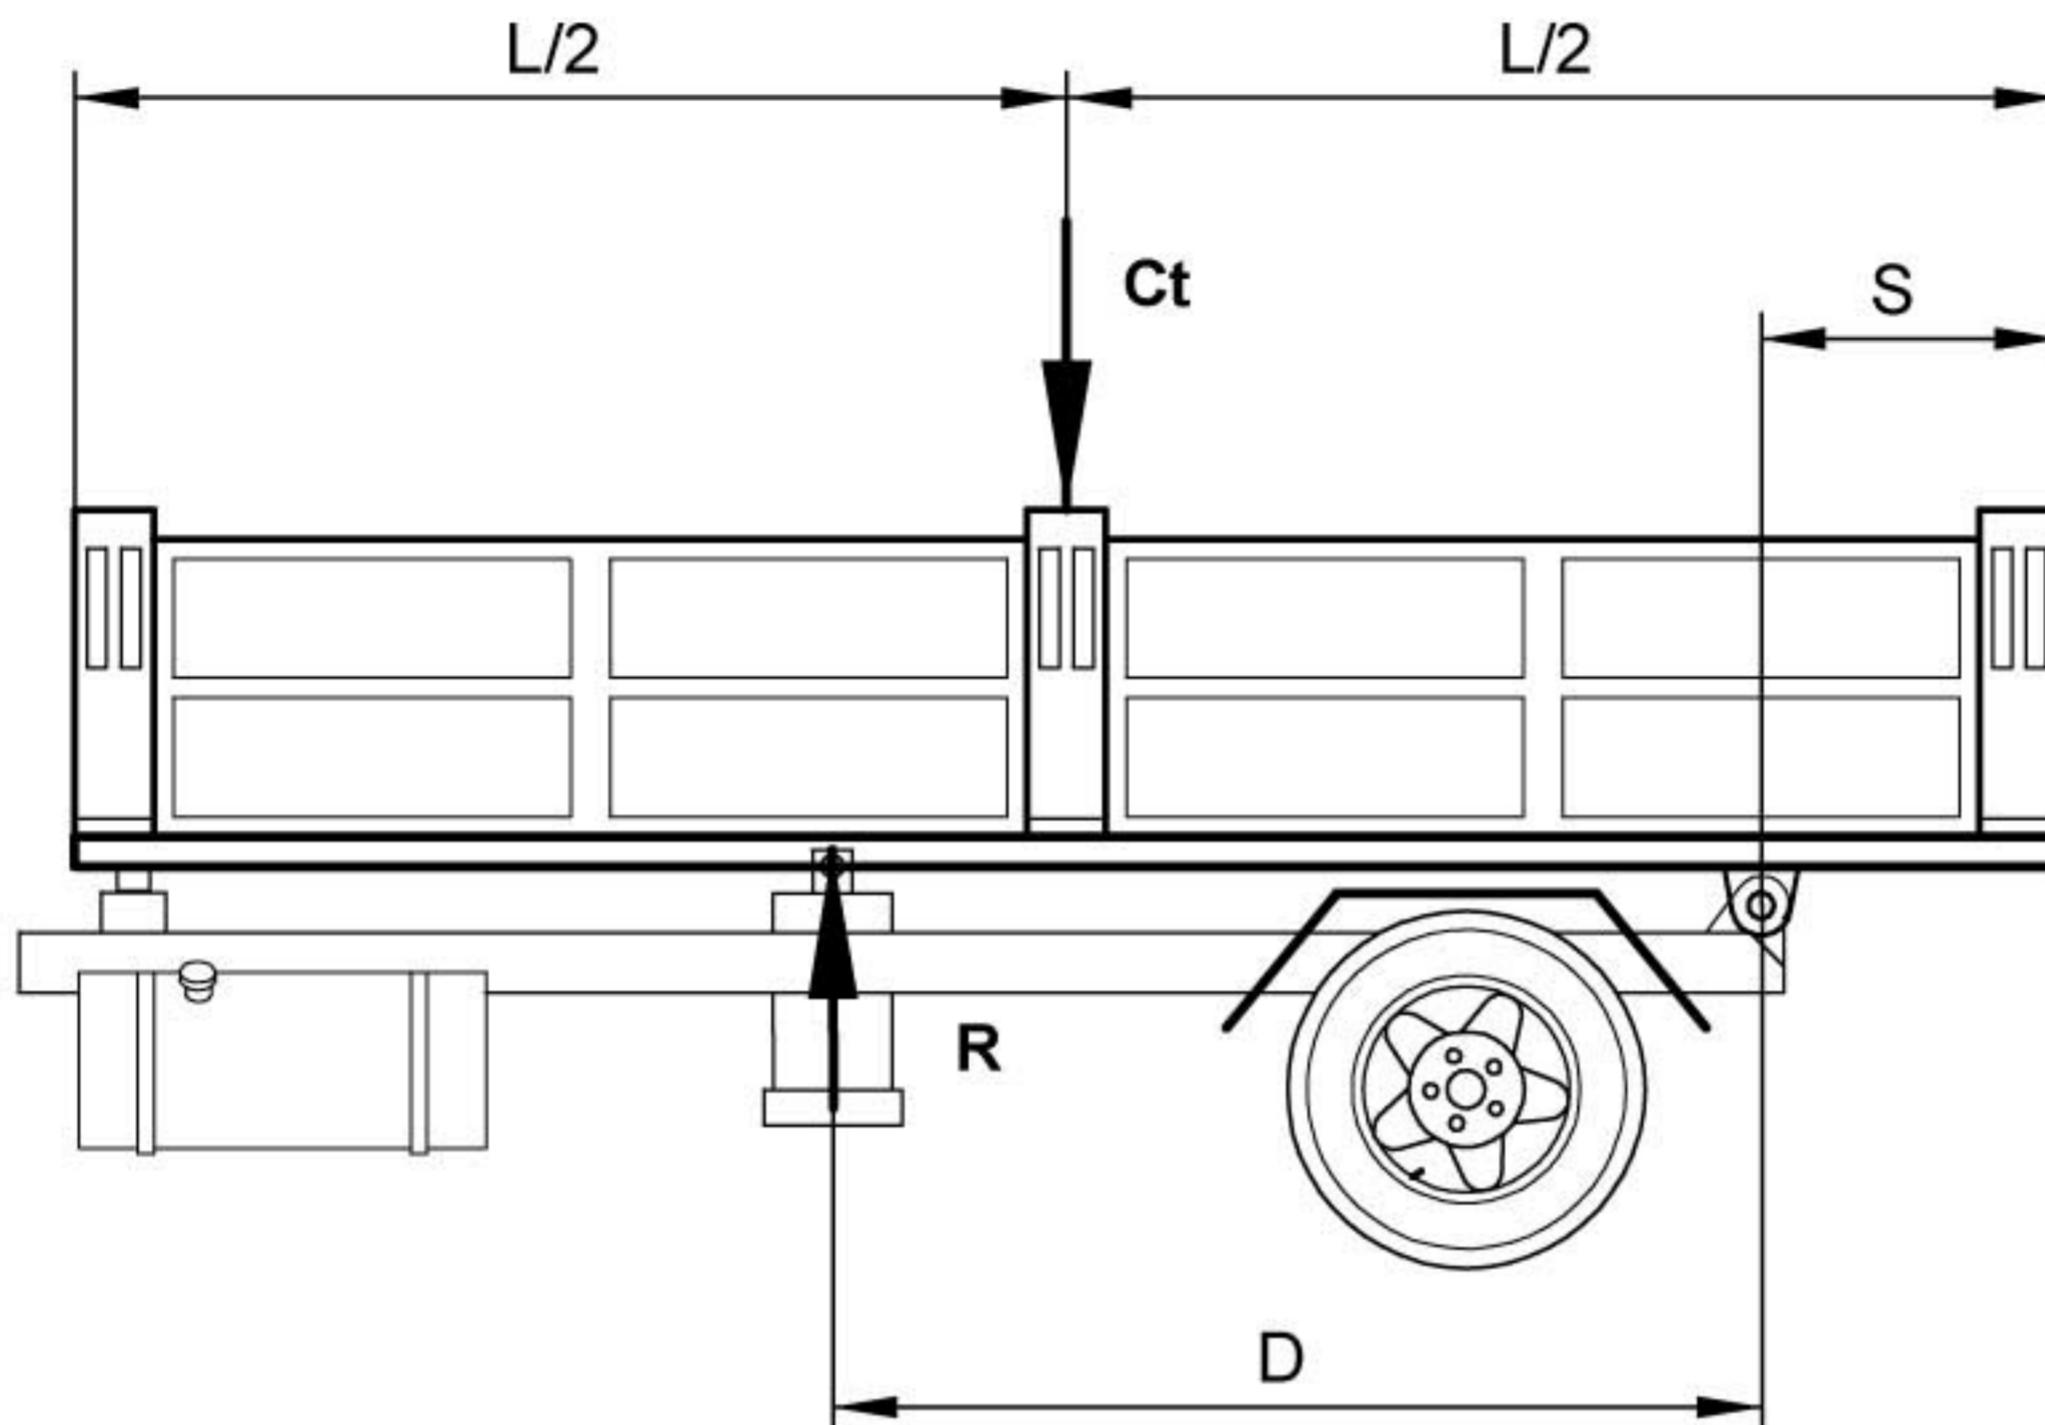

According to the tilt angle (ALPHA) of the body determine the stroke C (mm): BOX 2

When R and C are known use the chart to cross reference from n°..... to n°..... to determine type of cylinder to order.

Check length L1 (length of closed cylinder)

- a: L1 < required length - selection made
- b: L1 > required length - change to chart for number of stages until L1 < required length

$$R = \frac{Ct \cdot \left(\frac{L}{2} - S \right)}{D}$$

R = Portata cilindro
L = Lunghezza cassone
S = Lunghezza parte a sbalzo
Ct = Carico utile + peso cassone
D = Distanza tra perno di ribaltamento e cilindro

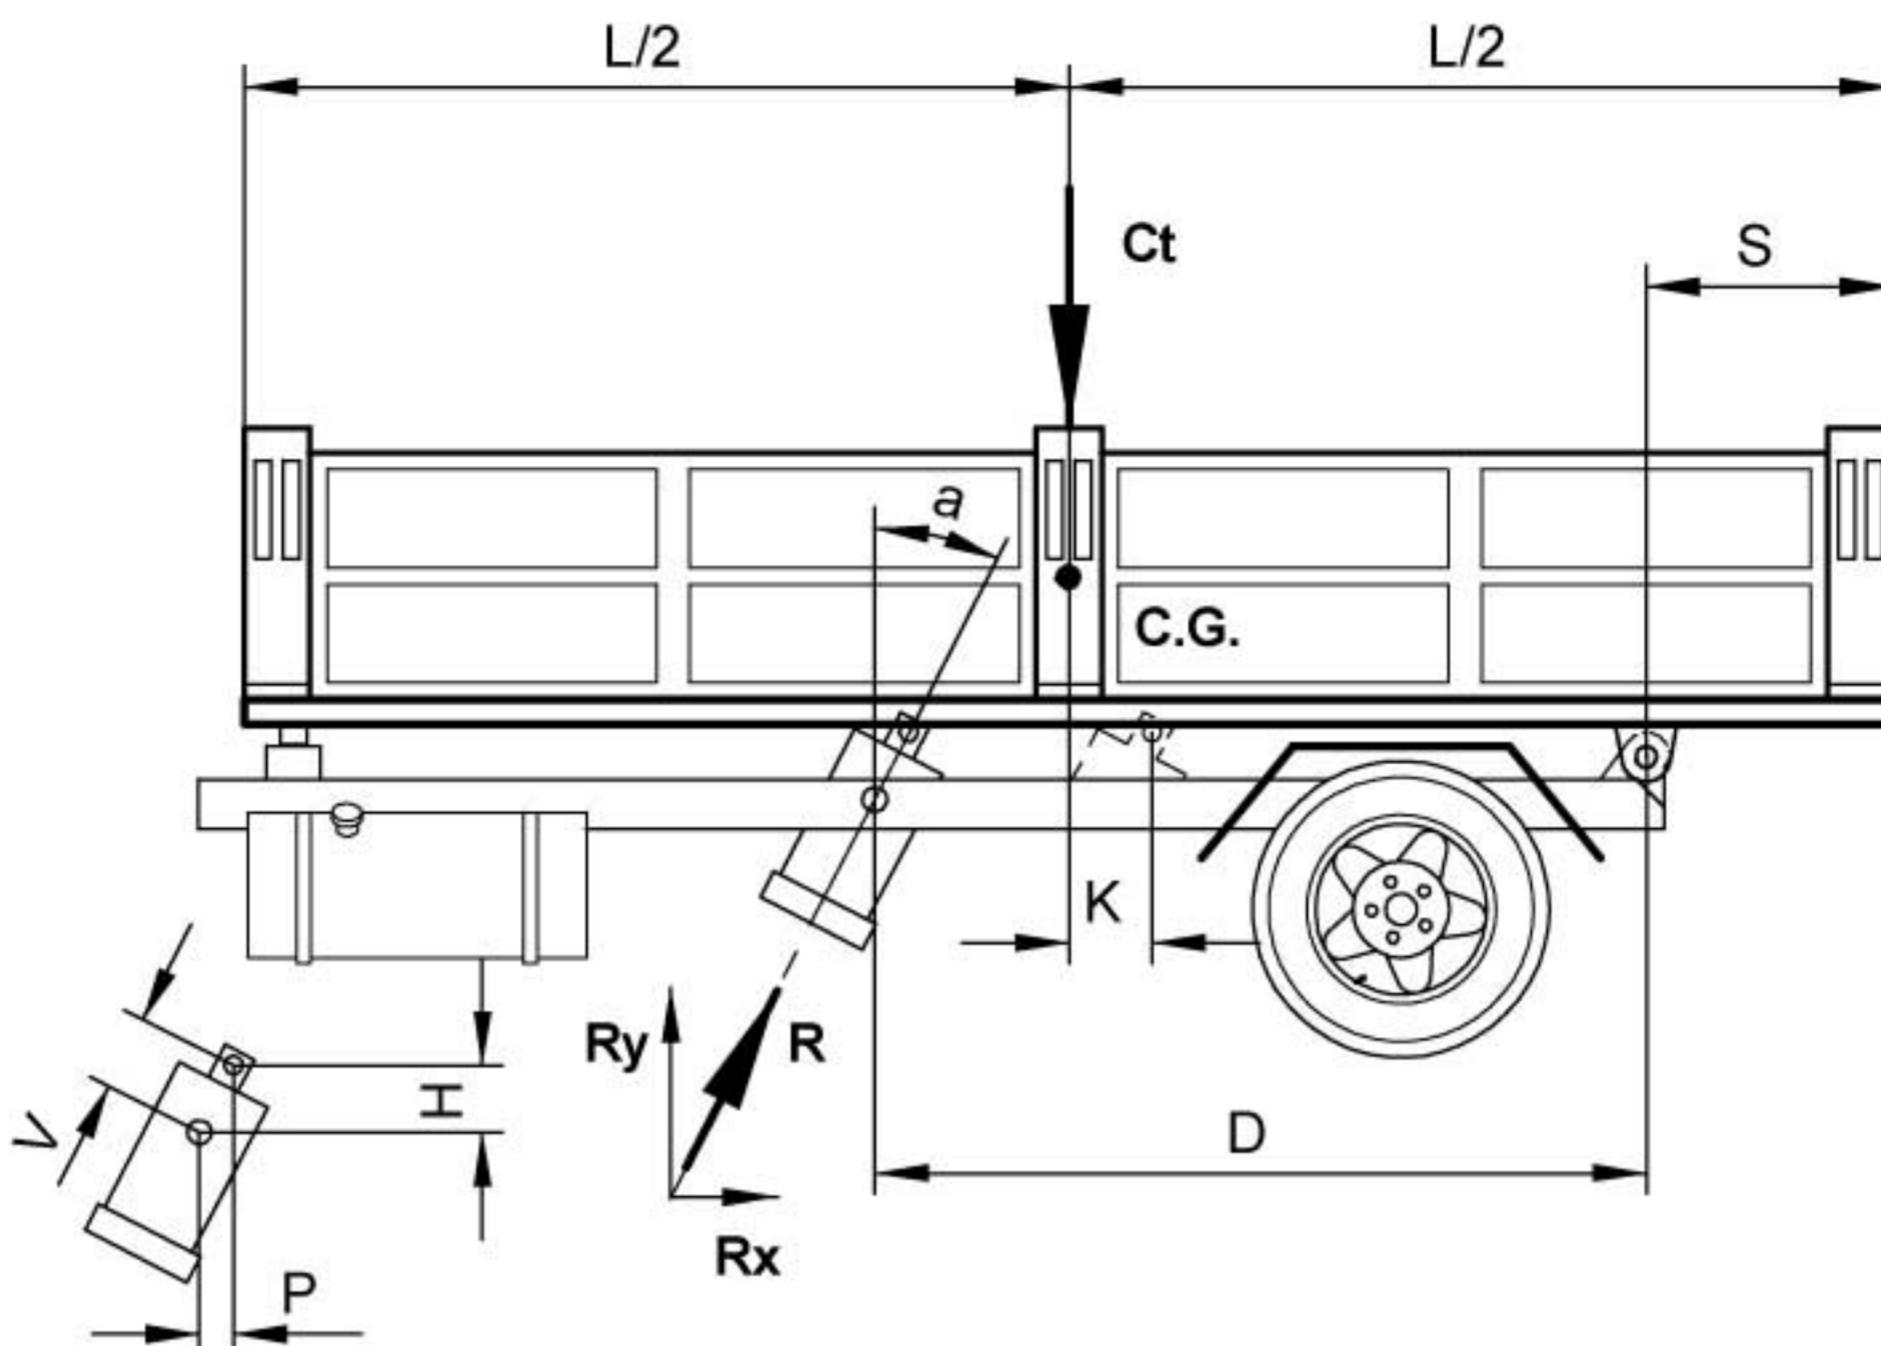

R = Cylinder capacity
L = Dump body length
S = Length of cantilever section
Ct = Working load + weight of body
D = Distance between tip-up pin and cylinder

R = Capacité de charge vérin
L = Longueur caisson
S = Longueur partie en porte-à-faux
Ct = Charge utile + poids caisson (citerne)
D = Distance entre pivot de renversement et vérin

SUBJECT: OIL INLET PINS CODE: 71780000-71730000-71560000-71720000-27230000-27240000

Technical specifications and setting of oil inlet pins with stop valves.

These oil inlet pins stop the cylinder in any position in case of breakage of the oil hydraulic tube from the pump to the cylinder itself. Their function is very easy and efficient: when the tube breaks, the small disk arranged in the stop valve gets closed by the oil pressure in the cylinder and stops the oil leakage from the cylinder. Please note that the valve starts operating only in case of a definitive breakage of the tube: as a matter of fact only in this case the suction pressure occurring in the system releases the stop valve.

If the valve starts operating and you have to replace the cylinder, please proceed as follows:

- Fix the body in its position by supporting it with some beams to prevent the body from falling down and causing damages to things and people.
- Unscrew the tube from the oil inlet pin very slowly in order to drain some oil and release the pressure from the tube.
- By means of a punch press the inner screw of the stop valve (arranged inside the oil inlet pin), drain some oil from the cylinder; then unscrew the oil inlet pin from the cylinder and remove any impurities or dirt by blowing compressed air (this operation assures the good working of the stop valve). Remount the oil inlet pin in the cylinder.
- Take the new cylinder that will replace the damaged one and try to fill it with oil before screwing it to the oil inlet pin in order to avoid any further drainage of the system.
- Turn on the pump and lift the body up to the tilting limit, remove the supporting beams and move the body up and down twice in order to check if any oil leakage occurs in the joint.
- Be sure that safety precautions are always kept during these operations. Never work under the body: you shall always work on the side of the body in order to have an emergency way-out at any time.

VALVE ADJUSTMENT

The valves supplied by DNB S.p.A. are adjusted at about 100 litres / minute. This adjustment is carried out to standardize our customers' requirements; anyway, it is possible to modify it by moving the disk from or towards the valve core.

To adjust the valve according to your requirements. Please proceed as follows:

- Mount the cylinder on the body, connect the oil tube to the oil inlet pin without the valve and lift the body up to the maximal tilting position without load.
- Time how long it takes for the body to get closed (in seconds) and multiply this value by the safety coefficient 1.5.

- This value is the «REACTION FLOW» that means the distance (in mm) between the disk and the valve core (See enclosed diagram: the value is specified next to each valve type - 3/8 gas - 1/2 gas - 3/4 gas - 1" gas).
- After this adjustment, fit the valve into the oil inlet pin and test the tilting system.

ADVANTAGES OF STOP VALVES

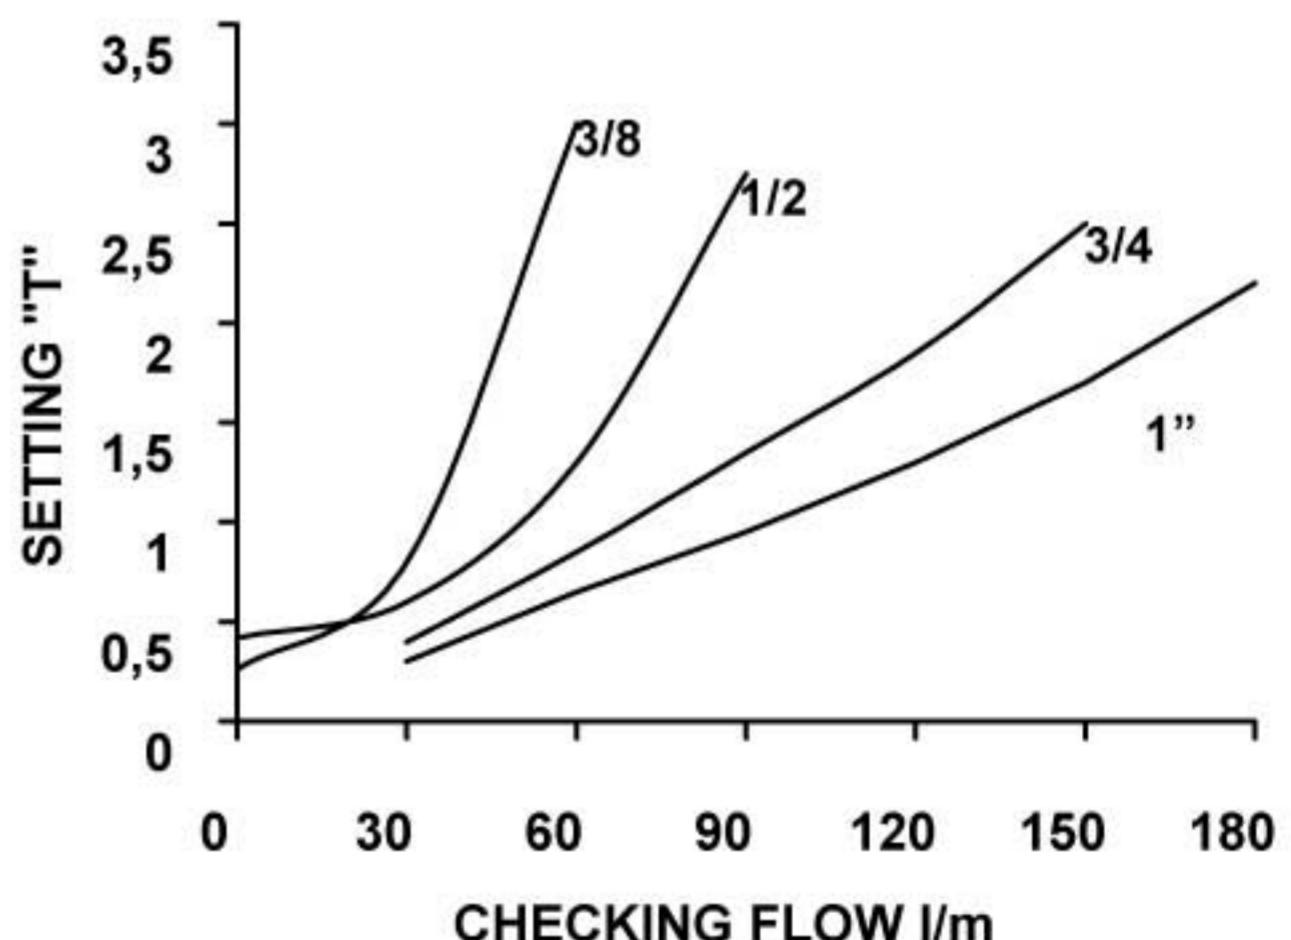

The joint provided with these valves are recommended to all dumper producers, because they prevent the body from a sudden fall (especially during the tilting operation) which would cause injuries to people and damages to the system. No difficult mounting operations are required: it is just necessary to adjust the valve according to the system, fit it into the oil inlet pin and connect this unit to the cylinder.

DISADVANTAGES OF STOP VALVES

Contrary to the cylinders with oil inlet pin without this valve, the body goes down slower. As a matter of fact this valve throttles the oil flowing in the system, which reduces the emission of the oil from the cylinder.

On a system with two or more cylinders we advise you to don't use the valve.

TERMS AND CONDITIONS OF SALE

1. GENERAL:

- 1/ ALL QUOTATIONS ARE MADE AND ALL ORDERS ACCEPTED TO THE FOLLOWING CONDITIONS. ALL CONDITIONS OF THE CUSTOMER AND OTHER CONDITIONS WHATSOEVER ARE EXCLUDED FROM THE CONTRACT OR ANY VARIATION THEREOF, UNLESS EXPRESSLY ACCEPTED BY THE COMPANY IN WRITING.
- 2/ 'RAMPARTS®' SHALL MEAN PARTS CONTAINED AND REFERRED TO BY AN ORDER CODE NUMBER IN THE STEERFORTH 'RAMPARTS®' CATALOGUE.

2. PRICES:

- 1/ ALL PRICES ARE AS STATED IN THE PRICE LIST LESS ANY DISCOUNTS GIVEN IN WRITING. THE COMPANY RESERVES THE RIGHT TO VARY THE DISCOUNT, A MINIMUM OF 14 DAYS NOTICE WILL BE GIVEN.
- 2/ ANY ALTERATION IN DESIGN OR QUANTITIES SHALL ENTITLE THE COMPANY TO MAKE AN ADJUSTMENT IN PRICE CORRESPONDING TO THAT ALTERATION.
- 3/ THE COST OF CARRIAGE AND PACKING FOR DELIVERY TO THE UK MAINLAND IS NOT INCLUDED IN THE PRICE LIST AND IS NORMALLY 3 DAYS DELIVERY SERVICE UNLESS STATED. ANY SPECIAL DELIVERY REQUEST SHALL BE SUBJECT TO AN ADDITIONAL CHARGE.
- 4/ AT THE DISCRETION OF THE COMPANY A DEPOSIT WILL BE PAYABLE WITH OFFICIAL ORDER FOR BESPOKE / HIGH VALUE ITEMS.

3. DELIVERY:

- 1/ TIME FOR DELIVERY IS GIVEN AS ACCURATELY AS POSSIBLE. THE CUSTOMER SHALL HAVE NO RIGHT TO DAMAGES OR TO CANCEL THE ORDER FOR FAILURE FOR ANY CAUSE TO MEET ANY DELIVERY TIME STATED.
- 2/ DATE OF DELIVERY SHALL IN EACH CASE DEPEND ON RECEIPT OF FINAL INSTRUCTIONS FROM THE CUSTOMER.
- 3/ THE COMPANY SHALL ENDEAVOUR TO COMPLY WITH REASONABLE REQUESTS BY THE CUSTOMER FOR POSTPONEMENT OF DELIVERY BUT SHALL BE UNDER NO OBLIGATION TO DO SO. WHERE POSTPONEMENT IS AGREED BY THE COMPANY IN WRITING, THE CUSTOMER SHALL PAY ALL COSTS AND EXPENSES INCLUDING A REASONABLE CHARGE FOR STORAGE OCCASIONED THEREBY.

4. RISK: INSURANCE; TITLE

- 1/ RISK SHALL PASS TO THE CUSTOMER WHEN GOODS OR RELEVANT PART THEREOF LEAVE THE PREMISES OF THE COMPANY FOR DELIVERY TO THE CUSTOMER NOT WITHSTANDING THAT THE COMPANY MAY ARRANGE DELIVERY.
- 2/ TITLE OF THE GOODS SHALL PASS TO THE CUSTOMER WHEN PAYMENT, IN FULL, HAS BEEN MADE UNDER CONTRACT.

5. CANCELLATION:

- 1/ CANCELLATION OF AN ORDER FOR GOODS NOT LISTED IN THE CATALOGUE (I.E BESPOKE HYDRAULIC CYLINDERS) WILL NOT BE ACCEPTED BY THE COMPANY HOWEVER, THE COMPANY MAY AT ITS DISCRETION AGREE TO CANCELLATION ON THE STRICT CONDITION THAT ALL EXPENSES, LOSS OF PROFITS AND ANY OTHER LOSS OR DAMAGE RESULTING TO THE COMPANY UP TO THE TIME OF CANCELLATION WILL BE REIMBURSED BY THE CUSTOMER TO THE COMPANY FORTHWITH.

6. TERMS OF PAYMENT:

- 1/ ALL CREDIT ACCOUNTS SHALL BE NET MONTHLY AND DUE AND PAYABLE BY THE CUSTOMER 30 DAYS.
- 2/ NO DISPUTES ARISING UNDER THE CONTRACT OR DELAYS BEYOND THE CONTROL OF THE COMPANY SHALL INTERFERE WITH THE PROMPT PAYMENT BY THE CUSTOMER.
- 3/ IN EVENT OF DEFAULT OF PAYMENT BY THE CUSTOMER, THE COMPANY SHALL BE ENTITLED TO SUSPEND ALL FURTHER DELIVERIES WITHOUT NOTICE.

7. SHORTAGES AND DEFECTS APPARENT IN INSPECTION:

- 1/ ANY CLAIM FOR SHORTAGES OR DEFECTS APPARENT ON INSPECTION WILL ONLY BE CONSIDERED IF;
 - a/ CUSTOMER INSPECTS THE GOODS IMMEDIATELY UPON ARRIVAL ON THE PREMISES & SIGNS CARRIERS PAPERWORK AS DAMAGED (IF THIS IS THE CASE).
 - b/ A WRITTEN COMPLAINT IS MADE TO THE COMPANY WITHIN 7 DAYS OF RECEIPT OF GOODS.
 - c/ THE COMPANY IS GIVEN THE OPPORTUNITY TO INSPECT THE GOODS.

IF A COMPLAINT IS NOT MADE TO THE COMPANY AS HEREIN PROVIDED THE GOODS SHALL BE DEEMED TO BE IN ALL RESPECTS IN ACCORDANCE WITH THE CONTRACT, THE CUSTOMER SHALL BE BOUND TO THE CONTRACT AND THE CUSTOMER SHALL PAY FOR THE SAME ACCORDINGLY.
- 2/ ANY GOODS MODIFIED OR DISMANTLED IN ANY WAY WILL BE VOID OF WARRANTY.

8. FIT FOR PURPOSE:

- 1/ CUSTOMERS REQUESTS FOR HYDRAULIC RAMS SHALL INCLUDE 'RAMPARTS®' WHEREVER POSSIBLE. APPLICATIONS FOR THE USE OF ANY HYDRAULIC RAMS MADE BY THE CUSTOMER OR BY THE COMPANY USING 'RAMPARTS®' OR ANY REQUEST TO THE COMPANY UNDER CONTRACT SHALL BE THE SOLE RESPONSIBILITY OF THE CUSTOMER. NO LIABILITY FOR THE FAILURE AS A RESULT OF INCORRECT APPLICATION, FAIR WEAR AND TEAR AND USAGE SHALL ATTACH TO THE COMPANY.

9. GUARANTEE:

- 1/ SAVE AS PROVIDED BY CONDITION 7 HEREOF THE COMPANY AGREES TO REPLACE OR REPAIR AS ITS OPTION GOODS OR PART OF GOODS SUPPLIED BY THE COMPANY AND PROVED TO THE COMPANY'S SATISFACTION TO BE FAULTY (FAIR WEAR AND TEAR EXCLUDED) PROVIDED SUCH FAULT TO BE NOTIFIED WITHIN 6 MONTHS OF THE DATE OF DISPATCH FROM THE COMPANY'S WORKS. HYDRAULIC CYLINDERS BUILT FROM RAMPARTS COMPONENTS ARE NOT GUARANTEED UNLESS INDIVIDUAL COMPONENT FAILURE IS EVIDENT. THE CUSTOMER HEREBY ACKNOWLEDGES THAT:
 - a/ THE CUSTOMER PURCHASED GOODS IN THE COURSE OF BUSINESS AND NOT FOR PRIVATE USE AND;
 - b/ THE CUSTOMER KNOWS THE EXTENT AND MEANING OF THIS CLAUSE AND THE LIMITATIONS THEREBY IMPOSED BY AND SECTIONS 13, 14 AND 15 OF THE SALE OF GOODS ACT 1979.

10. LIABILITY:

- 1/ THE COMPANY'S LIABILITY, WHETHER IN RESPECT OF ONE CLAIM OR IN AGGREGATE, ARISING OUT OF ANY CONTRACT SHALL NOT EXCEED THE PURCHASE PRICE UNDER CONTRACT. THE COMPANY DOES NOT ACCEPT LIABILITY FOR ANY CONSEQUENTIAL LOSSES.

11. CUSTOMER'S DRAWINGS:

- 1/ THE COMPANY ACCEPTS NO RESPONSIBILITY FOR THE ACCURACY OF INFORMATION OF DRAWINGS SUPPLIED BY THE CUSTOMER.
- 2/ THE CUSTOMER SHALL INDEMNIFY THE COMPANY AGAINST ALL ACTIONS, CLAIMS, COSTS AND PROCEEDINGS WHICH ARISE DUE TO MANUFACTURE OF COMPONENTS TO THE DRAWINGS AND OR THE SPECIFICATIONS OF THE CUSTOMER WHERE SUCH DRAWINGS AND OR SPECIFICATIONS SHALL BE AT FAULT OR WHERE IT IS ALLEGED THAT THEY INVOLVE AN INFRINGEMENT OF ANY EXCLUSIVE RIGHT.

12. DATA:

- 1/ ALL ILLUSTRATIONS, WEIGHTS, DIMENSIONS, MEASUREMENT AND SPECIFICATIONS SET OUT IN THE 'RAMPARTS®' / STEERFORTH CATALOGUE ARE STATEMENTS OF OPINION, NOT TO SCALE AND ARE PROVIDED FOR INFORMATION ONLY AND FORM NO PART OF THE CONTRACT. SUBJECT TO CHANGE WITHOUT NOTICE.
- 2/ ALL RIGHTS RESERVED - THIS CATALOGUE MAY NOT BE PRODUCED IN WHOLE OR IN PART WITHOUT THE PERMISSION OF STEERFORTH SALES.

13. SUB-CONTRACTORS:

- 1/ THE COMPANY SHALL BE ENTITLED TO APPOINT ONE OR MORE SUB-CONTRACTORS TO CARRY OUT ALL OR ANY OF ITS OBLIGATIONS HEREUNDER,

14. LEGAL:

- 1/ THE CONTRACT SHALL BE GOVERNED AND INTERPRETED EXCLUSIVELY ACCORDING TO ENGLISH LAW.

15. INTEREST:

- 1/ INTEREST AT 20% SHALL BE PAYABLE ON ALL ACCOUNTS NOT SETTLED BY THE DUE DATE.
