

panel supports

WALL FIXED PANEL SUPPORTS

A complete range of wallfixings in silver satin anodised aluminium is available from stock. Other finishes including black, brass, stainless steel, chromed brass and epoxy powder colours to clients specifications are available - call for prices and to receive the detailed panel fixing brochure.

< optional vandal proof fixing head in stainless steel

Panel supports for drilled sheets

These panel supports provide an easy method to wall-mount sign panels, or create a raised counter top, and can be produced to hold glass or solid panels up to 25mm thick.

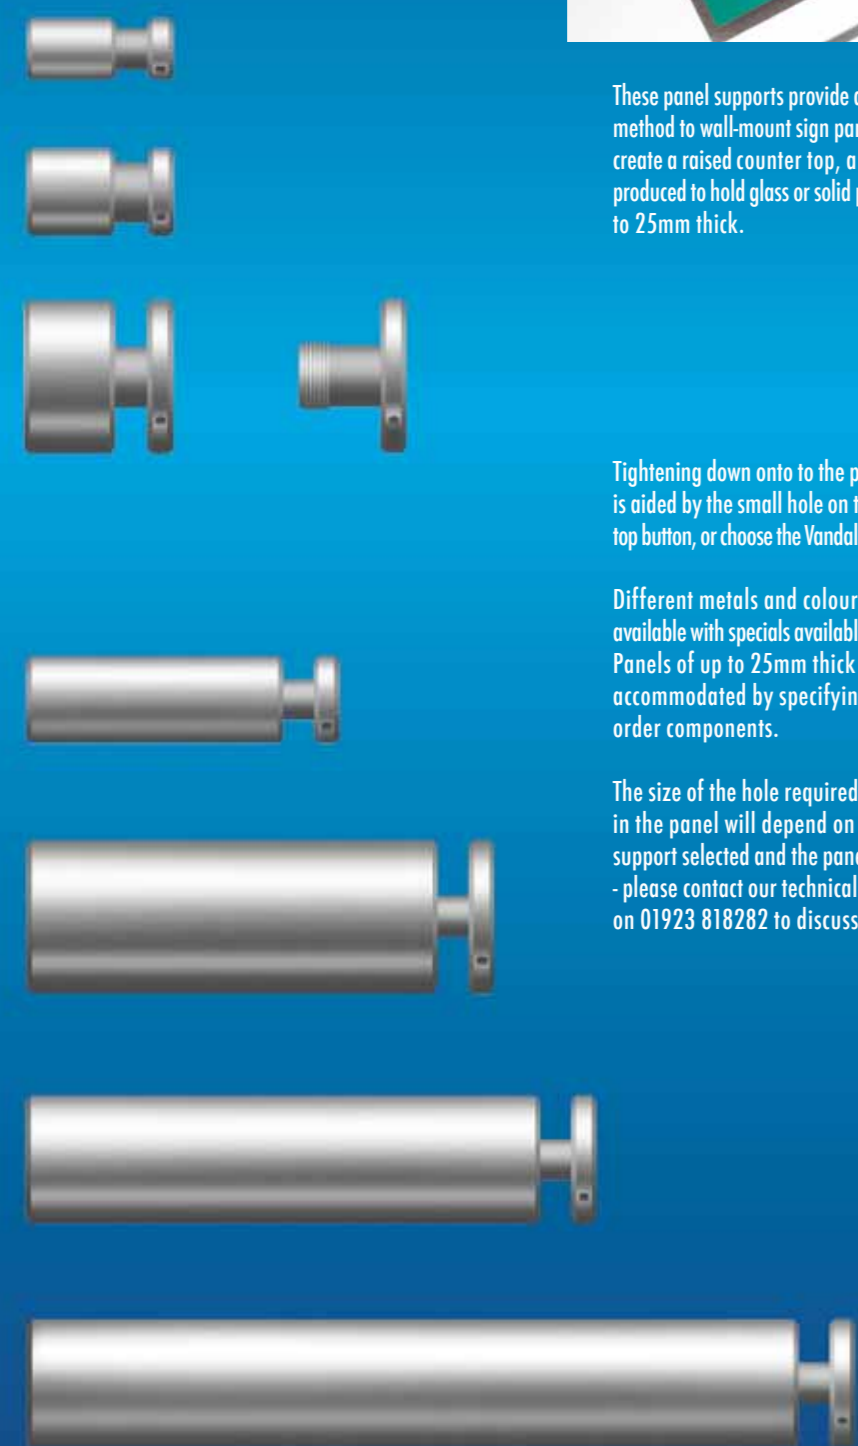

< The nylon-tipped grub screw in components PE.2 to PE.6 (inclusive) is designed to hold panels 6-10mm thick.

Tightening down onto the panel material is aided by the small hole on the side of the top button, or choose the Vandal Proof option.

Different metals and colour finishes are available with specials available on request. Panels of up to 25mm thick can be accommodated by specifying made to order components.

The size of the hole required to be drilled in the panel will depend on the panel support selected and the panel's thickness - please contact our technical department on 01923 818282 to discuss further.

SPECIAL COMPONENTS

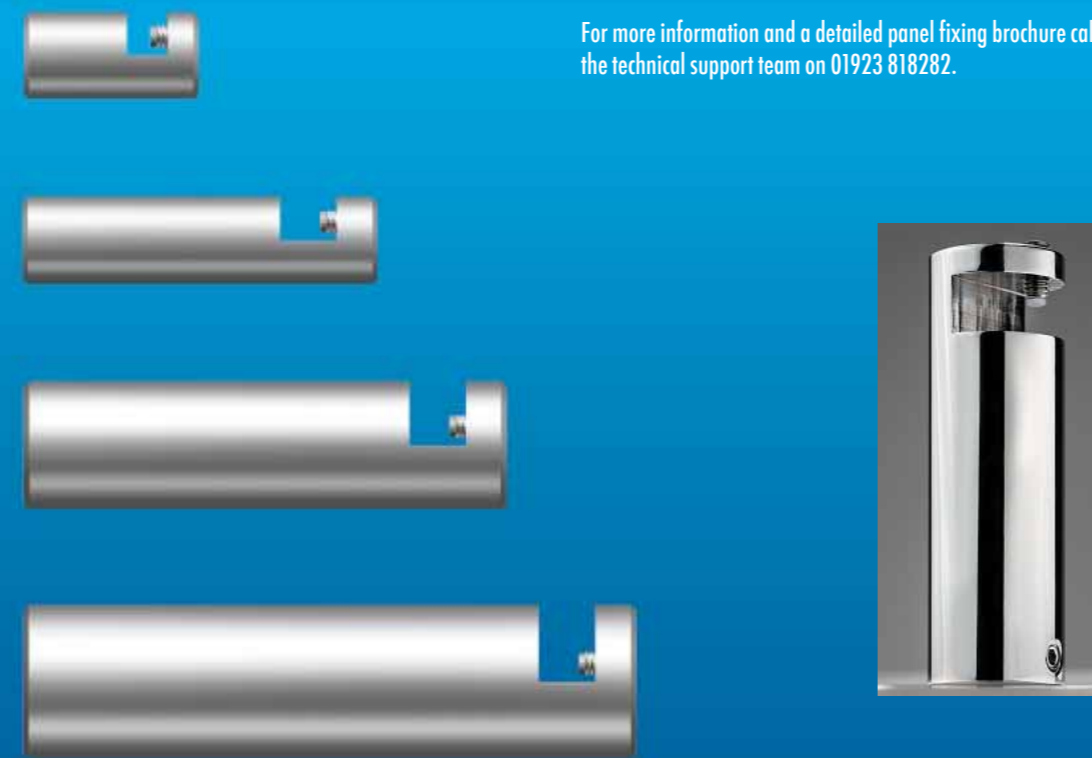

Shopkit is able to manufacture a wide range of special components, with different metal finishes to Clients' specifications at our factory. Please call the Technical Support Team on 01923 818282 to discuss your requirements.

Fixed edge panel supports

These edge fixed panel supports provide an easy method to wall-mount sign panels, or create a raised counter top, they are designed for glass or solid panels ranging in thickness from 3 - 10mm depending on which component is used.

For more information and a detailed panel fixing brochure call the technical support team on 01923 818282.

Special order - vandal proof panel fixings in stainless steel, holding glass panels to wall.
