TECHNICAL BULLETIN 010

A special edition Technical Bulletin highlighting Mercedes Sprinter starter motor application.

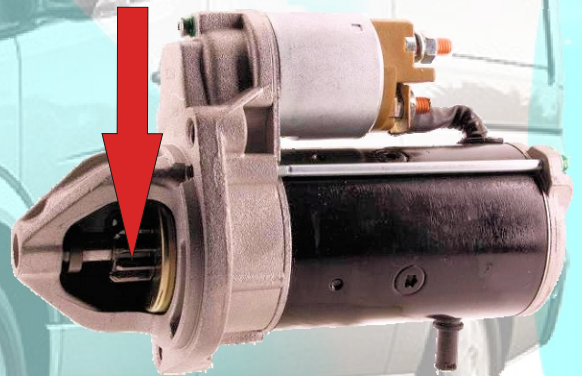

10 tooth UNS1215

We have been aware for some time that getting the application right for Mercedes Sprinters is really only possible via O.E. numbers, but we still have the odd occasion of customers saying they can be noisy on the ring gear. So here is our quick guide to help you supply the right starter, first time!

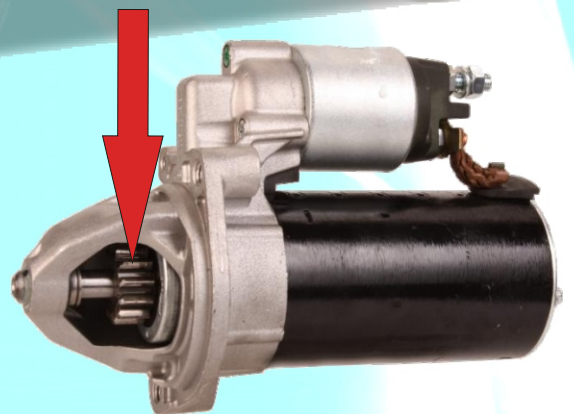

Firstly this is for **non stop/start** sprinters from around 2000 on. If O.E. numbers are unavailable we would suggest counting the teeth on the drive. Then apply as below:

11 tooth UNS1318

12 tooth UNS1710

10 tooth drive UNS1215

11 tooth drive UNS1318

12 tooth drive UNS1710

Part numbers and pictures are for reference only. 02/2015
