

FSL Aerospace Limited

Providing Fastener Solutions
Delivering Results

You buy Aerospace fasteners, we supply results!

FSL Aerospace is a world class supplier of fasteners, fixings and associated components, supporting the aerospace and defence industries since 1985.

We operate with integrity in all areas of the business. True collaborative partnerships are built with trust and driven forward with honest communication.

Great quality, competitive price and on-time delivery are fundamental.

FSL's goal is to understand your real organisational needs.

We can then build a long-term partnership by providing a highly tailored, proactive service to add true value to your business.

The FSL Approach

FSL's approach is all about adding value for our clients. We are committed to supplying a consistently high quality of product and level of service. With our expertise, proven track record and ISO approvals, we find that clients come back to us time and time again.

FSL's unrestricted product range policy means we can supply all of your fastener and fixing needs.

Our scope of supply enables us to provide associated components as well, including workshop consumables, adhesives etc., bringing the benefits of reliable supply and vendor reduction.

Contact us or visit our website for more information.

FSL does not just sell from stock. Our experienced sourcing team will scour the world for quality sources of product, from either stockists or manufacturers, when required.

FSL Service

FSL operates bespoke Stock Management Systems (Kanban / DLF) for the supply of product direct to the point of use on the client's premises.

Each system is tailored to the individual client to meet their exacting needs, reduce waste and non value added processes bringing true value and cost savings.

Contact us for more information.

FSL can offer special packaging and customised kitting solutions reducing inventory and costs.

To increase speed and achieve the highest possible levels of accuracy, barcoding is utilised throughout our systems, wherever possible.

Supply
Chain
Management

FSL is committed to supplying a consistently high quality of product. To achieve this, we invest in both staff and equipment to verify product on site.

FSL Quality

The Aerospace and Defence Industry Sector demands the highest quality levels of product and service. FSL provides this by ensuring our Quality Management System meets/exceeds the requirements of AS9120 and BS EN ISO 9001.

FSL's Quality Department is dedicated to achieving the highest levels of client satisfaction and compliance by utilising people, processes and resources to ensure superior client engagement, supplier management and product conformity.

Our Inspection processes have been audited and approved to Delegated Source Approval level for many of our clients which means that we can ship directly to their operating stock without them having to inspect these goods themselves.

The ADS SC21 program started us on the road to a continuous improvement culture in 2010 and FSL has achieved SC21 awards consecutively since 2012.

Our systems incorporate planned reviews and by encouraging innovative suggestions, we strive for perfection in all areas of the business.

Approvals

FSL has been audited and approved to AS9120 & ISO9001, and also hold many, major client approvals.

FSL keep a close eye on component obsolescence and are members of the International Institute of Obsolescence Management.
