EPDT Desktop Pinnable Screens have an hidden inbuilt pinboard rail that sits just below the surface on most of this screen range. Use the rail, don't use the rail either way it is invisible, integral and environmentally friendly, its designed to make your desk area that much more efficient without adding extra expense by using recycled pinboard off cut components from other ECO products.

EPDT Desktop Pinnable Screens follows ECO's environment friendly policy during all stages of production, ECO uses the most efficient and least wasteful production methods at all times.

This concept coupled with buying renewable and sustainable raw materials where possible, plus manufacturing all stages of the production process in-house, has been ECO's abiding goal since inception..

The flexible nature of this system allows designers to add graceful lines and stylish colour ways to any office environment.

Grace – Style – Efficiency
