

## Multi Use Games Areas

Our games areas are manufactured from heavy duty galvanised and powder coated steel. Available from a single stand alone goal to full multi use games areas of different sizes, all to the British Standard Product Assessment PAS 30 1998. The games areas can be designed to fit in most locations.

The ends are 3m high rising to 4m behind the basketball goal, with either 3, 2 or 1 metre high sides. They have heavy duty steel panels to aid ball rebound and eliminate excessive noise. Rest areas and escape routes can be incorporated into the court walls

Available in the colour of your choice

Backboards and hoops are to Basketball Association regulation size and height.

Hoops and nets are stainless steel, whilst backboards are made from high density polyethylene which will not discolour or delaminate.

The name of your club, School, council etc can be engraved on the backboard.
