

Rotating seesaw

Up and down spinning all around, this seesaw is great fun for the more adventurous. Originally designed for the older children but we have found that children of all ages are able to enjoy this exciting piece of equipment on their own or with others.

Rotating on sealed roller bearings and pivoting on a heavy duty spring this seesaw is virtually maintenance free.

Made from powder coated tubular steel, with rubber button seats with a large round profile base

Traditional seesaw

Featuring a gradual bump stop mechanism to eliminate sudden changes in direction and limb entrapment, this all steel powder coated seesaw pivots on large sealed roller bearings that will ensure a long and virtually maintenance free life.
