## Introducing the new GF Valve Finder Find the correct valve for you

Valve options include ball valves, diaphragm valves, butterfly valves, check valves, venting and bleeding valves, pressure control valves and solenoid valves.

By selecting the Valve type, Manual/Actuation type and Material, users are guided directly to a page with matching valves. An extended search function then narrows down the results even further, for example by pressure rating or end connection type.

The screenshot shows the GF Piping Systems website interface. At the top, there is a navigation bar with the GF logo, the company name, and links for Corporation, United Kingdom, and Contact, along with a search bar. Below this is a secondary navigation bar with 'Products & Solutions', 'Support & Services', and 'About GF Piping Systems'. The main content area features a 'Product Search' box with a 'Go' button and a 'Request Form' button. A sidebar on the left lists various product categories under 'Product'. The central focus is the 'GF Valve Finder' tool, which includes three dropdown menus for 'Valve', 'Actuation', and 'Material', each with a 'Please select:' prompt. To the right of these menus is a 'Find it' button and an image of several different valve types. Social media icons for Facebook, Twitter, YouTube, and LinkedIn are visible at the bottom left of the screenshot.
