FIT FOR SERVICE

The First, Non-Destructive Testing (NDT) for Thermoplastics with a "Fit for Service" Statement

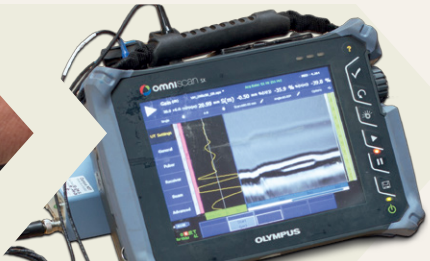

The First NDT with "Pass or Fail" Process for ecoFIT (PE) and PROGEF (PP) Butt Fusion Welds

[Click here to view NDT in action](#)

Using ultrasonic technology, we are able to offer our customers the highest quality control NDT for our butt fusion welds in ecoFIT and PROGEF. Key projects around the world rely on NDT technology to ensure highest safety and quality of the weld area in metal piping. Today, GF Piping Systems approach to total quality management has resulted in the world's first NDT Service with a pass or fail statement on the butt fusion weld of ecoFIT and PROGEF.
