ARBOR RANGE

High Quality Architectural Ironmongery

Our unique Arbor range of architectural ironmongery is made exclusively by us and encompasses door, window and cabinet fittings and now includes matching electrical accessories.

Each item of this extensive range is made by combining the beauty of natural wood with the hard wearing qualities of brass components.

There are thirteen varieties of wood to choose from (all sourced from sustainable forests) and thirteen different finishes can be applied to the brass components.

In addition we can paint the wooden parts in any colour that you like, ensuring that you have unlimited choice to meet the exact requirements of your design scheme.

Our Arbor range can be integrated into traditional as well as contemporary design schemes as shown here.

Mortice knob 34310
painted white to match
the door

Mortice knob 34308
in dark mahogany
with antique brass
finished components

Grooves

We can machine grooves into the wooden part as shown here.

This feature not only adds to the design, but is useful if a more positive grip is needed on the item.

When specifying this extra requirement, simply add 'G' to the product code and we shall discuss your exact requirements with you.

Bespoke items

We can also make products to your own design as shown here, and can use wooden material especially sourced to match your requirements.

Product designs copyright © 2008 Nick Rogers.

All rights reserved. Any unauthorised copying will constitute an infringement of copyright. These product designs and the name Arbor are registered with the UK Copyright Service, Registration number 285530.

Painted finish

In addition to the thirteen different woods we use, we can paint the wooden components to suit a particular design scheme.

The colour can be either a standard RAL colour, or a non-standard colour for us to match

Main product illustrations in this catalogue

Throughout this catalogue the main product illustrations show the Arbor range in rosewood with polished nickel plated components. To see all the combinations of different woods and finishes available please turn to pages 45 - 51.

Site surveys

On larger projects, especially refurbishment contracts, we can visit site checking on door and window construction and advise on the suitability of products.

Scheduling

Where larger projects require it, we can produce ironmongery schedules.

Dimensions

All the dimensions in this catalogue are in millimetres.

Our Classic Range

Products from the Arbor range can be used alongside products from our Classic range - we can apply the same finish to all the components to ensure that the whole selection of products look comfortable together. Our Classic range catalogue can be downloaded from our web site.

Our eight distinctive designs of lever handles are sprung and are available on a round rose, lock plate, latch plate, or as bathroom sets.

The lock plates can be machined for oval profile or euro profile cylinders.

Dimensions:-

Round rose lever sets – rose diameter 51

Lever lock sets – plate 240 x 45

Lever latch sets – plate 240 x 45

Bathroom lever sets – plate 240 x 45

As with all of our Arbor Range, the lever handles are available in a combination of 169 different materials and finishes.

Illustrated here are rosewood levers with polished nickel plated components.

Bathroom Sets

The bathroom sets incorporate two different designs of turnpieces – type A, and type B.

When specifying, just add an A or a B to the product code for the bathroom lever set.

See all the 169 combinations of materials and finishes on pages 46-52
