Welcome

Welcome to issue 4 of the Saxby Lighting catalogue which offers a range of products to create inspirational lighting schemes.

How you light an area will impact on its space as well as setting the correct mood and ambience; it is the essential element to any project, large or small.

We have once again concentrated on a range that delivers solutions for the designer, electrical contractor and architect. Our range is intended for all types of commercial, retail, leisure and residential applications. Within these, you will find various solutions from the traditional and classic to the latest in energy efficient and contemporary designs.

Quality and reliability remains the highest of priorities, ensuring you have confidence in the products you are purchasing or recommending.

Outdoor Lighting: all outdoor/exterior products are covered by the manufacturers guarantee. Unless specifically defined as Marine Grade, these guarantees are null and void if the products are installed or stored within or near a marine or sea and coastal environments or where there is salt, fertilisers and or chemical pollution in the environment.

Dimmers: A dimmer switch is a third party accessory and not guaranteed with our products. Please contact the manufacturer of the dimmer switch you intend to use to confirm compatibility.

Whilst every effort has been made to ensure that the information provided in this catalogue is accurate, we do not accept liability for errors. No warranty, express or implied, is given that the information provided in this catalogue is error free. We try to ensure that colours and dimensions are correct at time of print, but these are given for guidance and comparison only and are subject to change without notice. Prior to making any structural changes, please ensure physical confirmation of correct dimensions.

Recessed Lighting is an essential component of any modern lighting scheme, working effortlessly in both commercial and domestic environments.

Our range includes cool LED, anti-glare and robust commercial ranges as well as GU10 compatible models.

You may be specifying lighting for a new installation or simply replacing existing inefficient or dated fixtures. From the traditional to the latest energy efficient designs, our wide range means you will find an effective solution to your requirements.

Features and Benefits

Die Cast Aluminium
Steel body with a die cast aluminium head.

90 Minutes Fire Rated
Fully tested for 90 minute fire rated surfaces.

Integrated Intumescent Material
Incorporated in the downlight completely seals the downlight and cut-out in the event of a fire.

Maintains The Ceiling Fire Barrier Integrity
In compliance with the Building Regulations and Fire Safety.

Maintains the Ceiling Acoustic Properties
In compliance with the Building Regulations and is Resistant to the Passage of Sound.

Maintains the Dwellings Air Leakage Requirements
Products include seals to help compliance with Part C and Part L of the Building Regulations.

Simple and Versatile Installation
Installation no different to a standard downlight. Suitable for ceiling up to 35mm thick.

IP65 Version Available
Suitable for use in all areas where an IP65 rating is required.

Supplied Complete with Lamp
Depending on version, it is supplied with a pre-fitted MR16, GU10 50W lamp, 11/13W GU10 energy saver or 5W LED 3500K GU10.

Full Colour Packaging
Products are supplied in all new colour packaging.

DOWNLIGHTS – LED

Array Recessed Downlights

Incorporating the latest in LED technology, Array's comprise of multiple surface mount LED's (SMD).

The LED's are mounted on an aluminium panel for superior temperature control and embedded into a silicone diffuser for exceptional colour rendering.

When combined, these technologies offer a cost effective combination of high light output, low power consumption and an innovative lighting solution requiring little maintenance.

Supplied complete with Plug and Play LED driver

Invisible

Display lighting demands a discreet solution. Our innovative recessed Invisible lightbox framed units fit directly into your ceiling void, giving a streamlined and completely flush finish that puts the emphasis on the displayed item rather than the light fitting. The unit comes in MR16, AR111and HCIT metal halide versions.

Delivering a flexible solution, each version is available as a single, double or triple box unit, with the ability to interchange the AR111 and HCIT heads as needed. The boxes are best fitted during first fix.

FH150		

With the increased use of downlights in ceilings the integrity of the plasterboard and suspended ceilings is severly reduced. Intumescent downlight covers restore the integrity required by British Standards and building regulations. The downlight covers can be easily installed from below or above the ceiling and are certified to British Standard for all types of ceiling.This item can be used with most of our downlights.

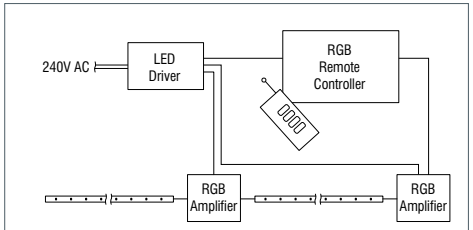
- RGB colour changing flexible LED strip with self adhesive backing
- Single RGB LED chip, nine remote controlled settings including static, red, blue, purple, green, yellow, cyan and white. Fast changing 7 colours and gradual changing 7 colours
- Clearly marked cut point every 90mm
- Voltage drop of 2V per metre
- Very low power consumption
- Copper track for effective heat dissipation and long life
- Sold in units of 1 metre (max 3 metre per roll)



- RGB strip supplied in maximum 3 metres lengths
- 1 Remote 12498 will control up to 50 metres of flex
- Each additional 3 metres strip requires an RGB amplifier
- Requires 24v LED constant voltage Driver see page 73
- Power consumption 15W per metre

For use with static Microflex only

12V DC LED Strip Lighting

12282 – IP20 **12283 – IP20** **12284 – IP20** **12285 – IP20** **12286 – IP67**

The Micro Flex is an adaptable and flexible LED lighting strip, it is extra low voltage for maximum cost efficiency. It comes with an adhesive back that enables easy fitting. It is supplied in 1 metre strips and can, if required, be supplied in lengths of up to 6 metres and can be cut to size every 30 mm, making it perfect for illuminating under cabinets and over worktops or for general low level lighting. The strips come in a choice of colours and an IP rated version is available for external use.

Microflex Fast Connector – 12493

Microflex Butt Connector – 12494

Driver 12V 1-15W – 13752

Powers up to 2 metre of flex LED

Driver Microflex 12V 48W – 12490

Powers up to 6 metre of flex LED

In a bathroom there are many layers of light to address. You may be specifying recessed lighting in the ceiling, wall lights for uplighting, vanity lights for task lighting or LED lighting for ambiance.

Our IP rated products are designed for all zones in the bathroom where safety is a crucial consideration.

We have many products available that combine to create a calming, idyllic atmosphere that is also practical and durable.

All flush can be wall mounted

Our track lighting allows light fixtures to be attached on a continuous track system, offering a high level of flexibility. Easy to install, they are perfect for accenting objects or offering directional task light.

Our professional range is offered in 3 phase, twin and single to suit all varieties of installations. The products are equally suitable for commercial as well as domestic environments.

Duo

Duo is a professional new modern track system for use in commercial and domestic environments, offering a flexible lighting solution for all applications.

Duo track is a 2 Circuit track. This means the track and the attached lights can be operated from 2 switches allowing the specifier or end-user to concentrate light into or onto a specific area while the rest of the track remains off; alternatively they can also be used as a standard single circuit system.

Compatible with an array of different light sources, 240V halogen lamps as well as energy efficient LED and fluorescent, this system lends itself to fast and easy installation, maintenance free economic lighting with dimming options subject to the light source used.

Spotlights are an infinitely flexible lighting solution, whether used to focus on a prized possession or provide versatile general lighting.

We supply a wide selection of halogen mains voltage spotlights, suitable for walls and ceiling in a choice of finishes.

Ranging from simple cost effective entry level products through to the latest in style statements, many of our models are fully adjustable to let you concentrate the light beam just where it's needed.

Low-level recessed or surface guide lighting effectively and safely illuminates paths, decks, stairs and corridors whilst remaining subtle and unobtrusive.

Our range comes in a choice of many different light sources and is popular for providing general ambient light as well as ensuring safety considerations are met.

Supplied with Acid Glass

Most office or retail environments demand fluorescent lighting and today that doesn't mean you have to compromise on style or design.

Our comprehensive range includes recessed, surface and suspended luminaries, products for false ceilings and a range of low glare products. Anti-corrosive products are also available for environments such as warehouses.

Available in contemporary housings including a range with coloured housing, perfect for co-ordinating with the client's décor.

The Saint combines precise geometric lines into one unit. The Saint stands out thanks to the soft light emitted by the opal PMMA diffuser. The thin profile appearance gives the Saint airiness and subtlety in your interior. Crafted from powder coated steel RAL colour 9006. The Saint can be either surface mounted or suspended (as shown) using the accessories available.

13674 Jointing Accessory

The lamp bodies are made of extruded aluminium and shaped by CNC, and the surface is oxidized after brushing for a superior finish. A specular reflector and light transmission lens are also installed. The length of the suspension cables are adjustable and both can be installed as a continuous system using the 13674 or 13675 accessory.

Commercial premises such as offices, retail spaces and leisure areas can all benefit from professional lighting. Good lighting is not only aesthetically pleasing but is important for the welfare and productivity of the staff.

Choose from a wide selection of wall and ceiling luminaries, as well as amenity and flood lighting, all in a variety of IP ratings for use both indoors and outdoors.

SUR70WHT	70W	Gloss White

The loss of mains electricity could be the result of a fire or a power cut. This may lead to sudden darkness and a possible danger to the occupants, either through physical danger or panic.

Our concise range of maintained and non maintained lighting fulfils most building control emergency requirements, allowing designers to meet with British Standards (BS 5266: Part 1: 2005). Our newest addition is our LED range of emergency modules.

Exodus 13735

Length	320mm

Recessed downlight. A complete and easy solution for LED mains and emergency applications designed as a stand alone unit. Battery pack and components fit togther and are simply passed through the cutout into the void.

An inspiring range of robust exterior lighting solutions for a diverse range of outside environments. Bulkheads and floodlights offer solutions for safety, security and aesthetics, and include low energy options where environmental considerations are key. Our new collections feature the latest in LED technology.
