About us

We are proud to be an independent family owned company, with the sole ownership held by two brothers. Paul Gardner, the company MD has worked in the plastics industry for more than 20 years and he started the company with his brother James in October 2000. Since then, Component Force has been the fastest growing company in its sector, with continued growth year on year. We owe our success to the great team that have helped to drive us forward over the years. With our primary focus on customer service and attention to detail, we always treat our customers in the same manner that we would expect to be treated.

Measuring Guide

(IL)

The (IL) or internal length is the distance from the open end of the grip down to the bottom of the closed end on the inside edge. (On tapered or oddly shaped grips the (IL) refers only to the point at which the straight edge ends).

(ID)

(WT)

The (ID) or internal diameter refers to the distance between the grip's internal wall.

The (WT) or wall thickness is the space between the inside and outside wall of the grip.

Top tip: We always recommend gluing grips into place for a secure fit.

(OD)

(ID)

With a standard ruler measure the external diameter of the tube.

Repeat the first step but this time measure the internal diameter.

From this we can work out the tube size and wall thickness.

Inserts Product Information:

Our range of plastic tube inserts offer an attractive and cost effective way of closing off tubes and box section. Often used instead of time consuming welding processes, our standard range of inserts come in all shapes and sizes to match the metal most commonly used by our customers. Threaded versions allow for the easy installation of Adjustable Feet or Castors. Our extensive range of Tube Connectors offer a quick, simple way of joining box section together to construct framework.

As a manufacturer we offer custom made inserts to suit specific applications and with a dedicated point of contact we make sure that our customers are supported throughout the process.

Our sales team are on hand to answer your questions and to help get your project started. Call now on **01634 686504** to request free samples of our products or for technical advice.

Hooks

- General purpose range of masking hooks
- C-Hook - ideal for wider parts or various thicknesses
- V-Hook - more stable under load, provides superior grounding
- S-Hook - allows flexibility and can daisy chain items together
- 90° Bend - allows different hanging orientation
- Hooks can be supplied with V one end and C the other
- Material: Copper coated mild steel
