

Round Bottom Liner

NITTEL Round Bottom Liners are the ideal solution for lining your drum or pail. Our liners are available in a range of materials.

NITTEL Round Bottom Liners are manufactured by welding a circular disc to one end of an open ended tube of material. The weld then forms a liquid tight seal. This technology provides a high level of tear resistance. The accurate fit of the liner reduces the formation of creases and air pockets, which is often a problem with ordinary flat bags.

Use:

Pails: 5 to 40 litres

Plastic drums: From 30 to 225 litres

Steel drums: From 60 to 225 litres

Versions:

Open at the top

Top Closed

Material:

Mono films made of LDPE (anti static and conductive), HDPE (antistatic) and Polyamide

Co-extrusion films (anti static and conductive)

Aluminium foils

Application Examples:

NITTEL LDPE - Ideal for liquid, paste material, powder and granulates.

NITTEL Polyamide - Ideal for hot filling up to 180°C and for products with a high solvent content.

NITTEL co-extrusion - Ideal for hot fillings of up to 120°C and for products with solvent content.

NITTEL aluminium foil - Ideal for (reactive) hot melt adhesives.

- Can be used in all types of containers.
- Many different heights and diameters available.
- Protects valuable product from contamination.
- Can be used in new, standard, and reconditioned containers.
- Makes single trip containers genuinely multi trip.
- EU & FDA food approved materials available.
