

# Comfort Digisystem Work Set 2

Transmitter  
Conference Microphone DC20

Receiver  
Receiver DH10

Transmitter  
Microphone DM05

Comfort Digisystem Work Set 2 gives entirely new possibilities for access to good speech perception even on distances and in noisy environments. The set contains a Conference Microphone DC20, with unique sound quality and a small microphone, Microphone DM05 that can be used during presentations.

This gives the person with hearing impairment the possibility to hear speech in both small and larger meetings, with or without a lecturer. There are many choices in order to adapt your own set for a perfect speech perception.

Conference Microphone DC20 captures speech from a distance and in combination with a lecture Microphone DM05 gives the user the possibility to hear both lecturers and other participants in meetings and conferences! The person with hearing impairment can choose between picking up sounds

from only one microphone or both. The person that listen with the hearing aid in T-position can wear a Receiver DH10 with a neck loop.

The digital sound processing PSE (Perceptual Speech Enhancement) in the Conference Microphone DC20 and its special speech-AGC in the Microphone DM05 makes Comfort Digisystem Work Set 2 a very good solution for persons in working life.

Conference Microphone DC20 also contains double headset-function for Bluetooth-phones.

## Comfort Digisystem Work Set 2 includes:
