- We assist each individual industry product requirement for sealing and gasket design.

Our Benefits

- Extensive knowledge of products and services with combined experience.
- Working with customers.
- Planning projects.
- Competitive budgeting.
- Flexibility in manufacturing process.
- Cost effective solutions.

MANUFACTURERS OF PRECISION SEALS AND GASKETS

Services We Offer

Extrusions

Our extrusions can come supplied either adhesive backed or plain. We specialise in applying adhesive backing to Silicone materials.

Profile Cutting

Profile Cutting different shaped profiles, can be fed through our cutting machine to reach the desired length.

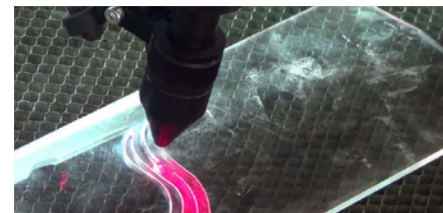

Die Cutting

Die Cutting involves a bladed tool set into the shape of the required cut. The tool is set on top or underneath the material, a press then applies pressure onto the tool, punching the blades through the material giving you the required shape.

Laser Cutting

Laser cutting speaks for itself, a beam of light that is magnified to burn through a range of materials. This is useful for rubber, sponge, plastics and films.

Moulding

C&W Seals offer a rubber moulding service where rubber compound is placed into a tool, compressed and heated, creating a solid rubber part suited to our customers needs.

Flash Cutting

Using a 5 head tool we can cut, punch, mark and drill with a wide range of materials up to 20mm thick from paper to polyurethane.

Products

- Gaskets
- Reflectors & Diffusers
- O Rings & Washers
- Light Tuning & Colouring Changing films
- Adhesive Backed Material

Materials

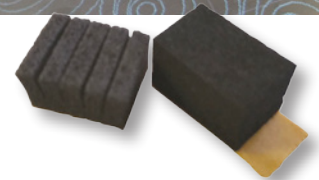

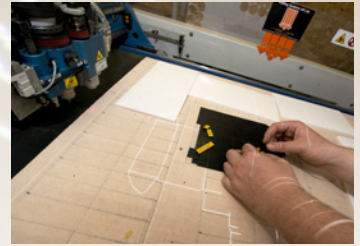

- Rubber
- Sponge
- Fibre
- Plastic
- Paper

Flash Cutting

Flash cutting is the latest technology here at C & W Seals. Using a 5 head tool we can cut, punch, mark and drill with a wide range of materials up to 20mm thick from paper to polyurethane.

The advantages for using Flash Cutting are:-

- Create logo shapes etc
- Supply CAD file design
- 5 tool head
- Cut, punch, mark drill and prick materials
- Materials include paper & polyurethane
- Up to 20mm thick
- Manage material waste
- Save money
- Economical
- Minimum quantity 1 to infinity

Light Reflective Materials

Furukawa MCPET

Leading distributor and converter in the UK and Europe

With a wide range of different stock light reflective, diffusing and tuning materials, C&W Seals will provide what you are looking for at the best price.

We provide the high end mainstream materials as well as some cheaper alternatives.

FURUKAWA
ELECTRIC GROUP

In 2007 MCPET was introduced to the European lighting industry, and is now the bench mark used by many market leading manufacturers.

MCPET's has exceptionally high performance as a reflective material, and has many advantages over alternative materials such as films and aluminium.

It is ideal for use with LED's with its micro cellular structure by reflecting light in a highly diffusive way eliminating the hot spots of light providing homogeneous light on the diffuser or lens surface.

It's versatility and rigidity make it easy to install and being plastic gives isolation properties too.

We provide services to:-

AUTOMOTIVE

ELECTRICAL & LIGHTING

MINISTRY OF DEFENCE

PHARMACEUTICAL

CONSTRUCTION

HEATING & INSULATION

DOMESTIC APPLIANCES

MARINE

CONVERSION INDUSTRY

“

We have dealt with C&W Seals for some time now and have always found them helpful, competitive, knowledgeable and willing to go the extra mile when needed. A fine example of UK manufacturing.

I have always found C&W Seals to be extremely helpful and a pleasure to deal with. They have fantastic customer service and would highly recommend them to anyone.

Keep up the great works guys.

C & W Seals and gaskets have been a supplier to Viking Extrusions since 2004. During this period C & W Seals have provided an excellent service and quality products within the expected delivery dates.
