PACKAGING NEEDS

Customised Packaging Ltd – Vacuum Formed Tray Recycling

At the end of the customer's products life cycle. The old trays that were used for transport of WIP and finished goods are returned by the customer.

First step is to remove any contamination.
Check the material specification and quality
Then cut them into small pieces ready for granulation

The new sheet is then formed into new trays or other packaging to support the customers latest products. Potentially coming back again in a few years time.

**Recycling is not difficult if
planned in advance**
