

'Compac' Solvent Cleaning Systems

Cost-Effective Precision Cleaning

Introducing the new 'Compac' range of compact, ultrasonic, solvent cleaning machines.

'Compac' machines offer a cost-effective solution to your precision cleaning problems. The range comprises three models, each one simple to operate and providing safe and environmentally responsible, precision cleaning using low-toxicity HFE or HFC solvents.

Every 'Compac' utilises electric heating and refrigerated cooling with full safety circuitry to protect against high vapour level, low solvent level and high solvent temperature. The machines are controlled via a user-friendly PLC with touch screen operator panel. Within the process chamber, there are two immersion cleaning stages, one with ultrasonics, plus vapour rinsing. You also get process filtration as standard on the ultrasonic cleaning stage to ensure consistent, high-quality cleaning performance. The innovative design of each 'Compac' machine also means they use very little energy, particularly important in these days of ever-rising energy costs.

'Compac' machines are designed with flexibility in mind because they are completely self-contained, are supplied with lockable wheels for ease of movement and do not require connection to external ventilation ducting. All they need is a power supply and they are ready to go!

'Compac' 1

'Compac' Features:

- Stainless Steel Construction.
- Three Models in the Range.
- Use Low-Toxicity HFE and HFC Solvents.
- User-Friendly, Manual Operation.
- Ultrasonic Immersion Cleaning.
- Electric Heating.
- Refrigerated Cooling for Low Solvent Usage.
- PLC Control with Touch-Screen Interface.
- Process Filtration.
- Full Safety Circuitry.
- No Rim Ventilation Required.
- Lockable Wheels for Easy Movement.

'Compac' Range:

MODEL:		'Compac' 1	'Compac' 2	'Compac' 3
Overall Length	mm	1240	1505	1720
Overall Width	mm	900	1020	980
Overall Height	mm	1620	1780	1850
Basket Load Height	mm	1180	1216	1220
Basket Length	mm	230	155	235
Basket Width	mm	100	325	325
Basket Height	mm	120	150	180
Solvent Charge	litres	15	30	40

The above data is approximate for illustration purposes only.
