Unit 3 & 4 Telford Court, Telford Drive, Newark, Notts, NG24 2DX

# MATERIALS HANDLING

CJ Waterhouse Company has extensive experience supplying plant specific materials handling solutions to a variety of industry sectors. Whether your requirements are for powder, solid or liquid handling systems we can offer the best possible solution in terms of reliability, efficiency and longevity.

- MATERIAL STORAGE & DISCHARGING
- TRANSFER & CONVEYING SYSTEM
- WEIGHING, METERING & MEASURING
- BALE HANDLING & PROCESSING
- BAGGING & PACKING
- WRAPPING & PALLETISING

# PROCESS CONTROL & AUTOMATION

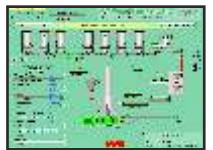

In house designed control and automation systems utilising the latest technology with respect to PC and PLC hardware ensures all systems provide the highest possible levels of performance. From stand alone machine control to plant wide production and monitoring systems utilising server based PC networks and structured PLC plant control, we can deliver and implement the control you need.

Our skilled engineering team have vast experience in system design utilising leading PLC brands such as: Siemens, Mitsubishi and Allen Bradley. PLC's are used to provide all plant control whilst PC and SCADA systems provide plant monitoring, data processing and human-machine interfacing.

We provide our customers technologically advanced control systems incorporating user friendly operator interfaces and informative plant graphics / mimics.

From rubber compounding plants to Airport baggage handling we have the experience and customer dedication to supply you with the package that best suits your needs.

## WEIGHING SYSTEMS

From stand alone off-line platform scales to fully automatic mobile weigh carriages we have the experience to deliver a system to meet your specific needs. With extensive knowledge supplying custom weighing equipment our engineering team can design and implement weighing solutions to meet your highest demands for reliability, accuracy and safety.

We are constantly striving to improve our product range by implementing the latest weighing technology, which together with advanced system design ensures the supply of equipment above and beyond your requirements.

- BULK POWDER WEIGHING
- MINOR INGREDIENT WEIGHING
- LOSS IN WEIGHT SYSTEMS
- PLATFORM SCALES
- LIQUID WEIGHING
- CHECK WEIGHING
- WEIGH CONVEYORS
- SPECIALIST WEIGHING MACHINES

## SPECIAL PURPOSE MACHINES

No matter what your specialist machine requirements our wealth of experience providing custom designed machinery for specific applications enables us to provide solutions that meet even the most demanding of specifications. Whether your needs are for weighing, handling, wrapping or packing we promise to deliver the system to suit your plant requirements.

## INSTALLATION, COMMISSIONING & SUPPORT SERVICES

We supply our customers varying levels of service depending on their specific requirements. From equipment supply only to installation supervision and full mechanical and electrical installation services CJ Waterhouse Company can offer the package to suit your exact needs. Supply and installation services coupled with full system commissioning, comprehensive after sales support and preventative maintenance programs make us a true TOTAL TURN-KEY system supplier.
