

ADHESIVE DIVISION

Inseto's Adhesive Division provides technically advanced adhesives for bonding, sealing & encapsulation throughout the UK & Ireland.

Exclusively representing DELO Industrial Adhesives, our adhesive division has the technical expertise to advise on all your project requirements.

Inseto's experienced specialists will help with product selection, lab testing, trials, qualifications and application methods.

UV CURED ADHESIVE: DELO PHOTOBOND

- Rapid curing with UV or visible light
- Curable through translucent plastics that filter UV
- Provides invisible, high-strength bonds
- Single part in a range of low to high viscosities

UV CURED AND LIGHT ACTIVATED EPOXIES: DELO KATIOBOND

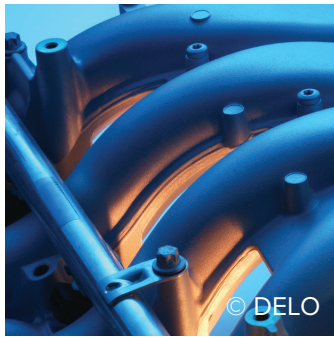

- Light activated versions can be used in opaque applications
- Epoxy base ensures dry surface after cure
- Excellent chemical resistance
- Single part, ideal for manual or automated processing

DUAL CURING ADHESIVES: DELO DUALBOND

- Initial cure with light for handling or securing
- Full cure with heat and light or moisture
- Ideal for applications with shadow zones
- Excellent adhesion to many substrate materials

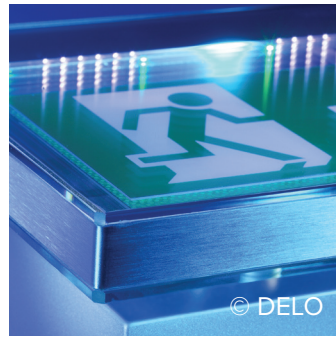

INSETO ADHESIVE DIVISION

© DELO

ONE PART HEAT CURED EPOXY RESINS: DELO MONOPOX

- Single part materials that require no mixing
- Curing temperatures from 60 degrees C
- Excellent temperature and chemical resistance
- Electrically conductive and non-conductive versions

© DELO

TWO PART EPOXY RESINS: DELO-DUOPOX

- Fast curing at room temperature
- Low-high viscosities and gap-fill versions available
- Uniform stress distribution with long-term durability
- Excellent adhesion to similar and dissimilar substrates

© DELO

ANAEROBIC ADHESIVES: DELO-ML

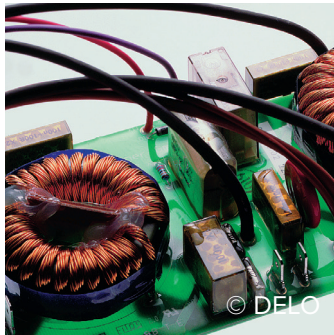

- Quickly cure at room temperature
- Can prevent corrosion
- Easy to remove, low strength versions
- Excellent adhesive for metal bonding or sealing

© DELO

CYANOACRYLATE ADHESIVES: DELO-CA

- Instant bond in seconds at room temperature
- Low viscosity materials with thin bondlines
- Easy to use, single part adhesives
- High tensile and shear strengths

© DELO

SILICONE ADHESIVES AND SEALANTS - DELO-GUM

- Industrial grade silicone adhesives and sealants
- One part moisture cured or two part reactive curing
- Excellent temperature, chemical and aging resistance
- High purity versions ideal for electronic applications

© DELO

POLYURETHANE ADHESIVES - DELO-PUR

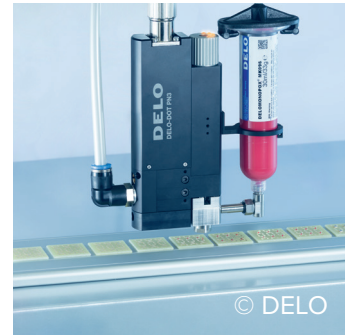

- Two component adhesives in automix cartridges
- Excellent strength with static and dynamic loads
- Ideal for larger bonding areas
- Good tension-equalizing properties

© DELO

DELO - REFERENCE APPLICATIONS

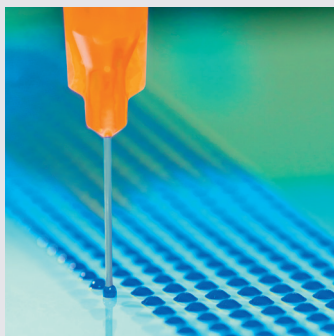

DELO's adhesives are used for joining, bonding, sealing, encapsulating, potting, gasketing, mould etc., throughout a wide range of industries

ADHESIVES DISPENSING EQUIPMENT & ACCESSORIES: DELOMAT

Dispensing of DELO & other manufacturers adhesives can be achieved with the DELOMAT 100 dispense unit and associated accessories. The DELOMAT 100 can be easily integrated into any production environment.

Established in 1987, and ISO-Certified since 2005, Inseto supplies equipment, materials and consumables to microelectronic manufacturers and research institutes in the UK, Ireland and Nordic Regions.

Customer support activities are at the centre of Inseto's "Total Customer Service" philosophy, where we aim to understand, communicate and fulfil the needs of our customers, better than any competitor. We are committed to meeting these requirements through the application of high standards of quality and customer care, both before and after sales, by continually investing in training & adopting a policy of continuous improvement in our Company and its people.
