

External Sounders

Professional Intruder Alarm Equipment

ES-120

ES-130

D-Lux Backlight
Decoy Backplate &
Dual LED Flasher Module

Exceptional Design
and Performance

The ES-120 is a grade 2 sounder and is suitable for domestic and small commercial sites. The ES-130 is a grade 3 sounder, designed for larger commercial sites.

Both sounders have tamper protection to guard your alarm system from a potential sabotage attack.

Optional Extras

D-Lux Backlight

The backlight illuminates a sounder's front cover for visibility during darkness. The brightness level of the backlight is selectable, along with its flashing mode when the alarm is triggered.

Decoy Backplate & Dual LED Flasher Module

The Decoy sounder mimics the live external sounder, without the additional cost and wiring, to act as an extra deterrent in remote parts of a property.

The Dual LED Flasher Module comes with ultra-high visibility LEDs, programmable flashing options, plus an extended battery life of up to six years.
