

# FALCO JONA

## FALCOJONA AFVALBAK

The FalcoJona is a reinforced steel litter bin with a simple European design.

The litter bin is exceptionally heavy duty and compact making it ideal for public locations such as high streets and car parks.

**AESTHETICAL** | simple and stylish

**DURABLE** | long lasting and rust resistant

**SUSTAINABLE** | fully recycable, long lasting and no maintenance required

## FALCOJONA LITTER BINS

The litter bin is equipped with a solid security lock and triangular key to allow access to the inside container. The inside container features two handles to facilitate the process of emptying.

The FalcoJona is available in a 50, 70 or 100 litre capacity. The 50 litre version is optionally available in a wall mounted variant.

The FalcoJona is manufactured from zinc plated steel with the inside container manufactured from galvanised coated steel, these materials boast a long lifespan and are fully recyclable.

All steel parts of the litter bin can be polyester powder coated in any of the 192 standard RAL colours to increase durability.

**WALL MOUNTED VERSION**

**50 LITRES**

**70 LITRES**

**100 LITRES**

## OPTIONAL

### Spring-loaded valve

The 50 litre version is optionally available upon request with a spring-loaded entrance valve, ensuring the litter bin is kept enclosed at all times.

### Anti fireworks valve

An anti firework entrance valve is optionally available upon request for all FalcoJona models which temporarily blocks the opening of the bin whilst the firework is live. This feature provides increased safety during periods of celebration such as bonfire night and new years eve. The valve is easy to install and can be operated with the same Triangular key required to open the litter bin. The valve is zinc plated and can be powder coated in a RAL colour.

### Integrated ashtray

The FalcoJona is available with an integrated ashtray upon request which simply slides into the entrance of the litter bin using the same Triangular key used to open and close it.

The ashtray is available for all versions of the FalcoJona litter bin and is manufactured from zinc plated steel which can be powder coated in a RAL colour upon request. The ashtray can incorporate logos or symbols upon request.

For more information about the FalcoJona or any other product from our litter bin portfolio, please contact our helpful Osales team on 01538 380080.
