Machine Covers Limited launches new website

We are pleased to announce that our newly-designed website is now up and running - www.machinecovers.co.uk

Our main aim was to develop a customer-focused website, providing all the information our visitors need in a format that is quick and easy to use. So as well as giving our site a brand new look we have also incorporated some improved features and all the latest information about our products and services.

Features new products

The new site has been created in Wordpress, enabling us to keep our product pages up to date easily and efficiently so that the most recent information is always available.

For example, in the safety guards section you will find details of our newly-launched lathe safety products, the Spider 50 and Spider 75, as featured in our [October newsletter](#).

We will be adding more new products as they are released.

October 2017
Lathe Safety

The Spider - an innovative new tool for sanding and finishing parts quickly, easily and safely on conventional manual lathes

There is no longer any need to undertake dangerous sanding operations by hand with risk of serious accidents caused by holding emery cloth or sanding pads. The Spider 50 and Spider 75 have been conceived in accordance with ISO 23125 Standards 6.2.1 (no use of hands during working operations) to ensure compliance.

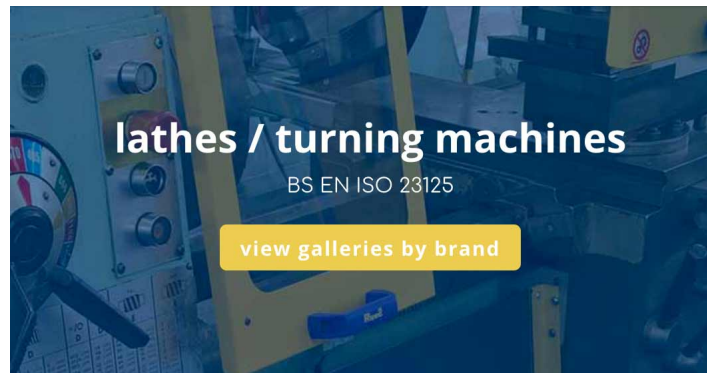

Why do you need the Spider?
The Spider provides safe, controlled, accurate deburring, polishing, sanding or sizing of a wide range of cylindrical, tapered and threaded metal, alloy or wooden components without the use of hands, as instructed in the Standards.

More rich website content

[Past Issues](#)

galleries by brand.

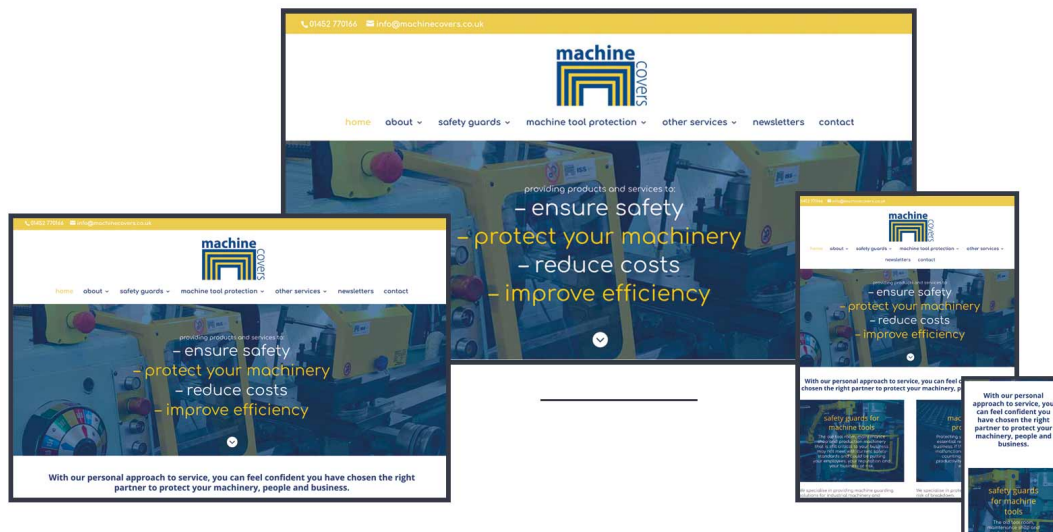

This will make it easier for visitors to see our safety guarding in place on specific machine types and to find examples of machinery that is similar to their own.

Please take a look at our [lathes/turning machines section](#) to see how the new gallery works.

Responsive to all devices

Another major feature of our new site is that it is responsive and works on any device from a desktop computer or laptop to a tablet or smart phone. This makes it easier for us to keep all our information up to date and provides a better experience for our visitors across all platforms.

Blog coming soon

All our newsletters are available on the website and we will continue to publish these on a monthly basis.

[Subscribe](#)[Past Issues](#)

will include case studies, latest company and product information, industry news and other items.

Our aim will be to make all our content more accessible so that you can search for the information you need within the blog. If there are any specific topics you would like us to cover in our newsletter or blog **please let us know**.

WE NEED ★ ★ ★
YOU!

We want to ensure that our website meets our customers' needs so if you have any feedback or suggestions **please contact us**.

For more information about our products and services please **email us** or call us on 01452 770166.
