## The Health and Safety Event 2018

Thank you to everybody who visited us and our partner company, ISS Safety Limited, at the Health and Safety Event which took place at the NEC in April. We enjoyed meeting you all and we hope that we were able to help.

### Event highlights

We were proud to demonstrate some of our products for the first time at the event, for example the new Spider tool that provides a safer way to sand or polish components using a manual turning lathe based on the guidelines available from the HSE.

Pete Bratchell, one of our Installation Engineers, gave real-time demonstrations of the new Spider sanding/polishing tool which proved to be very popular. The Spider is now a stock item for the first time.

## Spider tool in operation

### Recent and innovative products

Some of our other most recent and innovative products were also featured at the event:

**operator's view of the Spider 50 sanding/polishing tool working through the new TW RAD interlocked chuck guard (left)**

**end-on view of the Spider 50 in operation, illuminated by the built-in led lighting under the new TW RAD chuck guard (right)**

Low voltage led lighting is now available across most of our product ranges.

**our new universal Colchester and Harrison roller unit which was previewed at the Health and Safety Event for the first time (left)**

**close-fit milling machine guards for vertical mills – the most popular guards in our product range and the most common**

**a fully-compliant Harrison M300 lathe fitted with the new TW RAD interlocked guard with gas strut assisted lift and lock (left)**

**an example of valve interlocking (right)**

This innovative safety product proved to be a hit with professionals from fields as diverse as food manufacture, the chemical industry and water treatment

**working safety control panel on display at our stand (right)**

Our partners ISS Safety Ltd were able to demonstrate and discuss the very latest safety system design and component parts at the event.

## Working with our partners
