Machine Covers at EMO 2017

**Machine Covers Limited was proud to support Repar2
on their stand at EMO Hannover 2017**

We would like to take this opportunity to thank everyone who visited the Repar2 stand to say hello and look at some of the new products that we had on show for the first time. The stand was busy throughout the event and it was great to be there with our friends at Repar2.

Friends old and new

A successful event

Major and minor chuck guards on display at the stand

We were pleased to be able to launch our new safety belt sanders for lathes – the Spider 50 and the Spider 75 – at the event. This brand-new product has been jointly developed by Machine Covers Limited and Repar2 in accordance with ISO23125 Standards 6.2.1 (no use of hands during working operations). The new Spider allows lathe operators to polish and deburr rotating parts without using sanding pads or holding a strip of emery cloth between their hands.

The new Spider

We will showcase full product details in next month's newsletter after we take delivery of the first production run of Spiders from Repar2.

The Spider at EMO

We were also pleased to showcase the 5w 24v AC/DC IP67 rated LED lighting systems that are now available across much of the product range.

LED lighting systems

For more information about our product range please **email us** or call us on 01452 770166.

Look out for our October newsletter for more details of the Spider 50 and Spider 75.
