EPDM WET POUR RUBBER SURFACING

Specialist Safety Surfaces for Children's Playground Flooring

SSP WET POUR RUBBER SAFETY SURFACE... is a bonded rubber surface designed for children's playgrounds and safety areas. It is a two layer system consisting of a base rubber and a top wearing layer of rubber crumb which is bonded with resin on site.

SOLID GRAPHICS & GAMES are available to create themes and educational aids or a flecked surface can be created using a mixture of colours.

Fitness Games

Numbers

WET POUR RUBBER .. provide a bouncy safe "All Weather" playground flooring suitable for run around areas and around playground equipment. The fall height required around a piece of playground equipment is created by varying the thickness of the rubber flooring. For details see below.

Multi-Coloured

Critical Fall Height	
15mm	- 0.5m
20mm	- 0.6m
30mm	- 0.8m
40mm	- 1.3m
50mm	- 1.5m
60mm	- 1.7m
70mm	- 1.9m
80mm	- 2.0m
90mm	- 2.2m
100mm	- 2.4m

POINTS TO CONSIDER FOR YOUR NEW PLAYGROUND FLOORING :

Area size in metres - the whole playground area or part

Colours - black/ single colour/ multiple colours

Graphics - game, numbers, roadways, activity trails

Depth required - 40mm is the most common depth laid, onto a compacted type 1 base. Below 40mm wet pour, a concrete/ tarmac base is required. The depth around playground equipment is specified by the equipment manufacturer.

Existing Base - Is the existing base suitable or will a new base be needed? Minimum base required is a level 100mm compacted MOT type 1. Wet pour can also be laid over different hard solid bases such as tarmac.

ARTIFICIAL GRASS SURFACING

Artificial Grass for Children's Play

ARTIFICIAL GRASS provides a safe, soft, colourful surface for playgrounds and nursery gardens. Surfaces can be installed to transform muddy natural turf or bland tarmac areas to create all weather playgrounds.

Safe Play Flooring

Free Flowing Outdoor Play Space

Play Mound

Can be laid around trees

ARTIFICIAL GRASS SURFACES are available in a range of colour specifications to suit your specific requirements. An emphasis can be placed on sports, education and leisure activities or simply for aesthetics, with a choice of artificial grasses available.

Hard Lanscaping Area

Mud Free Play Area

Storytelling

PROPLAY ARTIFICIAL GRASS systems combine artificial grass with a proplay impact drainage mat for use around play equipment or simply where safety is needed. Proplay mats can provide a critical fall height from 1.3m to 3m by combining the varying thickness of pad.

Soft Fall Flooring

Rubber Impact Absorbing shockpad & Artificial Grass System provides a safe play surface suitable for playground and nursery gardens

ARTIFICIAL GRASS SURFACING

Sports Pitches & MUGAs -

The main artificial grass types for children's sports pitches are below. Depending on the sports being played and the ages of the user, each can provide a high quality sports area for schools. SSP can advise and provide samples, plans etc. so you can choose the best surface for your school sports surface.

Sand Filled	Sand Dressed	MUGA
<p>One of the first artificial grass sports systems. Suitable for a wide variety of sports including football. A hard-wearing surface suitable in primary schools.</p>	<p>A development from the sand filled sports system. Especially good for playground sports surfaces and for fast sports such as hockey.</p>	<p>A MUGA (multi use games area) can be constructed from painted tarmac, artificial grass sports surface or a polymeric surface. It is essential that the surface type is matched to the types of sports it is designed for.</p>

Polymeric	3G
<p>Polymeric surfaces are also suitable for MUGAs. Made from the same rubber as 'wet pour rubber' they have an excellent porosity and impact absorption. They are considered a good all-round surface and are especially good for netball.</p>	<p>3G artificial grass is a longer pile grass (40 - 60mm) with a sand and rubber dressing. The development of 3G has been seen as a breakthrough in artificial grass surfacing and is considered the closest to natural turf. The ball bounce is excellent for football and rugby but not suitable for tennis.</p>

MUGA - multi use games area

Artificial Grass for Playground Sports Surfaces

Artificial grass can transform a tarmac playground into a multi or single sports pitch.

Playground Mini Pitch

Artificial Grass Playground

Maximise your space with an Artificial Grass sports pitch. We can transform your tarmac playground into the sports pitch you dream of. We have a wealth of expertise on sports surfacing and can offer a complete installation service including ongoing maintenance of your pitch. Schools have found that playground sports pitches can increase pupil participation and widen community involvement

CLIMBING PLAYGROUND EQUIPMENT

Clamber Stacks-

CLAMBER STACKS are great as a stand alone piece of playground equipment or can be combined with other pieces of equipment. The robust and sturdy climbing frame will give many years of enjoyment to it's users.

Our clamber stacks are made by a UK manufacturer, who have been producing timber playground equipment for over 50 years. Manufactured from traceable UK timber that has a 10 year warranty against fungal and insect attack.

CLIMBING PLAYGROUND EQUIPMENT

TOWER CLIMBING FRAMES -

Tower climbing units can be single, double, triple or more, towers interconnected by walkways, bridges fireman poles, nets and more.

Available in varying platform height making them suitable for toddlers to tweenies.

Play panels add additional interest.

Steel units also available.

Two Tower Unit with slide

Games panels can be added

SHELTERS and STAGES ~ UMBRELLAS and SHADES

GAZEBOS and SHELTERS

Whether for teaching outside or playtime, SSP has a superb range of gazebos, shelters and stages.

Our **Timber Gazebo and Shelter** options include seating, half or whole sides, windows and flooring and come in a range of sizes. Gazebos are ideal for providing less formal teaching spaces or for taking shelter from the elements. With increased emphasis nowadays on teaching outdoors and allowing exploration, a gazebo allows much more comfort for teachers and pupils.
