

CONVEYING SYSTEM CONTROLS

NET-SYS: Electronic control with full logic microprocessor and touch screen panel with colour graphic display providing easy set up and management of your material conveying system.

This modular open system means that it is easily expandable for the connection of additional vacuum pumps and material receivers.

EXTENSION

Up to No.2 material conveying lines with 30 material receiver stations each (total of 60 material receiver stations)

STANDARD FEATURES

- PLC Server
- Module MODBUS TCP-IP
- Module ETHERNET
- Colour graphic display screen (3.5")
- Painted steel control cabinet
- Visual and audible alarm

OPTIONAL

- Special software up-grade for further expansion
