INDUSTRIAL COMMS

Industrial Communication Products Ltd.

Axiomtek and Phoenix Contact are world-class Designers and Manufacturers of Industrial Computers and Embedded Systems

AXIOMTEK

PHOENIX CONTACT

Our Product Range

Monitors

- Industrial-grade touch screen monitors
- Ideal for applications where display is seperate from PC
- Various mounting options - wall, desktop and VESA

Rackmount PCs

- Industrial computers and chassis in industry-standard 19" rackmount enclosures
- Available in 1U, 2U and 4U formats
- Robust and high-performance

Industrial Box PCs

- Compact, low maintenance and robust industrial PCs
- Ideal for mounting directly in the control cabinet
- DIN Rail mounting option

Embedded PCs

- Fanless designs with low-power consumption
- High performances and expandable
- Ideal for vertical market application

Tablet PCs

- The ultimate in portable computing
- Robust touch screen designs
- Wireless communications for on the move functionality

Ruggedized PCs

- Tough box computers for demanding applications
- With extended operating temperature range
- Robust design to withstand shock and vibration

Panel PCs and HMI Panel PCs

- All in one PC and monitor combination
- IP65 protection
- Ideal for plant operation and visualisation
- Optimised for SCADA, OPC, VBA and Web applications
- Wide range of communication options - wireless, serial, Ethernet, USB etc

Industrial PC Products for Specialist Markets

Hazardous Environments

- Box PCs with DIN rail mounting option
- ATEX C1D2 (Class 1 Division2) certified
- Approved for use in hazardous areas, ignitable materials etc

Food and Beverage

- Panel PCs fabricated in SUS316 stainless steel enclosures
- IP66, IP69K and NEMA 4X certified
- Water, dust and corrosion proof

Power Transmission and Distribution

- Robust 19" rackmount PC
- Approved to IEC61850/IEEE 1613
- Designed for electrical substation applications

In-vehicle Systems

- Robust box PCs
- Optimised design for use in road vehicles
- E-Mark and ISO7637 certified

Rail Systems

- Robust panel PCs with touch screen operation
- Certified to EN 50155 and EN 50121
- Range of configuration options available

Maritime

- Box Systems and panel PCs certified for maritime use
- DIN EN60945 and DNV2.4 approved
- GL, LR, BV, DNV and ABS approved

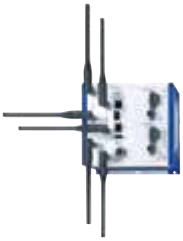
Medical Systems

- Medical grade panel PCs with wall, desktop and VESA-mount options
- Certified to EN60601-1 and CE standards
- Antimicrobial spill-proof design

Industrial PC Value Added Services available from IndustrialComms

- Hardware Configuration Service available, covering Processor, Memory, Storage, Communications and mounting options.
- Software Customisation and Installation Service available, covering BIOS, OS/ RTOS, Drivers and Application Software.
- System Integration Service available covering interfacing with 3rd-party hardware, configuration and testing.
- On-Site Installation Service available.
- Extended warranty and support options available on request.

Other Products from IndustrialComms

Ethernet Media Convertors	Ethernet Switches	Ethernet Extenders	WLAN	Remote Access
				


Serial and Fieldbus Fiber Repeaters	**Fieldbus Gateways**	**Serial to Ethernet Gateways**	**Fiber-Optic Modules**	**Power Supplies**
