

## **HSM-4 Mini Heat Sealer**

The satisfactory development, manufacture, conversion and application of flexible packaging films necessitates the implementation of precise methods of quality control systems. The HSM-4 was developed to precisely control the parameters essential in determining the heat seal threshold. Especially suited for flexible packaging materials, laminates, foils and paper, the HSM-4 features accurate control of temperature, pressure and dwell time of a standard surface area sealing jaw. With the introduction of a standard test method ASTM F2029 and our heat sealer HSM-4, you can be confident that your heat seal threshold measurement is common to all producers, converters and end users of flexible packaging materials and their eventual applications.

Meets ASTM F-2029 (only when top/lower jaw heated)

## **HSM-4** Mini Heat Sealer

The HSM-4 also features a unique method of quick change over jaws, the machine employs a slide-on jaw arrangement. The machines comes with dovetailed blank heater blocks, in single or dual option, where standard flat ground surface slide-on jaw is supplied. When profiled crimp sealing surface is needed, mating dovetailed slide-on jaw are replaced very easily.

Ground flat sealing jaw with blank and dovetail mating

**Temperature Control:**  $0 - 300^{\circ}\text{C}$   $(0 - 572^{\circ}\text{F})$   $0.1^{\circ}\text{C}$  resolution +/- 0.5% +/- 1 digit accuracy. Operating temperature accuracy +/-  $2^{\circ}\text{C}$ . Resistance Type 'J' thermocouple sensing. Single independent or dual independent control

**Pressure:** 0 – 100psi (0 – 6.8 bar, 0 – 689 Kpa) via dial pressure gauge. Pressure control through precision regulator. Repeatability +/-5.0 PSI Operation accuracy +/-10% Supply via factory compressed air line or nitrogen or compressed air bottles min 6 bar (90 psi) max. 7 bar(100 psi). Pressure medium must be clean and dry.

**Dwell Time:** 0.1 – 99.9 sec. 0.1 sec resolution real time base via quartz crystal +/-0.5% of range. Operating accuracy +/- 10% (taking into account friction in piston movement).

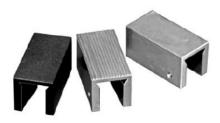

**Footswitch:** Connection port for footswitch operation. Optional footswitch.

**Sealing Jaw Std:** Single jaw option: Top heated with silicone rubber (60 shore hardness) 5mm – 25mm wide x 50mm long. Jaws made from aluminium with machine ground flat face. Dual jaw option: Top and Lower heated 5mm - 25mm wide x 50mm long. Jaws made from aluminium with machine ground flat face.

**Environment:** 5-50C ambient operating temperature, RH 75% max (non-condensing)

**Power:** 240V AC 50/60 Hz (110V AC voltage available on request)

**Option:** Footswitch. PVC Dust cover. Up-grade to digital dwell timer. Crimp profiled slide-on jaws  $120 \deg x \ 1.8 \ \text{mm}$  pitch. Cold Seal Option (temperature circuit re-moved) supplied with flat or crimp profiled jaws. Teflon coated tape or permanent Teflon coating Digital thermometer and s/s band probe to check the actual temperatures of sealing Jaw.

Crimped profile sealing jaws matching pair. Normal size 25mm x 50mm but can be anywhere from 5mm up to 25mm wide x 50mm long.

Thermometer and s/s band surface probe to check jaw temperatures.
