

Zenith SR1

Demarcation / Welded mesh

The Zenith SR1 mesh panel fence is a strong and flexible perimeter protection solution. The fence provides effective anti-climb protection with tightly configured mesh (76.2 x 12.7 mm) preventing toe or finger holds. The strong steel mesh panel is SR1 rated to resist continuous forced entry attempts with a standard intruder toolset (knives, pliers and screwdrivers) for at least 1 minute.

The mesh panels are securely attached to the posts with a flat bar and M8 bolts (with form G washer and nut).

An extra option is to have the mesh buried 300 mm in the ground to prevent intruders tunnelling under the fence (this option is not available if fence posts are mounted on a base plate at ground level).

Vertical arms, lean over arms, Y and T bar extensions, plus barbed wire toppings, can be added to enhance security. The Zenith SR1 is ideal for factories, commercial properties, schools, railways and hospitals.

- **LPS 1175 SR1 rated against intruder tools**
- **Secured By Design accreditation**
- **Tight mesh configuration prevents climbing**
- **Mesh buried 300 mm in the ground to prevent tunnelling (optional)**
- **Quick and easy installation**
- **Easily combined with gates and detection**

Technical specifications

Post length (A)	Panel height (B)	Post dimensions	No. of fixings
2400	1800	60 x 60 SHS	7
2700	2000	60 x 60 SHS	8
3100	2400	60 x 60 SHS	9
3820	3000	80 x 40 RHS	11
5200	4200	80 x 80 SHS	15
6200	5200	100 x 100 SHS	18

Material	Steel
Colour (other colours available upon request)	RAL 6005 (moss green) RAL 9005 (jet black)
Finish	Galvanized and polyester powder coated
Mesh profile	76.2 x 12.7 mm
Panel width	2515 mm
Mesh wire diameter	4 mm
Post centre-to-centre	2440 mm

Certificates

- Polyester powder coating according to BS EN 13438
- Hot-dip galvanized according to BS EN 1461
- Tested to LPS 1175
- Secured By Design accreditation
