

[www.karmelle.com](http://www.karmelle.com)

Fast, accurate and fully automatic, Karmelle's British-made Rotary Filling Machines will enable you to up production rates without compromising on quality.

We build each machine with your filling needs in mind, selecting the very best components and adding multiple filling heads (from eight to 24) as required.

Ideal for larger batches, these highly efficient machines can run at speeds of between 40 and 200bpm (depending on product and number of heads).

#### Our range of **Rotary Filling Machines** includes:

- Gravimetric
- Volumetric
- Flow Meter
- Balanced Pressure Systems

Karmelle's highly-skilled team will continue to support you after your rotary filler has been installed. We pride ourselves on the quality of our service, responding to spares and maintenance requests quickly, and keeping machine downtime to a minimum.
