

Polar Pod

The Polar Pod range of pallet shippers has been introduced to complement our reusable pallet shipper range. The range has been developed to reflect customer demand for a single use modular system that provides excellent performance. The systems combine a number of technologies ensuring safe transport, by land and air, of perishable products in 3 categories:

- + Deep Frozen: -18 to -14°C
- + Chilled: +2 to +8°C
- + Ambient: +15 to +25°C

Polar Thermal Packaging Limited is a UK manufacturing company based in Warminster, Wiltshire. We have an excellent track record in developing solutions for the medical, military and retail sectors.

Capacity Options

The system comes in 3 sizes:

- 1500 x 1200 x 1000
(1.5 m3 internal capacity)
- 800 x 1200 x 1000
(1 m3 internal capacity)
- 400 x 1200 x 1000
(1/2 m3 internal capacity)

The tri-wall cardboard shell combines with a liner made from insulated foil wrapped Polartherm™ fibre and appropriate coolants/gel packs/phase change packs to deliver fantastic results over 30, 48 and 72 hours. The Deep Frozen system has an additional thermal foam wall.

Pallet Shippers:

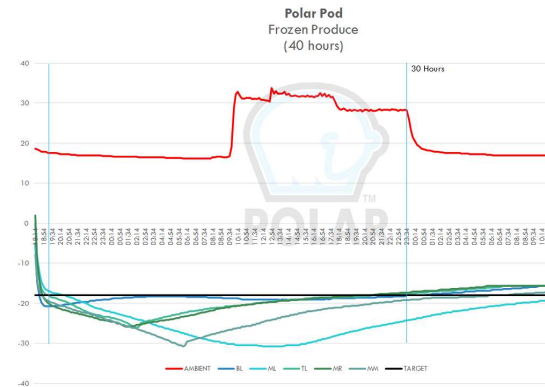

Polar Thermal is renowned for its re-usable pallet shippers, and PolarPod extends that range to single use without any drop in performance. The PolarPod range is the only choice for leading cold chain logistics specialists shipping product to Hong Kong, Singapore, Malaysia and China as well as frozen produce to a number of Caribbean destinations.

Results in tests for both Chilled and Frozen Solutions are exceptional, see right:>>>

Our systems are manufactured in our ISO 9001:2015 Warminster factory - currently doubling our output from 400 systems per month.

Test Data: Chilled Produce - January 2019

Test Data: Frozen Produce - February 2019

Coolants:

Polar now also supply their own coolant and phase-change packs designed to complement pallet-based freight.

The packs can be layered, stacked or boxed.
