

BOX BUILDING AND ASSEMBLY

ABOUT AES

Based in the Midlands, AES is an agile and innovative, integrated electronics design company with extensive on-site manufacturing capabilities. From physical circuit board assembly (through hole and SMT placement) to robotic machining and low pressure over-moulding, we provide a fast turnaround for small one-off orders to larger end-to-end design and manufacturing projects. Our scope is wide covering the Automotive, Aerospace and Medical sectors. We have dedicated and responsive Design and Production teams, that are committed to providing a fast turnaround for our new and existing customers.

TYPICAL BOX BUILD TYPES

- Fire & smoke panels
- Aerospace test boxes
- Under floor thermostats
- Medical devices
- Automotive modules
- Wearable monitoring devices

CAPABILITIES

- ✓ SMT placement
- ✓ Through-hole assembly
- ✓ Wiring and looms
- ✓ Robotic 6-axis machining
- ✓ Over-moulding
- ✓ Resin potting
- ✓ Programming
- ✓ Testing and inspection
- ✓ Cabinet and control panel assembly
