

NEW PRODUCT

DELTA AT 800

Delta Membrane Systems Limited launches innovative AT 800 which bridges Type C waterproofing and ground gas protection

We're delighted to be launching Delta AT 800 an innovative Type C Drainage Membrane which satisfies both BS 8102:2009 and BS 8485:2015+A1:2019, Table 7 achieving waterproofing and ground gas protection simultaneously.

Delta AT 800 will lessen the complexities of waterproofing and gas protection to below ground structures where BS 8102:2009 and BS 8485:2015+A1:2019 do not currently align. Delta AT 800 has high compressive strength, excellent compressive shear behaviour, high resistance to alkalis and satisfies ISO EN 15105-1 Methane permeability (manometric test method) requirement as stipulated in Table 7 BS8485:2015 +A1:2019.

The Delta AT 800 can be used as part of a twin waterproofing and gas protection system in conjunction with Delta's MemTech gas protection systems and its waterproofing range. Delta AT 800 is suitable for new, existing and retrofitting systems.

Benefits of Delta AT 800:

- Rapid cost-effective installation
- Compatible with all types of construction
- Ideal for complex substructures
- Guaranteed performance
- Suitable for new and existing buildings
- Suitable for high volumes of water penetration
- Suitable for ground gas protection
- A reversible system, which will minimize damage to historical or heritage structures
- An effective barrier to the transmission of salts, liquid water and water vapour
- An effective barrier to gas – including Methane, CO2 and Radon

RELEASED 1 AUGUST 2019

Delta Membrane Systems Limited is the leading Type C Cavity Drain Membrane Manufacturer in the United Kingdom. Delta provides a full range of waterproofing and damp proofing solutions for architects, specifiers, developers, contractors and homeowners on new, retrofit and refurbishment construction and in flood resilience. We also supply ground gas protection membranes protecting structures from harmful ground gases such as radon, carbon dioxide, methane and hydrocarbons.

With over 125 years of manufacturing experience Delta is an impeccable partner on every project. Our skills have been mastered through experience in the waterproofing industry. Delta's Technical Team will help from concept to completion. Our hands-on approach and knowledge are what sets us apart.

Our projects include commercial and residential developments, new-build and refurbishment, civil infrastructure projects and domestic basements. Our nationwide network of Delta Registered Installers offers a fully guaranteed installation service.

Contact one of our waterproofing experts today! Our Technical Team offer extensive expertise covering a broad range of waterproofing, damp proofing, ground gas protection and flood resilience solutions, don't hesitate to contact the team and we'll be happy to help.
