 Residential         Industrial  
 Other

Briefly describe the type of stone finish you require:

Date Required: \_\_\_\_\_

- Please tick if you would like us to contact you to discuss materials/specifications

Name: \_\_\_\_\_

Company: \_\_\_\_\_

Address: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Postcode: \_\_\_\_\_

Tel: \_\_\_\_\_

Email: \_\_\_\_\_

## Education

Many 30-40 year old schools are being demolished and rebuilt because cheap materials were used.

Natural stone can improve building lifespan by an order of magnitude.

## Housing

Natural stone makes housing last longer, look better and is therefore more sustainable.

# Sustainable building solutions

## in Natural Stone

## Sustainability

The central principle of sustainability is to create desirable, long lasting places where people will want to live and work.

The design and appearance of the built environment therefore have an important role to play.

Natural stone is the most sustainable building material available, and the only material which history has proved can create attractive long lasting places which in every sense stand the test of time.

Well designed natural stone buildings are timeless, long lasting and highly cost effective on a whole life cycle basis, both financially and environmentally.

## Hotels & Leisure

Natural stone creates beautiful hotel and leisure buildings where guests will really want to stay on.

## Office

Prestigious, long lasting and improving rather than deteriorating with age.

## Industrial

First impressions count and a natural stone frontage will impress.
