

SHRINK WRAPPING SYSTEMS FOR LARGE PACKS

**YORKSHIRE
PACKAGING
SYSTEMS**

IDEAL APPLICATIONS

Our Customers

Windows & Doors

Furniture

Insulation

Building Products

Sanitary Units

Automotive Parts

World-leading shrink wrappers for large and heavy products.

The superior component parts & build quality are combined with exceptional back up and support for the ultimate in reliability and performance.

Relax in the knowledge you have fitted the best.

BACK UP & SUPPORT

At YPS, we believe back up and support is as important as the equipment itself and is something we pride ourselves on. This is one of the key reasons that we have the highest level of repeat orders in our industry.

- One of the largest teams of full-time service engineers in the UK.
- One-to-one contact with your installation engineer.
- All spares are kept in stock at YPS.
- Quick response engineer call outs.
- Convenient servicing schedules.
- Comprehensive service contracts to ensure your machine is kept in peak condition.
- SafeContractor approved.

World Leading
Products

40 Years Unrivalled
Knowledge

UNIBLOCK

*Space-saving range for products up to 1000mm in width.
Ideal for fast production and longer packs.*

Key Features

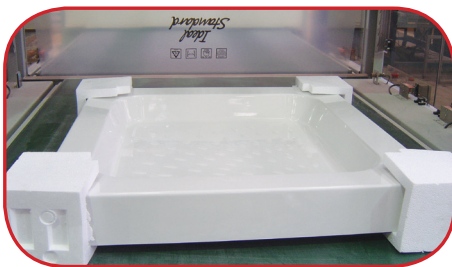

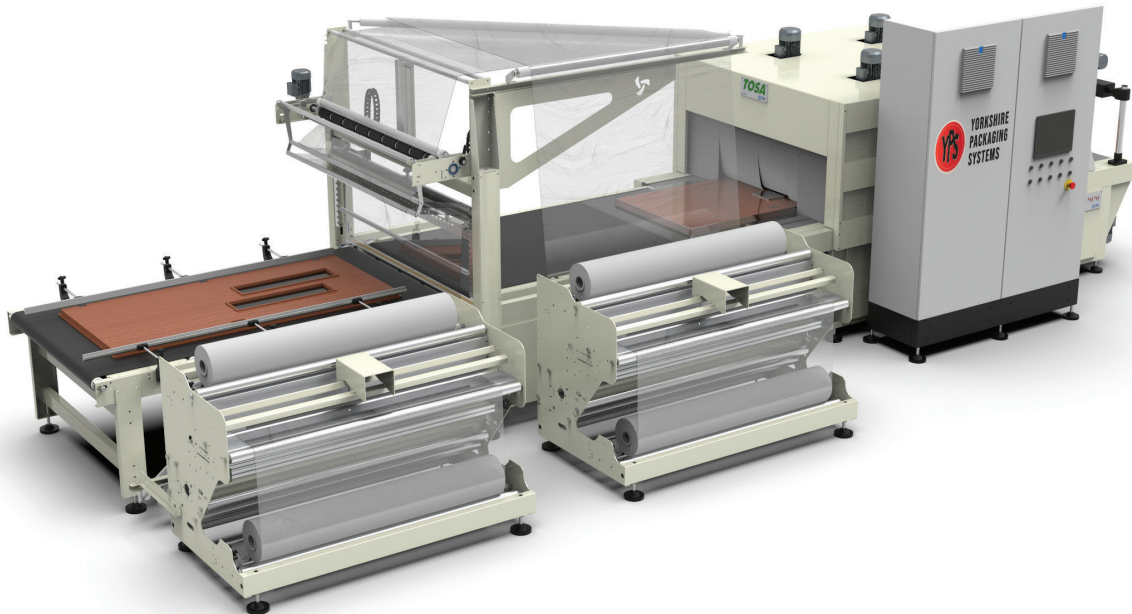

- High speed, low maintenance, heavy duty specially profiled sealing jaw for consistently strong seals on any thickness of film.
- Pack clamp supplied as standard to provide reliability at high speeds with unstable products.
- Adjustable height sealing jaw to increase speed.
- Kissing conveyor option allowing small packs to be wrapped with ease.
- Robust, reliable and very easy operator interface.
- Low maintenance design philosophy.

BETTER DESIGN

NORMAL

Specially designed for larger and heavier products such as windows, doors, furniture etc. up to 2000mm in width.

Key Features

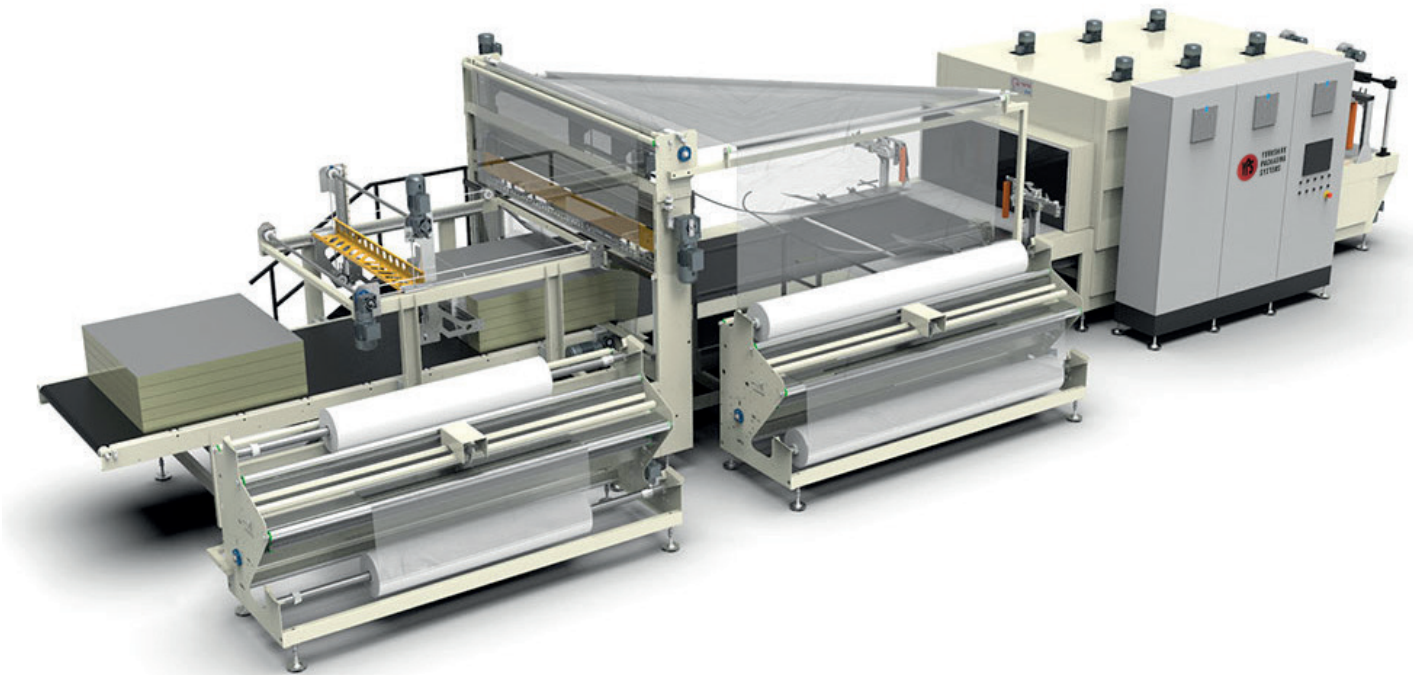

- Low level film holder for the top roll of film to provide a complete health and safety solution for heavy rolls of film.
- All belts for the sealer and shrink tunnel are completely synchronised so that maximum speed can be achieved by speeding the belts up to close gaps between products, whilst still ensuring the shrink quality is not compromised in the shrink tunnel.
- Heavy duty outfeed smoothing rollers to ensure total enclosure.
- Choice of shrink tunnel lengths to accommodate different speed requirements.
- Fully interlocked guarding in excess of CE marking.

MORE ROBUST

GREATER FLEXIBILITY

NORKET

*High speed model for very large, heavy products typically up to 3000mm in width.
Market-leading in the insulation and building industries.*

Key Features

- Automatic film roll changeover so no stop in production.
- Incredibly efficient shrink tunnel design to reduce power consumption by over 30%.
- Low level film holder for the top roll of film to provide a complete health and safety solution for heavy rolls of film.
- Incredibly heavy duty construction especially for the shrink tunnel belt with a full width drive system.
- Market leader in the building and insulation industries.

UNSURPASSED SUPPORT

"The new machinery means that we have been able to wrap our largest sized furniture components, something we have never had the capacity to do before. This, coupled with the impressive running speeds achieved and the efficiency of the equipment, has improved our operation considerably."

Dave Linforth, Hammonds Furniture

"The machine has now been on site for a few months and has been running well, which has allowed us to take on new contracts and business opportunities."

Donald Chalmers, Joinery and Timber Creations

"I am very impressed with both machines; they are crucial in meeting the demands of our customers and the success of this has been helped by your expertise and customer service."

Simon Wood, Ellbee Limited

"We had product coming off the machine that was of a very high standard as soon as the machine was up to temperature...we were in full production within hours."

Steve Jackson, Minova Weldgrip

"It helped that YPS had such a clear understanding of our needs and so specification through to installation and training was extremely smooth."

John Goodwin, Ideal Standard
