

## Delta adjusting and adapting to the “New”

We are continuing to operate through the lockdown, surprisingly there are still lots of projects which require critical equipment, such as our drainage systems to ensure homes are maintained during this unprecedented period.

We are committed to providing a service that's as close to 'business as usual' and our #TechnicalTeam have adjusted incredibly well to working remotely. Surprisingly Delta has received an increase in online traffic.

We're at the helm of shifting all things waterproofing online. To help keep your projects moving, we have now introduced real time software to enable our TechnicalTeam to offer Video Conferencing, CPD Seminars, Training Workshops, document exchange and to ensure we maintain our approachability and the ability to collaborate with your entire team, no matter where they are.

Our #TechnicalTeam can support you with:

- Waterproofing Design
- Flood Resilience, Resistance and Recoverability Design
- Ground Gas Protection Design
- Ground Gas Protection and Waterproofing Design
- Specifications
- Correct Product Selection
- Best Practice Guidance
- RIBA and CIWEM Accredited CPD Seminars
- Training and Guidance.

There are currently some exciting ideas being discussed on Delta's platforms, as we step into and become accustomed to our new reality.

Saving lives during the COVID-19 pandemic, is top of everyone's agenda at present and we all must do what we can to support the Government, our NHS, colleagues, family members and the Delta Community.

At this time of uncertainty, we'd like to thank you, our customers for your continued understanding as we work hard to maintain 'business as usual'.

We will continue to post on our social channels, so please follow us and we'll share some things to lift your spirits, whilst keeping to best practice advice and guidance. Our online CPD is available on our website, as are our "how to" video guides. We are planning on taking this opportunity to broaden our Brochure Suite with the introduction of new materials and to roll our new products - watch this space!

Set your shoulders, lift your chin - we've got this.

Stay well!

Chris, Kevin, David & Brian  
Delta Directors
