Leaders in bespoke manufacturing of sports, industrial and transport covers

# Stuart Canvas... uncovered

Just how did a company supplying PVC and cotton tarpaulins for the haulage industry since 1971 become leaders in the manufacture and supply of sports, industrial and transport covers to an array of high profile clients, throughout the UK and overseas?

Through the combination of experience and knowledge and a dusting of passion! For more than 40 years, innovation and our commitment to being the best cover manufacturer to the sports and commercial sectors has guided Stuart Canvas.

We have supplied covers to many of the top cricket, tennis, football, horse racing and rugby venues to provide the best protection against rain, frost and debris. Our hover cover is used from Lord's to Dhaka to Pune cricket grounds and our inflatable covers are used on those rainy days at Wimbledon. Look closely enough and you'll find us at most big sports events.

Stuart Canvas also manufacture industrial covers for a wide variety of blue chip companies such as: BAE Systems, Royal Mint and Scottish Power.

We also offer an extensive range of bespoke covers, made-to-measure and designed to meet your exact needs.

Lord's Old Trafford  
Wimbledon Trent Bridge

“New materials and technology have allowed us to produce quality covers more cost effectively but without the loss of quality and service that we have built our reputation on for the past 40 years at Stuart Canvas.”

Edward Stoddart, Chief Executive

## The Board

### Edward Stoddart - Chief Executive

Ed has worked in the leisure industry for over ten years in several different countries. He has worked on various commercial projects and his experience lies in the implementing of change to create increased sales and efficiency to businesses.

He has worked for companies such as Arena Leisure plc, Clubhaus plc and Namco Operations as well as working as a freelance consultant. Ed has a great knowledge of venues and the sports and leisure markets.

### Nic Coward - Non-Executive Chairman

Nic joined the board in April 2018. He is non-executive chairman and director of a number of companies, having spent over 20 years as a senior executive in well-known British and world sport organisations. He was General Secretary of the Premier League, Chief Executive of the British Horseracing Authority and a director of the Football Association and Wembley Stadium, Deputy Chairman of an award-winning PR and lobbying agency, and the founding chairman of the global sport industry's media and IP coalition.

He now chairs England Golf, and advises sports and entertainment businesses as a consultant, in addition to being on the boards of companies in the UK and New Zealand in the retail motor trade, property investment and data analytics.

## Company Overview

# How we work and where

Stuart Canvas Ltd has over 40 years' experience in manufacturing covers out of a variety of materials. The company specialises in the manufacture and design of ready-made and bespoke covers for a range of different sectors including; sports, defence, construction, supply chain, transport, leisure and domestic settings.

Stuart Canvas has approximately 60,000sqft of purpose-built manufacturing facilities across 3 sites based in Warrington, Sheffield and St Helens. As the industry has grown so has Stuart Canvas, we have invested heavily in new machines and technology. This allows us to design and manufacture nearly all types of covers.

The company owns the established brands JMS cricket, A&J Bennett and Mudfords. These companies bring not only experience but increased capacity and diversity to the group.

# enquiry > site visit > quote > order form > order confirmation > commencement of work > practical completion checks > follow up checks.

### Environment Policy

Promoting and maintaining environmentally responsible practices is beneficial for everyone: our customers, employees and the communities in which we operate. At Stuart Canvas, we take our commitment to the environment seriously. We conduct our business in ways that protect the environment and demonstrate good stewardship of our world's natural resources, also, we continually seek new ways to address the environmental cost and impact of our activities, products and services.

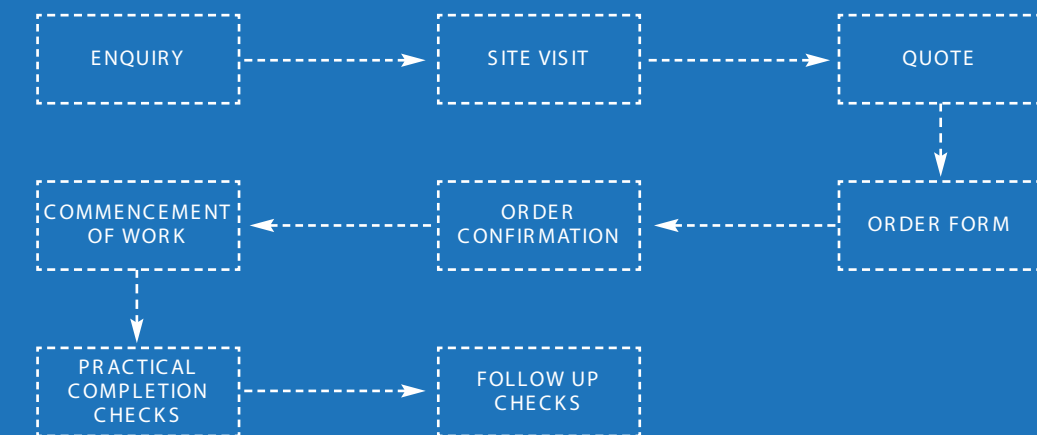

### We achieve this by:

- Meeting or exceeding all applicable government, local and company environmental, safety and health standards
- Providing a workplace free of recognised hazards and maintaining healthy working conditions for all employees
- Participating in recycling to the greatest practical extent to reduce impact on landfills and promote recovery of valuable resources
- Conveying to our customers, industry associates, vendors and the general public our strong environmental, safety and health commitment
- Continuously improving our commitment to the aforementioned through the exercise of our EMS, improved technology, production changes and due diligence.

### How We Work

We're immensely proud of our customer care and our dedicated team are always on hand to help out with any enquiries you may have.

We feel it is important to set out and help people understand our process from start to finish. To ensure that your Stuart Canvas experience is a great one we always adhere to the following process where applicable:

# Stay one step ahead of the game with our innovative sports covers

**Our heritage is steeped in the manufacturing of covers for the cricket, tennis and racing industries.**

**We have developed some of the leading designs currently used across all sports and we strive to continuously develop new products, using only the most up-to-date technology and materials.**

**All of our products are made in the UK, on-site in Warrington under strict quality control measures.**

**As an international company, we have clients all over the world from Wimbledon to the West Indies.**

## Bespoke

**Can't find what you're looking for?**

As one of the leading custom made cover manufacturers in the UK, we're confident that we can meet any covering requirements with our bespoke offerings.

Turn to page 30 for more information on this.

Sport/Cricket/  
Hover Cover

# You'll be bowled over by our cricket coverage

**Speed of delivery onto the pitch, manpower and increased manoeuvrability of covers into key positions.**

**These are just some of the issues that Stuart Canvas had to consider before innovative thinking led to the creation of the patented, revolutionary hover cover.**

The hover cover is an innovative product, designed by Stuart Canvas, which has revolutionised the way major cricket grounds protect their squares around the world.

Developed in 1998 and installed at Lord's in the same year, it not only reduces the amount of playing time lost to rain but also enables the ground staff to cover the pitch and square within three minutes with much reduced manpower.

The hover cover, with its potential for generating sponsorship and advertising revenue, is the ideal product for covering all test match and county grounds.

“The hover cover is far superior to any type of wheeled cricket pitch covering currently on the market, quick, efficient, easy to handle and no more back ache. A brilliant bit of kit.”

*Michael Hunt, Head Groundsman at Lord's*

### Benefits uncovered...

**Speed** - the hover cover can be protecting the pitch within three minutes of the start of rain.

**Manpower** - self propelled, the hover cover requires fewer ground staff than traditional pitch covers.

**Transportation** - the hover cover easily glides to the centre of the pitch.

**Sponsorship** - the canvas top is perfect for sign writing and can be shaped to the sponsor's wishes.

**Benefits to the groundsman** - air circulation units can be used to speed up the drying process and is ideal for controlled germination.

## Sport/Cricket/ Hover Cover

### The hover cover has many advantages over conventional pitch covers...

- Speed**  
 The hover cover can be protecting the pitch within three minutes of the start of rain whereas normal cricket covers would take up to 10 minutes to cover the pitch completely.
- Manpower**  
 Being self-propelled, the hover cover requires fewer ground staff and less time to manoeuvre it onto the square than traditional mobile pitch covers.
- Transportation**  
 The hover cover glides to the centre of the pitch thus meaning there will be no wheel marks or damage to the turf after a deluge of rain. The hover cover, which is motorised, can be loaded with side sheets and a bowlers' run-up cover thus avoiding extra man power and time getting the covers to the centre.
- Sponsorship**  
 The hover cover is an ideal sponsorship medium for your venue. The PVC top is perfect for sign writing and it can be shaped to the sponsor's wishes, made to look like an aeroplane fuselage with tail fin or even a can of drink for example. The hover cover can also be used as a mobile advertising hoarding during intervals if required.
- Benefits to the groundsmen**  
 The air circulation units can be used to speed up the drying process and are ideal for controlled germination, especially out of season. It can also be moved sideways easily, on and off the pitch, when work is necessary during showery days.
- Dimensions**  
 Dimensions are tailor made to the customer's own requirements, but would normally be between 80ft – 100ft long and 15ft wide. It is powered by two 20hp petrol-driven engines, one at each end. Integral gutters down each long side are designed to carry square covers on inflatable tubes and extra covers, if necessary, for bowlers' run-ups.

“The hover cover from Stuart Canvas has been a godsend. It is fast, reliable and covers our ground in just a few minutes. It has definitely helped save matches and is a must have cover.”

Steve Birks, Head Groundsman at Trent Bridge

## Sport/Cricket/ Mobile Cover

“We have used Stuart Canvas for all our pitch protection for many years and have found the service excellent and the products do exactly what they are supposed to do - keep the pitch dry!”

Bill Gordon, Winner of Groundsman of the Year for seven consecutive years at Surrey County Cricket Club, The Kia Oval

## Sport/Cricket/ Mobile Cover

**Stuart Canvas is the UK's leading supplier of mobile pitch covers. Over the years, we have designed and manufactured mobile covers for every county cricket club in the country.**

Our original design has been modified and improved over the years, taking into account suggestions from various club and county groundsmen. Considering that most clubs employ a maximum of one groundsmen (or none at all), it was imperative that the individual sections of the mobile cover were easy to manoeuvre and we were extremely mindful of this throughout the design process.

The mobile pitch cover also provides an excellent opportunity for advertising, as a sponsor's name or logo can be printed on the cover before leaving our factory. Alternatively, we can print the required design onto a flat section of canvas which can be placed and secured on top of the roof of each section at your ground.

### The main benefits of our mobile cover are:

#### Unit

Lightweight steel frame and integral gutters.

#### Cover

White, blue, red, translucent or green PVC UV stabilised with overlaps between the units to stop any water getting in between them.

#### Wheels

Four, puncture proof, wheels per section... two swivel and two fixed.

#### Gutter

Integral with an excellent drainage system of pipes and hoses.

#### Hose

Each unit comes complete with 25m hose.

#### Side Sheets

Side and bowlers' run-up sheets can easily be attached to the mobile cover.

#### Advertising

The cover tops provide an excellent opportunity for advertising, this can be arranged in-house through our professional sign writing team.

#### Assembly

Our in-house installation team will assemble your units and cover tops on-site at your convenience.

## Sport/Cricket/ Flat Sheet/Pro-Tech Cover/ Germination Sheet

### Flat Sheet

Stuart Canvas has considerable expertise in pitch protection, having supplied flat sheets to every test ground in the UK as well as to the West Indies Cricket Board for all of their major venues. We offer a variety of flat sheets including test, county and pro-tech.

### Pro-Tech Cover

Our pro-tech cover was developed over a period of 18 months, combining our expertise in manufacturing with new technologies and materials, and customer feedback.

The cover is lightweight and easy to handle making it a great proven success with many of the county grounds and top schools.

### Germination Sheet

Our germination sheets are strong and durable and are ideal for your cricket pitch. Our range consists of 17gsm fleece to 130gsm polypropylene, available in either green or black porous material.

All of our sheets, apart from the fleece, come complete with reinforced hems and eyelets to enable you to peg the sheet down securely.

County Cover

Germination Sheet

Pro-Tech Cover

### Benefits uncovered...

**Pro-Tech Cover** – breathable, lightweight and promotes grass growth.

**Test Cover** – strong, durable and easy to use.

**County Cover** – lightweight and easy to handle.

**Germination Sheet** – strong, durable and lightweight.

Test Cover

## Sport/Cricket/ Test Cover

**Our test cover is made from textile reinforced PVC which has been designed to let in light without 'burning' the grass.**

The test cover has also been treated to withstand damage by fungicides and bactericides used on all squares, thereby prolonging its life. We have made the sheets lighter over the years to make handling easier, whilst still retaining sufficient weight and strength to counteract high winds.

- Benefits uncovered...**
- Strength** – all covers are manufactured from textile reinforced material incorporating anti-bacteriological and fungicidal chemicals.
  - Durable** – each of our covers has a good lifespan but this of course depends on how it is treated on-site.
  - Easy to use** – our covers are easy to pull on and off the pitch. All covers come with grab handles and eyelets.

## Sport/Cricket/ Scoreboard/Sightscreen/ Mobile Net/Ground Equipment

### Standard Scoreboard

Made from birch faced exterior plywood and painted matt black. Our standard scoreboard comes with telegraph numbers and white vinyl lettering. This model shows 'total', 'wickets', 'overs' and 'last innings' and is 1.525m high by 1.370m wide. It is also available with or without the stand. We also offer a senior scoreboard and folding scoreboard within our range, on request.

### Sightscreen

Stuart Canvas can offer a variety of sightscreens to suit your needs. Our in-house assembly team will assemble the screen at your club or you can opt for a delivery only option.

- Our standard sightscreens are:
- 4.5m high x 4.25m wide
  - 15 white lattes
  - 4 plastic solid rubber wheels designed for use on grass

The frames and bases are made from heavy duty galvanised boxed steel to give it extra life expectancy.

The screens can easily be moved by one person, making it easy for ground staff and players. They can also be dismantled easily for winter storage.

### Mobile Net

Our portable galvanised steel cricket cages are designed to be extremely durable and the heavy duty galvanised structure is suitable for all venues. Our in-house installation team will assemble the net at your club or you can choose to put it together yourself with the help of our thorough self assembly guide.

Features of our mobile nets are:

- Galvanised protection
- Easily manoeuvred
- Steel framework
- Wide solid wheels for grass use
- Quality netting
- Easily assembled

### Ground Equipment

Our additional cricket offerings also include:

- Stumps
- Hessian Matting
- Jute Matting
- Coconut Matting
- White Sightscreen Mesh

Standard Scoreboard

Mobile Nets

Sightscreen

Sightscreen

## Sport/Cricket/ Artificial

### Artificial carpets that are long lasting, perform consistently and utilise up-to-date technology from the ground up.

Our range of non-turf carpets has been developed using the most up-to-date technologies and materials. It includes:

- **SCP PP** – a wilton woven carpet, the SCP PP offers cricketers consistent bounce but with a little more pace due to the shorter pile height. When accompanied by the SCP 12, this carpet is ideal for outdoor use. Life expectancy of 7 – 10 years. Available width: 2.74m.
- **SCP Junior** – this non-directional needle punch carpet offers great consistency and bounce, at a much lower cost to the wilton woven carpets. It's perfect for junior cricket but can be used for senior cricket too. Life expectancy of 4 – 6 years. Available widths: 2m, 2.74m and 4m.
- **SCP PVC** – this heavier weighted, non-directional needle punch carpet offers great play both inside and outside. Life expectancy of 4 – 6 years. Available width: 2m.
- **SCP 12** – is the most commonly used playing shock pad. Tried and tested, it offers superb consistency and is ideal for use with our SCP PP. Life expectancy of 8 – 12 years. Available width: 2.5m.
- **SCP Waffle** – a lighter version of the SCP PVC, this is perfect for roll away storage. It's a non-directional needle punch carpet, making it ideal for indoor and outdoor use. Life expectancy of 4 – 6 years. Available width: 2m.
- **SCP Bowler Pad** – ideal for the bowlers run up area, a thicker shock pad than the SCP 12 this load absorbing shock pad offers great support for the bowler's ankles, knees and lower back. Life expectancy of 8 – 12 years. Available width: 4m.
- **SCP Bowler** – ideal for high wear areas such as the bowler run up, this sand filled needle punch carpet is ideally used with our SCP bowler pad to improve support for bowlers. Life expectancy of 6 – 8 years. Available width: 4m.

## Artificials/ Non-Turf Services/Netting/Batting Curtain

### Surface Improvements

With all aggregate bases there is an aspect of movement over time due to migration and compaction. Consequently, from time to time it's necessary to remove the carpets and shock pads to re-level and compact the primary layer. This will help bring the system back to its original playing characteristics. We offer re-leveling and surface improvement work on all systems, even if it wasn't originally installed by us.

### Steel Work

The quality of steel has improved tremendously over the years. Consequently, you may need to replace your old steel work, due to your system failing to meet the current standards. Stuart Canvas can replace any old steel with our 48.3mm diameter galvanised tube. We place all steel work into a 500mm deep socket allowing up to 4m in height, offering more room for spinners to flight the ball.

### Netting and Mesh Net Sightscreen

As one of the main components that takes the most impact it is only inevitable that netting will need replacing regularly. Stuart Canvas offer 1.8mm and a 2mm knotted replacement netting, available in black or green. Other nettings can be ordered if required. We also offer a fine mesh netting which can be used as a sightscreen in fully enclosed systems or for free standing sightscreens.

### Batting Curtain

As Stuart Canvas are also thinking about safety and sustainability, our batting curtain is made from a strong PVC mesh. This will help reduce the amount of impact your netting will take, helping your nets last longer. These are also used for keeping batters safe, by enclosing the batting area this prevents unwanted distractions and ball movement between lanes.

2 Lane System

Match Pitch

Batting Curtain

**Sport/Tennis/**  
**Debris Cover/Frost Cover/Indoor Netting/**  
**Windbreak and Tennis Screens**

**Sport/Tennis**

**We're serious about our tennis covers**

**Debris Cover**

Our debris cover is ideal for use in the autumn and winter to prevent leaves, twigs and other natural debris being deposited onto your hard court surface. By protecting the playing surface you are also prolonging the life of the court by preventing moss and weeds from developing.

The debris cover also acts as a frost cover during the winter months whilst still allowing airflow around the court.

A debris cover can be applied by just one person in a matter of minutes and can easily be stored by the side of the court. A small investment in one of our debris covers will add years to the life of your court.

**Frost Cover**

Our frost cover is manufactured in one, two or three layers depending on the level of protection and insulation required. These made-to-measure covers are made from a lightweight material which can be rolled out on an inflatable tube by two people. We also manufacture covers that can be pulled across the court.

**Indoor Netting**

We now supply indoor sports venues with netting solutions to suit their requirements. This may be to segregate tennis courts or for cricket nets.

Everything is made bespoke to suit your requirements including the gauge of the netting and PVC or canvas skirts.

**Windbreak and Tennis Screens**

Our windbreaks and tennis screens are ideal for home or club use and can be made-to-measure to fit your exact requirements.

We can manufacture anything from a rot-proof canvas to a polypropylene material. These also act as shading for the court and players.

The screens simply slip onto your existing perimeter fencing. They're straightforward, uncomplicated to use and a great addition to any court.

“We have worked closely with Stuart Canvas for over 25 years at the Championships and they have always been efficient and reliable. The covers have definitely helped save the day on numerous occasions!”

*Martin Guntrip, Club Secretary at All England Lawn Tennis Club*

Frost Cover

Indoor Netting

Windbreak

## Sport/Tennis/ Flat Sheet

**Our flat sheet is designed to allow the light in without burning the grass.**

Our flat sheet is made from a lightweight material and can be rolled out by a minimal number of people, making them ideal for club or private use on all tennis court surfaces. Each sheet is made-to-measure and provides protection from wet weather.

These man-made sheets are designed to allow light in without 'burning' the grass whilst also being treated to withstand damage caused by fungicides and bactericides used on grass courts, thereby prolonging their life.

Stuart Canvas can also sign write any branding that you may require on the cover.

## Sport/Tennis/ Inflatable Cover

### Inflatable Cover

Our inflatable cover is made of a lightweight material which, when rolled out across the court, is inflated by fans to form a dome allowing water to drain into channels around the court. The dimensions, when inflated, are sufficient to allow limited work to be carried out underneath the covers and, for this reason,

they are made with doors to allow ground staff access with mowing machines and line marking equipment.

Our inflatable tennis cover have been used on those rainy days at a number of different clubs including; Wimbledon (The All England Lawn Tennis Club), The AEGON Championships and Eastbourne Championships.

### Benefits uncovered...

- Easy to handle** – our inflatable cover is made from a lightweight material.
- Practical** – work can be carried out underneath the cover once inflated.
- Speed** – quick and easy to deploy, with minimal manpower required.
- Protective** – sheltering the playing surface with our inflatable cover reduces the risk of injury to players and ensures play can resume quickly after the rain has stopped.

Flat Sheet

Inflatable Cover

Flat Sheet

“The Lawn Tennis Association has worked with Stuart Canvas for over 15 years. They provide a first class professional service and in moments of need have always reacted very quickly and effectively to any of our last minute requests. Without a doubt the covers have given us very valuable protection for the grass courts.”

*Patrick Hughesman, Tournament Director at AEGON Classic at Lawn Tennis Association*

# Premier football covers from Stuart Canvas

“Tottenham Hotspur FC required a solution to protect their training pitch from the severe weather conditions, to ensure that the first team could continue to practice. Stuart Canvas reacted quickly to solve our problem, and delivered a frost protection system to us ahead of schedule. The system has proved to work well and we continue to work with Stuart Canvas on other projects.”

*Darren Baldwin, Head Groundsman at Tottenham Hotspur*

**Fact:** The retractable tunnel can be sign written to promote companies or goods and comes in a variety of colours to suit

## Sport/Football/ Retractable Tunnels/Frost Cover/Germination Cover/Rain Cover

### Retractable Tunnels

Our bespoke retractable tunnels are designed and manufactured to suit your needs and requirements.

We have designed, manufactured and supplied these items to various football clubs across the country, including Manchester United, Stoke City FC and Wembley, as well as various power stations, schools and large warehouse facilities.

The tunnels can be sign written to promote companies or goods and the main PVC body comes in a variety of colours to suit.

The tunnel can be fixed or produced with a reach system if preferred. One standard tunnel system uses wheels, which are easy to manoeuvre into your desired position.

### Frost Cover

Our frost cover allows the grass to breathe while the cover is on the ground and will protect the grass from temperatures up to -4°C but this will depend on the wind chill factor. Our covers can be ordered in the size, weight and thickness that you require.

The thicker the cover the more frost it will keep out however the weight will vary accordingly.

Covers with an inflatable roller offer a quick and efficient installation, removal and storage option.

### Germination Cover

Stuart Canvas offer a strong and durable germination cover which is ideal for football pitches.

All germination covers are bespoke and manufactured to any size you require.

We can offer covers from 130gsm fleece to 230gsm black or green porous material. All our germination covers come with reinforced hems and eyelets so they can be pegged down. Some can also double up as frost covers.

### Rain Cover

We have supplied sets of rain covers to numerous premier and championship football clubs. These covers are made-to-measure to suit each individual club's requirements and will protect the surface from any adverse weather.

These easy-to-use covers are simple to apply, remove and store.

For a demonstration on what we can do for your club please contact us on 01925 814 525.

**Sport/Horse Racing and Equestrian/  
Padded Railing Support**

**Paddock to  
racecourse...  
we've got it  
covered**

**Stuart Canvas manufactures pole and padded railing protection covers for racecourses and associated venues. We use foam and strong PVC that is both waterproof and able to withstand general day-to-day wear and tear. With health and safety requirements now of paramount importance, this equipment will greatly reduce the risk of injury to your horses and riders.**

Padded Rail Support

Veterinary Screen

Frost Cover

Inflatable Shelter

**Sport/Horse Racing and Equestrian/  
Inflatable Shelter/Veterinary Screen/Frost Cover/Direction Arrow**

**Inflatable Shelter**

Stuart Canvas inflatable shelter came in response to Ascot racecourse's request to design a veterinary screen which would completely conceal a horse that needed veterinary treatment in the winner's enclosure, paddock or in front of the stands.

Our brief, was to design and manufacture a product that could easily be put over the horse and inflated quickly (under one minute) with sufficient room for three people to ensure complete viewing protection from the public. The shelter can also be attached to the back of a horse ambulance.

**Veterinary Screen**

We are the leading provider of veterinary screens in the UK, supplying over 45 racecourses. We also supply screens to polo clubs, point-to-point courses and other equestrian related activities.

Our standard screen is 30ft long by 8ft high and has seven poles that can be easily inserted into the turf for stability. The screen also has grab handles on each pole for extra stability and viewing holes which enable officials to keep a close eye on procedures.

The screens can be erected quickly and easily so that the public or media do not get a view of the injured horse or rider.

Our latest design is the same size as our standard screen but with the added feature of an angled top. This helps block the view of spectators in the grandstands and higher seated areas, making it ideal for use in the parade ring and in front of the grandstands.

All of our veterinary screens can be made to suit individual requirements.

**Frost Cover**

We have the capacity to manufacture frost covers for take-off and landing areas or any other shaded areas prone to frost. If required, we can also provide frost covers for an entire racecourse.

Stuart Canvas have produced frost covers for many racecourses all over the country. Our covers have saved many a meeting from being cancelled, making them a revenue-saving product.

Our offerings also include a variety of options to cover your gallops or ménage from frost and this varies from single skin to double skin covers, to blow up covers over the whole ménage.

**Direction Arrow**

We have recently developed a new product that is used at Aintree racecourse which are quick and easy to use direction arrows. Made from lightweight material and with a yellow arrow attached it is foldable with a movable leg.

**"Stuart Canvas are an innovative, dynamic and totally professional organisation with an outstanding international reputation."**

*Michael Prosser,  
Director of Racing  
at Newmarket Racecourses*

**Sport/  
Rugby**

**Frost Cover**

Stuart Canvas have worked with many high profile rugby clubs, supplying them with frost protection covers. These covers provide perfect protection against frost to allow matches to proceed, reducing the chance of costly abandonments.

The covers can easily be laid down and picked up, so are suitable for all teams... regardless of size. We have a number of different frost covers available to suit various requirements and budgets.

**Boxing Ring Canvas**

Stuart Canvas have been manufacturing boxing ring canvas and skirts for over four years. With our highly skilled production staff, we can make any size canvas to your own specifications. All canvas rings are stitched in such a way that there are no trip hazards. Canvasses are available in either blue or black.

“Quality of goods backed by a professional approach, Stuart Canvas continue to deliver on time.”

*Darren Golden, A and D Sports*

**Sport/  
Beach Volleyball**

**Beach Volleyball Cover**

Our beach volleyball cover can be easily laid out to protect your playing surface when not in use. The covers are lightweight and porous so water drains through whilst leaves, debris and any animal deposits are kept away from the playing surface.

Covers easily attach to the perimeter fences and can be left at the side of the court, these are also available on rollers for ease of deployment.

**Sport/  
Air Domes**

Our air supported domes are innovative objects created with high quality materials and the latest technology. They're quickly erected and can be used for seasonal or permanent coverage.

The special design of our air domes gives consumers the same level of comfort they are used to with traditional sports buildings. The domes can be used for any purpose and for any sport, from tennis to football to hockey, they can even be used to cover swimming pools.

**Tennis Court Air Dome**

The particularly quick erection of the air dome and its equally rapid dismantling, that leaves no visible traces, allows for temporary or permanent coverage, thereby increasing investors' profit levels.

The translucency of the membrane allows the domes to be used in daylight without the need for artificial lighting. The excellent insulation characteristics of the double fabric membrane ensure the proper condition for the use of any flooring type.

**Football Air Dome**

The domes can be made to fit over a 5-a-side pitch or over a full pitch with seating inside. Nearly anything (within reason!) can be achieved and these domes provide you with the perfect facility to train when the weather is bad. Heating and lighting can be introduced into the domes to make them completely self sufficient.

**Multi Purpose Activities**

With our advanced-technology air supported structure, it is possible to install school sports facilities and recreational domes for instructional

programmes for a variety of sports. Domes can be erected for temporary, seasonal or permanent use. Appropriate sports flooring, along with other facilities from wardrobes to stands, can be installed. The combination of the latest materials and technologies used in the air domes means low operating costs and comfort for the people using them.

**Swimming Pool Air Dome**

Our air dome prolongs the use of swimming pools and aqua parks throughout the year.

Proven technological solutions enable a comfortable warmed passage between domes. Double or even triple fabric membranes are creating new high standards of insulation and condensation prevention and therefore ensure low operating costs.

**Air Dome Details**

The domes are constructed from a double membrane translucent material. Along with this we can supply all the lighting, heating, inflation, doors and other such items required to use in the dome.

**Ground Anchors**

If ground conditions permit, we can install a series of ground anchors instead of a concrete ring beam. This is ideal where a dome is being added to existing courts. The disruption of digging a trench and getting rid of the soil is avoided, and costs are slightly less than a ring beam. This may not always be available on air domes as it depends on the size.

# Made-to-measure covers with our bespoke offerings

Gazebo Cover

Trolley Cover

Bay Cover

**As one of the leading custom made cover manufacturers in the UK we are confident that we can satisfy all of your covering requirements with our made-to-measure solutions, designed and manufactured to order.**

**Stuart Canvas offers the full service, from design to installation, for any type of bespoke cover whether industrial, commercial or just for home use.**

Stuart Canvas can produce any type of cover using a variety of industrial textiles to suit any application. We design and manufacture temporary structures of all sizes that can act as extra storage, space, loading areas or even as temporary working structures. Our clients range from energy companies, automotive manufacturers to defence contractors and government organisations. Our purpose built factory has over 25,000 sq. ft of space meaning we can easily cope with single or multiple orders of all sizes. No job is too big.

## Bespoke/ Temporary Structures

Retractable Cover

### Temporary Structures

Temporary structures provide a solution to the problem of limited storage space. We can produce a structure that can concertina to and fro as often as requirement dictates and can also

be used as an extra loading area.

### Commercial Covers

We can manufacture anything from one off items to multiples of hundreds or thousands. Stuart Canvas can produce covers for many different needs and requirements.

All our covers are made-to-measure and priced as such.

With all large commercial projects we offer site surveys and drawings to illustrate our designs and ideas. We have an experienced research and development team

on hand to solve any covering issues that you may have. We offer a very competitive and value for money service.

Salt Bay Cover

## Bespoke/ Re-usable Cover

### Re-usable Cover

Stuart Canvas design and manufacture re-usable covers for a variety of uses. For example, you may be using shrink wrap to protect your shipment of goods. This method is a one time use solution and is not environmentally friendly. We design covers to protect your goods during transit or storage helping you to

save the environment and reduce wastage.

Benefits of our re-usable covers include:

- Reduced carbon footprint
- Reduced wastage
- Reduced long term costs
- Longer lifespan
- Branding opportunity

Warehouse Curtain

## Industrial/ Equipment and Industrial Cover

### Equipment and Industrial Cover

We offer a variety of covers which include both mobile or static options as well as on-site workshops. These workshops are retractable making them great space savers and ideal environments for additional, short-term storage.

We're experienced manufacturers and suppliers of:

- Waterproof Covers
- Tarpaulins
- Equipment Covers
- Industrial Covers
- Industrial Canopies
- Industrial Awnings
- Industrial Curtain Systems

- Tote Bin Covers
- Stillage Covers
- Modular Covers

### Temporary Structure

Short of space at your factory or warehouse? Stuart Canvas can help! We will design and produce a concertina structure which can be expanded to give you additional floor space as often as requirement dictates. The structure can also be folded down or used as an extra loading area.

Made-to-measure, we'll take care to make sure that the structure is designed to meet all your requirements.

### Warehouse and Racking Cover

Stuart Canvas design and manufacture many different types of covers for warehouses and racking, all made-to-measure to meet your exact requirements. All of our covers are long lasting, durable and re-usable. Our team are able to design a cover from scratch or can replicate from an existing design.

We offer a full range of services including: site surveying, measuring, designing, manufacturing, installation and delivery to ensure products are delivered on time, every time.

Examples of the types of covers we manufacture include:

- Industrial Curtains
- Separation Curtains
- Dust Covers
- Racking Covers

### Bulk Pile Storage

We offer a full site survey, design and installation for large bulk pile storage solutions. Our team of experienced installers can cover large bulk aggregates or salt ranging from as little as 1,000 tonne to a hefty 50,000 tonne.

Benefits include:

- Durable
- UV stabilisation
- Inclement weather protection
- Netting
- Bespoke weigh down sandbags

## Bespoke

### Can't find what you're looking for?

As one of the leading custom made cover manufacturers in the UK, we're confident that we can meet any covering requirements with our bespoke offerings. Turn to page 30 for more information on this.

## Industrial/ Temporary Cover

### Pallet Cover

Pallet covers are ideal for storing product outside, these are 100% waterproof and will protect your products from the elements. Stuart Canvas are able to manufacture pallet covers of any size and for any use. All are made-to-measure, available in a variety of colours and are manufactured to an exact specification. Covers can be made to fit with or without ties and additional fixings can be applied for security if needed.

### Benefits uncovered...

**On-site inspection** - Stuart Canvas will visit your site, measure up and provide drawings of any ideas that we have.

**Research and Development** - our experienced team are always on hand to solve complex problems and requirements.

**Measured approach** - all our covers are made-to-measure and competitively priced.

# Go for miles with our transport covers

**We began selling tarpaulins to the haulage industry over 40 years ago. We've grown with the industry and have developed our business alongside it.**

**Steeped in historical experience, Stuart Canvas can offer you competitive prices on all types of haulage covers including roll on roll off, side curtains, nettings and load restraints. We have over 200 man years of experience on our factory floor and can offer a quick and efficient service for all your haulage requirements. We can even develop ideas that you may have as we specialise in made-to-measure covers.**

Transport

## Transport/ Vehicle Curtains

Using only the best panama weave PVC of the highest quality, we have been producing curtains for the transport industry for over 40 years. Not only are we competitively priced but we have a superb reputation for producing bespoke products to meet your requirements.

Our array of products includes but is not limited to the following:

- Horizontal or vertical build
- Tensioner front, rear or both
- Vertically tensioned or strap in pocket
- Full range of colours in PVC and straps

- Full range of buckle types and rave hooks
- Professionally sign written or printed

Our pocketed curtains are made from 910gsm PVC with triple eyelets every two foot as standard but this can alter to suit your exact needs. We offer curtains to suit the following:

- Straight decks
- Sloping and curved fronts
- Double decks
- Rigid trucks
- Chipliners
- Insulated curtain sides
- Tail curtains

“Stuart Canvas have provided us with quality roll on roll off sheets for many years and in that time we have always been happy with the quality of goods and service provided. They are a pleasure to deal with.”

*Hilary Housby, Transport Manager at Bulmans Bulk Haulage*

PVC Side Curtain

## Transport/ Filter Sheet/Rollover Sheet

### Filter Sheet

Our filter sheets are very strong and durable and are made from breathable material. Every sheet is strengthened with rope within the hem. These sheets are used mainly in the transportation of sawdust along with a PVC top sheet.

### Rollover Sheet

Stuart Canvas produce rollover sheets of all sizes. All made-to-measure, our rollover sheets are produced from heavy duty PVC to the highest specification.

Our sheets are competitively priced and made from a minimum weight PVC of 560gsm to a maximum of 910gsm. They are easy to fit onto any tipper unit and will withstand all weather elements.

## Maintenance and Installation

### Stuart Canvas offer a complete 'clean and repair' service from covers to marquee panels and roll on roll off tops.

Stuart Canvas offers a clean and repair service on any type of PVC covers or sheets. Working from our factory in Warrington, we have the space and machinery to clean your old or current covers to help you get the best from them. We offer a 'clean only' or a 'clean and repair' service which may help to prolong the life of the cover.

Each cover is individually inspected for damage before cleaning and repair work is undertaken. We also offer a storage service for all types of cleaning contracts.

Our specialist maintenance team can work with all different types and weights of cloth and are able to repair anything from tension curtains to roll on roll off tops, to boat or trailer covers. All repairs are undertaken on-site.

In addition to our clean and repair service we also manufacture marquee panels at extremely competitive rates.

We use 750gsm marquee (a lighter weight material is available upon request) and manufacture to the very highest of standards.

Stuart Canvas also offer an installation service for aggregate, salt and any type of large bulk or stockpiled product. Our experienced installation team can survey the designated storage sites or ports and assess the level of sheeting required.

"We found Stuart Canvas very efficient, diligent and on time when we ordered our marquee roof from them. I would recommend them to anyone."

## Bespoke/Industrial

“Salinity Group is Europe’s largest leading independent salt distributor. We invited Stuart Canvas to tender for a weatherproof solution to protect our large bulk salt piles across our UK sites. Stuart Canvas redesigned our current sheeting system and provided a complete ‘end to end’ solution for our sheeting needs. The result of this partnership has resulted in a user friendly system offering complete protection of our products against the inclement weather.”
