

## About Supreme:

Artificial grass can transform your outside space, it's green all year round and requires minimal maintenance.

We offer competitive prices, without compromising on quality.

**Our grasses are completely pet friendly!**

### Our Grass:

Warmer than natural turf and soft enough for bare feet, all our grasses are child and pet friendly. Artificial grass does not require mowing or watering and does not get muddy or go bare in the summer.

### Superior Yarns:

Made from superior yarns by our manufacturing plant, our range includes; realistic leisure and play grasses, performance sports grasses, golf green and tee grasses, together with coloured grass and woven graphics.

### Quality:

Unlike some other artificial grasses that are now readily available throughout the United Kingdom, our products are not cheap imports – they are high quality products backed by genuine guarantees with no middle men to affect the pricing structure.

## Further Information:

Our products are high quality backed by genuine guarantees with no middle men to affect the pricing structure.

All our grasses are soft, non-toxic, UV resistant and suitable for children and pets.

We can provide our products as both supply only or as supply and installation.

**"High quality artificial grass at an excellent price and service. We would highly recommend Supreme Lawns!" - Client**
