

New large disk packaging by ZOOK provides protection for graphite rupture disk sizes 10" and larger during shipping as well as storage.

Features

- Rugged design secures the disk in the packaging until the disk is ready to be installed into the piping system.
- Packaging can be easily disassembled by removing the 4 bolts and top for inspection and then re-assembled for storage.
- Lower supports/runners allow for easy handling with a fork truck.
- All wooden packaging materials are in compliance with ISPM 15

¹Disks rated with burst pressures less than 15 psig and without a vacuum support will be supplied with a foam membrane support.

²Disks supplied with a gasket attached to the flat side of the disk and a burst pressure less than 15 psig will be supplied with a gasket filler on the flat side.
