

Company's Impact On The Environment

Analytical Components Limited is committed to minimising the impact of its activities on the environment by implementing the following:

- Comply with applicable codes of practice.
- Assess the environmental effects of all operations.
- Continuously seek to improve environmental performance.
- Reduce pollution, emissions and waste.
- Raise awareness, encourage participation, and train employees.
- Participate in discussions about environmental issues.

Specific issues relevant to Analytical Components Ltd include:

- Reduce the impact of transportation.
- Better recycling of materials and packaging.
- Reduce the use of all raw materials, energy, and supplies
- Maximising recycling and reuse opportunities.
- Efficient use of water and energy.
- Use of biodegradable or alternatives to chemicals.
- Minimising use of solvents.

Analytical Components Ltd has already implemented certain things within the company to minimise its environmental impact such as:

- Installation of low powered LED lighting in the cleanroom and wherever possible.
- Recycling bins in both the clean room and office space.
- Investment in equipment used to recirculate and cool water for our vacuum system.
