

**Knowledgeable  
when it comes to  
Line Marking**

*Total solutions to warehouse, logistics and distribution industry.*

## About Fastline Services

---

**We are a dynamic, fast-growing company specialising in bespoke safety provision for the warehouse, logistics and distribution industry.**

Our dedicated installation teams fit and maintain market leading site safety products and services, offering our clients flexible, reliable and

reassuring protection.

Our unrivalled after-sales support provides peace of mind, should you require assistance or advice we are here to assist.

We offer a total solution, meaning that there is no need to spend your valuable time dealing with multiple suppliers.

Our experts will carry out an audit of your premises and recommend products based on your specific requirements. Our project managers manage the project with you overseeing the process to completion whilst keeping you fully informed along the way.

From machine guarding, racking and column protection to ground-works and line marking, to name but a few – we have a wide portfolio of safety solutions. Whatever your requirements we have you covered, and are available to advise for the best solution to suit.

*We have expanded our safety and security provision to the commercial and retail sectors, along with manufacturing and production, proving just how versatile our offering can be. Compliant with ISO9001, 14001 and Safe Contractor requirements we offer a comprehensive project management service, as well as health and safety guidance.*

# Our Knowledge and Experience

---

**O**ver 20 years of experience helping companies working in the logistics and warehousing sectors says it all. We know our stuff and we're proud of that.

Approaching each and everyone of our clients projects with the same ethos, 'knowing what it takes to keep things running smooth'. Meaning we use the latest technology, we don't cut corners. Being the preferred supplier of some big brand organisations to deliver contracts you can rest

assured our team provide the best service possible.

We are able to manage multiple projects, across various sites and work with our clients to advise on the best practices to improve the safety and efficiency of the sites we are working within.

High standards are maintained across the board from our machinery, tool and power provisions to working as a subcontractor the client has peace of mind we will manage the job commercially, as well as physically should site changes occur, ensuring

changes and communications are recorded and reported as they happen allowing project managers to react quickly to maintain smooth project delivery.

We are fully committed to site safety and work with a team of 16 health and safety specialists covering every aspect of site safety, we are also accredited with Quality ISO9001 and Environment ISO 14001 accreditations.

Going the extra mile offering a complete solution to our customers. We ensure that we source the best products

and materials to ensure that the customer gets value for money.

**Consistency in quality.**

*We can provide training and equipment for companies to carry out their own works – We understand that its not always cost effective to bring in a team when access to areas is limited – let us help you to help yourself.*

*Call Us 01302 910205 or  
info@fastlineservices.co.uk*

*Durable, visible and accurate  
Internal and External line marking  
solutions for all types of surfaces.*

# Internal and External Line Marking

---

**Internal line marking systems can turn a functioning warehouse or production area into a highly efficient workplace with safety at the forefront of all activity.**

Dividing areas into separate zones, separating pedestrians and vehicles and allocating clear storage spaces for

different materials are all made much easier and clearer with the correct line marking system for internal applications.

Whether you are looking for a highly visible line markings for a car park, loading bay or truck stop or need to enhance the sports hall or play areas of schools and colleges.

We can offer durable, visible and accurate line marking solutions that have been designed and formulated for external applications alongside different preparation methods to help the surface cope with the newly laid line marking.

Line markings are quick to dry, meaning that normal business can resume quickly and are resistant to heavy wear and tear, such as vehicle tyres, foot traffic, extreme temperatures and inclement weather.

***Internal Line markings: Walkways | MHE Routes | Exit Routes | Marshalling lanes***

***External Line marking: Car parks | Warehouse Traffic Management | Airports | Sports and Recreational Markings | Road marking Contracts***

*Working with market leading manufacturers to ensure your system is the best quality and highly effective.*

# Impact Protection

---

**A**sset protection is a crucial part of warehouse management and something that must take priority to ensure the safety of workers and visitors and the ongoing careful maintenance of valuable machinery, stock and other assets.

We are experts in specifying, installing and maintaining a wide range of hi-impact protection systems, which include but are not limited to:

Barrier Protection  
**Supplying and installing barrier protection solution for your unique set-up**

Racking protection  
**Easy to install and resistant to accidental and deliberate damage and heavy usage**

Bollard systems  
**Prevent unauthorised access, protect precious assets and enhance people's safety with Bollard Systems**

Column Protectors  
**For a well maintained, professional way to enhance safety at work and protect your warehouses assets**

Wall protectors and bumpers  
**Guard against accidents, collisions, spills and damage**

Wheel stops and guides for internal and external traffic  
**Road Ramps Warehouse and Car Park Solutions for all vehicle sizes**

The process for installing our asset protection solutions starts with a full audit of your premises, followed by our recommendations to help you select the right asset protection package for your needs. Working with market leading manufacturers to ensure that your system is the best quality and highly effective with unrivalled ongoing customer service and support.

The systems we provide and install are highly visual and act as effective deterrents to protect pedestrians, prevent intentional or accidental damage to buildings and property and restrict access to hazardous areas.

*We design and install  
concrete bases and surfacing  
on a national level*

# Civil Engineering : Concrete and Groundworks

---

**O**ur extensive skills and experience in groundworks and construction together with the latest plant and machinery enables us to offer and deliver the quality and service you require.

We are available to design and install concrete bases and surfacing on a national level, there is no limit to the size of the jobs we can handle, from

specialised bunded areas to full warehouses and lorry yards.

Expert mobile civil engineering and site infrastructure teams have the capability and experience to install mast rigging, power and site containment in the most difficult to reach places with minimal disruption to the surrounding environment.

We carry out all our work to a high standard and use the right materials for each and every application we carry out, we manage all our projects from concept to completion and are able to take larger project demands out of the hands of our clients, so you know the job will be done right, first time, every time.

*HBC Vehicle Services Ltd., needed a bunded concrete area for the handling of damaged vehicles to comply with environmental regulations. We worked with HBC Vehicle Services from initial survey, design and construction.*

*Having carried out the work needed by our client from start to finish, without interruption to the clients work they were extremely happy with what we delivered within the time frame.*

*Using the latest diamond core bit technology we can core through the toughest of surfaces*

# Diamond Core Drilling

---

**If you need a quiet and non-percussive drilling solution then look no further than Diamond Core Drilling.**

Using diamond drill bits we can cut through materials such as brick, stone, steel and reinforced concrete. In a construction environment we use water suppression and dust control attachments to control the creation of dust and to effect a safe working environment.

Our rigs utilise core bits fitted with a diamond cutting segments to create precise,

measured holes. These holes can be drilled through a wide range of hard-wearing materials such as reinforced concrete, brickwork, blockwork, masonry and rock.

## **Benefits of our Diamond Core Drilling Service;**

- Low noise / Dust free / vibration free drilling
- The most precise drilling methods

- Clean water / slurry management equipment means clean site – no slurry
- Non – percussive operation means structural integrity is maintained

*Well executed repairs to damaged surfaces are cost effective and can minimise an escalating repair bill in the future.*

# Surface Repairs

---

**We provide hard surface repairs and restoration to a wide range of surfaces. We operate nationally providing expert services for commercial, retail and construction clients.**

24/7 traffic in warehousing and supply chain operations can take a toll on surfaces, we have experience of working with damaged concrete, tarmac and other resin surfaces within the warehouse, logistics and distribution industry, we work with our own range of repair materials that fit the

requirements of the job, our repairs are rapid curing to eliminate the need for downtime and disruption to our clients business.

In many cases our expert team can advise on the repair method required and in the same day or depending on scale of the repair within the hour, have the issue rectified and the site operational.

We understand our customers' requirements and work with them to ensure that health and safety procedures and damage reduction to MHE such as forklift trucks is prevented. Well executed repairs to damaged surfaces are cost effective and can minimise an escalating repair bill in the future.

***We can provide training and equipment for companies to carry out their own works – We understand that its not always cost effective to bring in a team when access to areas is limited – let us help you to help yourself.***

High-quality markings can be tailored to create fun and educational playground spaces.

# Playground and Sports grounds

---

**O**ur extensive playground marking experience covers both indoor and outdoor courts across the country.

Our accurate, high-quality markings can be tailored to meet the exact needs of the sports ground in question, using school playgrounds markings a variety of materials to suit your surface type in a range of colours.

Popular sports ground line marking options include football pitches, netball, tennis and badminton courts, running tracks, hockey and volleyball. Our work

is compliant with Sports England specifications and other relevant guidelines. We can also add bespoke logos, signage, team colours and other stencils and personalised designs for your school's playground.

We can work with all common surfaces, including asphalt, concrete, wood and polyurethane to produce

visible, clear results. Our work is highly durable and easy to maintain, meaning that sports can continue uninterrupted.

**Transform your playground into a fun and engaging learning space.**

*We can provide training and equipment for companies to carry out their own works – We understand that its not always cost effective to bring in a team when access to areas is limited – let us help you to help yourself.*

*We supply and install guards and protection for heavier machinery used in industries like steel or robotics.*

## Mesh Partitioning

**C**reating a bespoke and fully adaptable storage solution is simple with our high-quality mesh partitioning product range.

Our modular mesh panel system can be customised to fit your exact requirements, maximising your storage space, protecting your machines stock and simplifying the logistics across your warehouse or commercial operation.

Fastline Services offer both lightweight and heavyweight mesh partitioning solutions for varying levels of security and ease of access.

The mesh allows natural light to filter through and does not impede fire safety sprinklers in the event of an emergency. High-value stock and equipment can now be protected and easily viewed, along with hazardous liquids and high-risk machinery.

Our mesh partitioning can be used in internal and external applications and is highly durable, even in inclement weather and following heavy use. It has an attractive finish that will enable it to fit seamlessly into your warehouse or commercial premises. Extra panels, doors and security measures can also be added to your exact specifications to create a truly bespoke solution

## Machine Guarding

**K**eeping valuable machinery safe is easy and efficient with Fastline Services' wide range of perimeter machinery guarding products and services.

The range contains solutions with different characteristics to match your exact requirements. Mesh cages and partitions act to not only deter theft but also to prevent accidental or intentional damage and protect workers moving about the area.

A durable system of self-supporting, high-impact steel panels and baseplates provides maximum security at a reasonable price. They are easy to fit, which minimises

downtime and keeps installation costs low. We can provide simple structures or more complex modular solutions, according to the type of machinery you wish to protect and your available space and resources.

We also supply and install guards and protection for heavier machinery used in industries like steel or robotics. Our protection systems are painted with epoxy polyester powder for an aesthetic finish that is easy to maintain.

Our solutions are suitable for warehouse and distribution scenarios, as well as production facilities and commercial and retail property.

Your one-stop-shop for line marking and safety solutions for warehousing and logistics. We offer a wide range of products and services that are designed to provide our customers with a bespoke and totally reliable safety, security and asset protection solution.
