

Grout Gauge

Model 14G

Application:

Originally designed for tunnelling and boring purposes, the standard grout probe is now used extensively throughout all industries.

The Grout Gauge offers 100% prevention of any medium entering the instrument, eliminating the possibility of any build-up or clogging. The PVC construction of the probe is also considerably more durable than a traditional stainless steel diaphragm seal.

Nominal Dial Sizes:
63mm & 160mm

Specifications

- **Nominal size: 100mm**
- **Accuracy: + 1.6% FSD**
